What Happened Last Night at the Technical High School Auditorium

Last evening at the Technical High School Auditorium nearly fifteen hundred people heard a concert pianist of international fame play with the delicate skill, with the tremendous power of a virtuoso; and in the next few moments heard a piano reproduce his beautiful interpretations, phrase for phrase, nuance for nuance, art for art.

The remarkably perfected Ampico Reproducing Piano in reality encored Mr. Adler's finest efforts with exact repetitions of the same selections, losing no detail of his splendidly expressive powers. The most delicate shadings — the most exquisite feeling — the identical emotional forces, were revealed.

That such a piano could have been dreamed of and perfected is the wonder of wonders which every person who heard the comparison is still marveling at to-day.

The reproduction records of the artist's playing on the Ampico Piano were created by the artist himself in the Ampico laboratories in New York. To make these records he played a conventional grand piano, connected electrically with a recording instrument in an adjoining room. The subtle phrasing, the touch of the fingers on the keys, the tempo, the pedaling — every minute characteristic was recorded.

What Mr. Adler demonstrated last evening can be duplicated by nearly 100 other pianists who also have made many wonderful recordings of all classes of music for the Ampico Reproducing Piano.
