Entered at the Post Office in Harris-burg, Pa., as second class matter.

WEDNESDAY EVENING, DEC. 20

Moderate tasks and leisure,

Quiet living, strict-kept measure,

Both in suffering and in pleasure-'Tis for this thy nature yearns.

WHEN THE TROOP COMES HOME of the Governor's Troop as cordial a welcome home as it gave them an enthusiastic send-off mer in response to the President's call They have made their sacrifice to the common good—not the supreme sacrifice of life or limb, to seen on the streets these days without be sure, but that is not because they at least a half-dozen bundles. sacrifice to the common good-not the were not ready and willing if the

The control is the bright of principle of the control is the control in the contr

battle cruisers are 850 feet between larged membership. We have no doubt perpendiculars and 874 feet over all; the response would be as ready and as their beam is ninety-one feet, and generous as it was when the Y. W. C. A. 850 feet between perpendiculars is back with a similar project.

cruisers will be only 34,800 tons. This is several thousand tons less than the full-load displacement of the Lusitania, and about 20,000 tons less than the full-load displacement of the Imperator. The apparent discrepancy is explained by the relative-ly moderate beam, ninety-one feet, of the battle-cruisers, and the remarkable fineness of their model.

WEDNESDAY EVENING,

The question of the type of gun (14inch or 16-inch) to be mounted in the main battery of the new battle cruisers has been decided in favor of the new 14-inch, 50-caliber gun, and ten of these will be mounted in four turrets, two of them carrying three guns and two of them two guns each, the number of guns and their method of emplacement being similar to that of the battleships Nevada and Oklahoma. The total energy, however, is considerably greater, the 50-caliber gun of the battle cruisers developing 70,000 foot-tons of muzzle energy as against 65,000 foot-tons for the 45-caliber guns as mounted on the Nevada. This means that a broadside salvo from the battle cruisers will have a total muzzle energy of 700,000 foot-tons, or suffi-cient to lift 1,000 tons 700 feet into the air. Defense against torpedoes will be intrusted to a battery of twenty 5-inch guns, sixteen of which will be mounted amid-ships on the upper and superstructure decks. No less than eight torpedo tubes for firing the new 21-inch torpedo with a range of 10,000 yards will be emplaced, four of these being above water and four below.

The new ships, because of their great size, will naturally carry a large complement, greater, indeed, than that of any ship afloat. The total number, including officers and men, will be 1.274.

These descriptions have a soulsatisfying sound for timid, peace-lov-ing folks. They smack strongly of HARRISBURG will give the men of the Governor's Troop as the most effective kind of peace insurance policies now being The more of them between Europe and gave them an enthusiastic send-off when they marched away last sum-mer in response to the President's call the war in Europe ends the greater our own security will be.

fastest destroyers, and the gun power of the big corporations, especially of a modern battleship. On one point those employing technical men, and only, that of armor protection, is information lacking. The thickness and ample for the needs of the community distribution of this armor is not given when it was erected years ago may be out; for if there is one feature of found too small when the association warship design more than any other puts its new program into operation. upon which the naval constructor is Perhaps the people of the city will be silent, it is that of the armor plan of called upon for contributions toward To come down to details, the new will meet the requirements of an en-

so feet between perpendiculars is just 100 feet greater than the length between perpendiculars of the famous Lusitania, and it is exactly equal to the length between perpendiculars of the famous Lusitania, and it is exactly equal to the length between perpendiculars of the Hamburg-American liner Imperator.

In view of these figures it is surprising and very significant to learn that the displacement of the battle
back with a similar project.

