Would Minister to Physical as Well as Spiritual Welfare of Foreign Immigrants

St. Louis, Oct. 24.—A church department of immigration which would minister, not only to the spiritual welfare, but also to the physical needs of immigrants coming to the United States will be a part of the organization of the Protestant Episcopal Church if a memorial submitted to the general convention of the convention is adopted. The memorial, coming from the diocese of Washington, D. C., is on the calendar of the House of Deputies of the convocation for discussion to-day. It asserts that many students of the situation believe that

the close of the European war will bring aliens to the United States in larger numbers than ever before in history. With these people facing new problems in a strange land, it continues, there is a large and fertile field for the work of the church.

It was expected that discussion of the revision and enrichment of the book of common prayer temporarily set aside in the House of Deputies last week, would be resumed late to-day. This, according to leading churchmen, is generally considered the largest problem yet before the lower house. Final adjournment of the convention has been set for 5 o'clock next Friday afternoon, Francis A. Lewis, of Philadelphia, chairman of the committee on dispatch of business, announced.

New Bullet Will Pierce Nearly Inch of Steel or 20 Men Standing in Row

New York, Oct. 24.—Army officers who have observed the tests of the new armor-piercing bullet now in progress at Sandy Hook proving grounds are enthusiastic over the results. The bullet is of only 20 caliber and can be fired from the regulation army Springfield rifle. At a distance of fifty yards the projectile ploughed through a sheet of steel three-quarters of an inch thick and then penetrated the silhouette target planted behind the steel plate. It is believed that one of the new bullets could be fired clean through from ten to twenty men standing in a row.

The bullets are tipped with a piece of steel encased in lead, which acts as a lubricant when the bullet strikes steel and thus aids penetration. The projectile which passed through targets in recent tests were but little distorted. It is pointed out that the great value of the bullets will be

Damage Suits Because of Suspension Filed Against Each of Striking Miners

Punxsutawney, Pa., Oct. 24.—The Rochester and Pittsburgh Coal and Coke Company, whose mines here are closed by a strike of 2,500 miners who presented a new scale after the company had signed the scale of the United Mine Workers of America, announced to-day that suit has been filed against each miner and the local unions of which they are members, asking damages because of the suspension.

The company's lawyers are now engaged in framing the petition which alleges that the men violated their agreement, signed April 15, last, in Philadelphia when they quit work demanding a new scale. It contends that the United Mine Workers are just as liable for breach of contract as any responsible corporation or individual. The suit, officers of the company said, was based on the decision in the Danbury hatters' case.

San Francisco, Oct. 24.—A Japanese labor council, the first organization of its kind, it is said, in the United States, was created here last night at a meeting of representatives of nine Japanese labor unions, presided over by Bunji Suzuki, fraternal labor delegate from Japan. The announced purpose of the organization was to better conditions among Japanese workmen. The union represented at the meeting included barbers, tailors, laundry workers, garden workers, suit cleaners and day laborers.
