CROP ESTIMATES CLOSE

Washington, Dec. 8.—The method of estimating the size of the country's farm crops has been so improved and systematized that the actual production of important products is now made with a close degree of accuracy by the Bureau of Crop Estimates of the United States Department of Agriculture. Nearly two million schedules are handled each year by that bureau in making up the government monthly crop reports. About one hundred and sixty thousand are constantly making personal investigations, one agent covering a state; and 105 clerks are employed in Washington handling the large number of reports from the voluntary crop reporters and to keep records of crop information of this and foreign countries.

TRY TO JUSTIFY DEPORTATIONS

German Government Says Idle Belgians Are Degenerating

Berlin, Dec. 8, via London. — The German government issued a statement to-day in explanation and justification of the transfer of Belgian laborers to Germany. It says the measure is by no means a hardship for the laborers, but is a social necessity. Owing chiefly to the British embargo against Belgian overseas trade, which before the war supported a large part of the industrial population, large numbers of Belgian workers are idle, the statement says, and conditions are growing worse. Many families, after spending all their savings

have become objects of public charity. This state of things is not due, as asserted in Belgium, to German requisitions of raw material, it is explained, for these requisitions occurred as a rule only where factories were unable to continue operations.

655,070 Dependent
Of 1,200,000 employees engaged in Belgian industries before the war, 565,000, including 158,000 women are now wholly without work, and 150,000 including 46,000 women are partly without work, making a total of 655,000 persons dependent on public aid. In addition to these, there are 293,000 wives and 612,000 children of men without work, so that 1,560,000 persons, or one-fifth of the total Belgian population, require assistance. More than 300,000,000 francs already has been spent in supporting these persons and 20,700,000 francs monthly will be required henceforth. These masses of idle people, the statement says, are degenerating, and drunkenness and social depravity are resulting.

Offered Profitable Work
The statement goes on to say that the labor situation in Belgium has grown worse and that conditions are now such as to necessitate improvement; hence the ordinances must be enforced more vigorously in order to relieve the situation. "Before compulsory transport, however, every idle person has the opportunity voluntarily to accept profitable work on contract and compulsion is resorted to only where the laborer stubbornly refuses."

Workmen coming to Germany are placed on the same footing as Germans and are earning higher wages

than they ever received in Belgium. Steps have been taken to send part of their earnings to their families in Belgium. The laborers also are permitted to make regular visits to their homes and families are allowed to accompany them to Germany if that is desired. Provision also is made for religious services in their own language.

In view of the circumstances, the statement says, the transportation of workmen to Germany means a considerable betterment in their position. Inasmuch as hundreds of thousands are being ruined in Belgium, while aged men, women and even children are wearing themselves out with work in Germany, the transportation of Belgians, the statement asserts, is not only a right but a social duty of the German government.
