SEEMS EVERYONE HEARD ABOUT IT

All want to try new drug that dries up corns so they lift out.

Goods news spreads rapidly and druggists here are kept busy dispensing freezons, the recent discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers. A quarter of an ounce costs very little at any pharmacy, but is said to be sufficient to rid one's feet of every hard or soft corn on callous. You apply just a few drops on the tender, aching corn and instantly the soreness is relieved, and soon the corn is so shriveled that it lifts out without pain. It is a sticky substance, which dries when applied and never inflames, or even irritates the adjoining tissue. This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.