Certain it is that the directors with directors with their new program in operation will require full and hearty support on the general Powell would resign and be anything to the report that Auditor General Powell would resign and be anything to the Public Service Commission, and Charles A. Snyder go into anything to the Public Service Commission, and Charles A. Snyder go into the Auditor General's department without serving in the Senate where are cause at stake is the world's free life the administration does not want him, to be frank about it. Mr. Powell said the rule of the people everywhere—the administration does not want him, to be frank about it. Mr. Powell said the rule of the poople everywhere—the administration does not want him. The program to make public announcement, but the people will judge the same story was sprung about State administration officials to-day that there was anything to the report that Auditor General Powell would resign and be sword—amme to the Public Service Commission, and Charles A. Snyder go into the same that speaks of the Bolod out-intraction officials to-day that there was anything to the report that Auditor General Powell would resign and be anything to the report that Auditor General Powell would resign and be anything to the report that Auditor General Powell would resign and be anamethat calls the world to save mankind from the sword—The burden of sacrificial strife when it had its own plans well without serving in the Senate where anything to the report that A suditor General Powell would resign and be anything to the report t

subject. The Governors possed that Mr. Smith, while an able and efficient official, has not been in the best of health and that with a record of honorable service behind him, Mr. Smith can give way to a younger man. The Governor's friends point out that in a contest which means so much to him he is justified in using appointments.

Aname is a warmer glow and a swifter flowd that the touch of a courage that conquers fear—Aname like the call of a trumpet, clear clear and iron-strong, and silver-sweet and iron-strong, and silver-sweet and iron-strong, and silver-sweet and iron-strong.

when it was erected years ago may be found too small when the association puts its new program into operation, which the naval constructor is not, it is that of the armor plan of ships.

The cruisers are 850 feet between lectures are 850 feet between reductions and 874 feet over all; to beam is ninety-one feet, and redraught is over thirty feet. Now feet between perpendiculars is seen to small the reduction of the contemplation of the same is justined in using appointments.

—Reports that Highway Commissioner Frank B. Black threatened to resign last evening or that Governor to day with insurance commissioner brought unqualised denial from men aligned with the Governor to-day. Mr. Black, like a battle-song; laws the response would be as ready and as grandled mind from men aligned with the Governor to-day. ment yesterday.

AGAIN THAT CHRISTMAS PRESENT. Are you sure that she is go-

ing to give you something?

Evening Chat

Mexican quail brought from the Mexican quall brought from the highlands of the southern republic to be kept until spring for distribution throughout Pennsylvania are failing to stand the climate, according to reports reaching the State Game Commission to-day. The birds do not seem to be suffering from any organic disease, but the change in climate is affecting them. "We are losing scores of birds. I have had them examined at Washington and Philadelphia and we do not find any disease affecting them," said Dr. Joseph Kalbfus, secretary of the Game Commision, to-day. "It think it must be the climate. We have had the birds housed up and carefully tended and fed, but the change seems to have been too much."

Dr. Kalbfus, who has been getting reports on the kill of deer, said that he thought the total would run less than last year in spite of increased bucks shot in Lycoming, Clinton and other central counties. The number killed in southern counties is less, although more hunters were in the woods. highlands of the southern republic to

contrer central counties. The number killed in southern counties is less, although more hunters were in the woods.

"Winter picnics" are becoming popular in Harrisburg. The automobile is playing a large part in making the country an inviting place to city folks when cold winds blow and the snow is on the ground. The other day a party of Harrisburg men motored to Ellendale Forge—which is where the road that extends from Dauphin out Stoney creek valley comes to a sudden and very distinct end—and then, packs on back, hiked three or four miles up the valley along Stoney creek, following an old wood road above the ice dam. Near a fine, large spring they made camp, built a fire place of mountain stone and broiled bacon and a large, juicy steak over the coals, finishing the meal with bread, onlons and a kettle of coffee, also boiled over the camp fire. They were dressed for the outing and not only were comfortable, and pleased with their trip, but are so delighted with the experience that they are planning others of the kind and are showing snapshots made on the trip to skeptical friends who doubted the truth of some of their statements. The pictures amply prove all that they have been telling their friends. Another party packed up the sleds of a dozen "kiddies" themselves in another and drove away over into Cumberland county, where they not only enjoyed coasting without any interference on the part of policemen or street cars, but had a hot lunch from thermos bottles and a big hamper that was part of the luggage in the van. "It was great," is the way those who were fortunate enough to be along described the trip.

One of the most popular places on the park system this winter will be the dam page Paytage along the well.
