Suits and Coats at Appealing Prices

Hundreds of Attractive Garments in Uncommon Styles

Every style is as refreshing as it is beautiful—and one of the most interesting factors is the attractiveness of the prices.

New features, embodying designs that are only to be seen in garments of characteristic elegance, mark the suits and coats in broad showing.

The garments illustrated are typical of the style loveliness that a modest purse will buy. The coat is of silk velour with rich fur trimming and the suit is of fine quality velour simple in design yet elegant in appearance.

Attractions for to-morrow include—

Poplin suits buttoning high at the throat. The broad sailor collar is trimmed with a band of nutria and a narrow double belt holds fullness over the hips; in brown, navy blue and black . . . \$18.50

A black poplin suit in excellent quality; the coat is a plain tailored model which can be adapted to any figure and the sailor collar is inlaid with velvet. The skirt is also a plain flare model . . . \$22.50

Poplin suits in green, brown, Burgundy and navy blue; the coat falls loose from the shoulder, held in at the waist by a belt. This model has a mole-skin or seal collar . . . \$27.50

Diagonal cloth suit, in brown; high adjustable sailor collar with skunk trimming and a panel back with a circular flare over the hips; flare skirt with gathered back . . . \$30.00

Chiffon broadcloth suits, in blue, green and black. This is a long flare model, buttoning high at the throat with seal collar; the skirt is a flare model with gathered back . . . \$35.00

Gabardine suit, in a fine quality in navy blue, brown, plum and green; the large circular collar and patch pockets are trimmed with bands of seal; box plaits reach from the shoulder to the bottom of the coat in the back with narrow strap belt extending from the hips to the front holding in a plaited fullness . . . \$37.50

TECH DRAWING IS COMMENDED

Graduates Get Good Drafting Jobs and Receive College Credits

"Graduates of the Technical high school know how to draw; all that need at college is the theory," has been the consensus of opinion of school superintendents and heads of drawing departments from various Eastern States who have paid a visit to that phase of the work at Technical high school.

After a student had pursued drawing at the Technical high school for four periods a week during four years, he is equipped possibly better than graduates from any other high school in the State and in practically every instance receives credit for the first year in college either in whole or in part.

Some of the universities that accept the work of the Tech graduates for whole or part credit of the first year in the college course include, University of Pennsylvania, Massachusetts Institute of Technology, Lehigh, Gettysburg, State, Purdue, Lebanon Valley, Bucknell, Mechanics Institute and Ohio Northern University. In addition to crediting the students for the work done in the local high school they have invariably pronounced the work as the best ever examined from any high school.

The Superintendent of Apprentices of the American Locomotive Works at Schenectady, N. Y., after making an examination of the drawing department at Tech recently, stated that he would be willing to accept any number of graduates from the Walnut street institution. Credit for the high standards reached and maintained in this line of work at Tech goes to Professor A. M. Lindsay, head of the drawing department, and Professor J. F. Rees, assistant in this line of work. Both instructors have been connected with Tech almost since the inception of the Technical school in 1907.

Some Successful Lads

Scarcely a local plant that does not employ draughtsmen who have started their work along this line at Tech. Some of the first graduates who are engaged in this vicinity in the capacity of draughtsmen are Charles A. Gehring, 1907, Bell Telephone Company; John German, 1907, State Health Department; Fred Opperman, 1908, Elliott-Fisher Company; Herman Hoffnagle, 1909, Frog and Switch department of the Bethlehem Steel Company; John Shertzer, 1910, Bell Telephone Company; Alfred Gulbrandson, 1911, Bridgton, Bethlehem Steel Company; Walter Fogelsanger, 1911, Bell Telephone Company; E. S. Olevine, 1911, Frog and Switch department; Roy E. Walburn, American Locomotive Works, Schenectady, N. Y.

The exhibit of the drawing done during the year has always been one of the features of the "open session," and one of the busiest departments of the school is the fourth floor where the drawing rooms are located.

4,000 COMING TO M. E. MEET

Men Noted Throughout Nation Will Be Among the Speakers

Pennsylvania Methodists to the number of 4,000 will gather at Harrisburg Monday, November 20, for the big State convention in Chestnut street Auditorium. Some 1,300 ministers and many thousands of laymen will be in attendance. The sessions will be continued through November 21 and 22. Prayer, Methodist union, education, industry, immigration, the saloon, evangelism, missions, methods and lay activity will be among the subjects discussed by such noted speakers as W. E. Dougherty, New York, and Bishop William A. Quayle, St. Louis, Bishops Cranston and Hendrix and President T. H. Lewis, of Western Maryland College, Henry F. Ward, Clarence True Wilson, Washington D. C., E. J. Moore, Philadelphia, Dr. J. R. Mott, S. Earl Taylor, New York, and D. D. Forsythe, Philadelphia, Bishop William F. McDowell, of Washington, D. C., Fred B. Fisher, of New York City, Dr. J. W. Van Cleave, of Chicago, Bishop Franklin Hamilton, of Pittsburgh, Bishop J. F. Berry, of Philadelphia, Harry W. Dunlap, of Pittsburgh, Frank L. Brown, of New York City, Dr. A. E. Piper, of Wilkes-Barre, Dr. Daniel L. Marsh, of Pittsburgh, Dr. George H. Buckley, of Philadelphia, Dr. R. H. Diefenderfer, of Newark, John H. Race, of Cincinnati, Dr. J. H. Morgan, of Carlisle, Dr. George R. Grose, of Greencastle, C. F. Armitage, of New York City.

