## What Is Your Guess?

The mysterious, revolving tire in our window is baffling thousands. If you haven't seen it don't miss it. Howard Thurston, the great magician, spent years in perfecting this illusion. It spins in the air with no apparent means of support. You say it can't be done, yet it spins before your very eyes. A few people have solved the mystery; come and see if you can.

Here's an extra feature: The first motorist who guesses nearest the number of revolutions the tire makes in a day of 10 hours gets a Miller Geared-to-the-Road Tire free, in the size to fit his car. Contest closes Saturday night. With your guess, leave your license number and make of car. Get your guess in early.

## Courtesy Counts!

Telephone courtesy means more than mere politeness. It means consideration for the feelings and convenience of others.

This is just as important in business as in social intercourse. In a telephone conversation the party to whom you are talking forms his judgment of you entirely by what you say and how you say it.

Good manners and amiability never fail to make a favorable impression and greatly facilitate good telephone service.