DOUBLE-TRACK TRANS-SIBERIAN

News has been received in Tokio reporting the completion of the double-tracking of the Siberian railway. The news says that the Russo-Japanese official confirmation, but it is well-founded, it is bound to prove a welcome relief to the present congestion of traffic on that line. It recalls the fact that during the Russo-Japanese war the trans-Siberian was a one-rail road, the best the Russian engineers could do, being the construction of frequent switches, so that trains could pass in either direction. And yet by Spartan regulations they managed to feed and carry munitions for over 500,000 men over that "double strip of rust."

IRISH DISCOVERED AMERICA?

Francis O'Sullivan Tighe, author of "The Portion of a Champion," Scribner, states that the honor of being the earliest precursor of Columbus, in visiting America belongs to the Irish instead of the Norse. The Norse themselves acknowledged this priority and in their sagas gave America the name of Great Ireland, and called the region south of Vineland by its Irish name Brissail or Brasil, a name which still survives in testimony of the exploit of the remote discoverer. Mr. Sullivan's novel is concerned with Ireland in the heroic age.

NATIONAL HEADS PRAISE HIGHWAY

Telegrams Read at Easton Event Indicative of General Opinion

Charles Henry Davis, of Cambridge, Mass., and A. W. Henderson, of Colorado Springs, sent telegrams to the William Penn Highway Association relative to the Easton road opening. Mr. Davis is president of the National Highways Association and Mr. Henderson is secretary of the Pikes Peak Ocean-to-Ocean road, of which the William Penn Highway is the Pennsylvania division.

Mr. Davis' telegram is as follows: "On this auspicious occasion let me express to you and all those with you devoted to the upbuilding of the William Penn Highway, and especially the building of its New York extension, the very best wishes of the National Highways Association, of which your highway and the Pikes Peak Ocean-to-Ocean Highway are parts."

"It is only by the development of these great continental interstate trunk and national highways that the people of the United States can gain 'good roads everywhere,' to which they are entitled."

"Regretting my inability to be present personally with you, and wishing you all success, I am, with great sincerity for the cause,

"CHARLES H. DAVIS, President, National Highways Association."

The telegram from Secretary Henderson, of the Pikes Peak road, is as follows:

"National executive committee, Pikes Peak Ocean-to-Ocean Highway, extends congratulations upon dedication of first permanent length in Reading-New York extension of the William Penn Highway. This important event is indicative of coming greater developments in our transcontinental highway; and it furnishes a splendid example for all interested in good roads everywhere."

"PIKES PEAK OCEAN-TO-OCEAN HIGHWAY."

"A. W. Henderson, Secretary."

These telegrams were read at the

road dedication ceremonies at Easton last Friday and created a great impression on the record-breaking audience.

NOMINATED OFFICERS

New Cumberland, Pa., Nov. 8. — On Monday evening, the Christian Endeavor Society of Trinity United Brethren Church held a meeting at the home of Mrs. W. A. Cookerly in Reno street, and nominated officers. After a short business session a pleasant hour was spent and refreshments served.

A Never Failing Way to Banish Ugly Hairs

(Aids to Beauty)

No woman is immune to superfluous growths, and because these are likely to appear at any time, it is advisable to always have some delicate powder handy to use when the occasion arises. A paste is made with some of the powder and water and spread upon the hairy surface; in about 2 minutes this is carefully removed and the skin washed. You will then find that your skin is entirely free from hair or fuzz. Be sure, however, to get real delatone.

"40 WINTERS 40 SUMMERS Since Then Have Rolled Away"

40 winters and 40 summers have rolled away since persons took the prescription for Number 40 For The Blood and are living and well to-day. No. 40 is compounded from ingredients that are set down in the U. S. Dispensatory and other medical books as follows: "Employed in diseases of the glandular system; in blood poison, mercurial and lead poisoning, scrofula, rheumatism, catarrh, constipation, liver and stomach diseases. Under its use sores, ulcers, nodes, tumors and scrofulous swellings that have withstood all other treatment disappear as if by magic." No. 40 is sold by Geo. A. Gorham, 16 North Third street.

ROYAL Baking Powder Absolutely Pure

Insures the most delicious and healthful food

NO ALUM - NO PHOSPHATE

FOR THE AMATEUR CHEMIST

The following is a method for preparing a substance that will detect an acid. In a pot put the outside leaves of cabbage. Cover them with water and boil for ten minutes. The water will have acquired a yellow tint. To test for an acid put some of this liquid in a test tube. Pour a few drops of the suspected substance in and shake the tube.

If the yellow color is destroyed the substance is an acid. To make the change more clear, some lime water can be added to the cabbage solution. This will intensify the color of it. The lime water for the above experiment can be made very easily in the following way: Fill a bottle with water. Put in a few pieces of calcium carbide. After the carbide is slaked, filter the water through a piece of

filter paper. This will be lime water. —George E. Minch, in "The Electrical Experiments."
