## O'NEIL PREPARES TO TAKE CHARGE

Will Put Two Good Men in Control of Affairs of Two Defunct Insurance Companies

Insurance Commissioner J. Denny O'Neil was arranging to-day to take charge of the affairs of the Union Casualty and Pension Mutual Life Insurance companies which were placed in his hands by the Dauphin county court to-day.

The petitions to vacate the receiverships in the federal courts were sent last night and Mr. O'Neil is arranging the details. "I shall name one man to take charge as special deputy in Philadelphia and one in Pittsburgh," said the commissioner. "The bonds for the Union receivership will probably be \$250,000 and for the Pension \$100,000. We shall take charge and do the best we can for the policyholders. The department's experienced men will be in charge and we will conserve everything we can."

The commissioner is sending out 3,500 checks for payment of half a million dollars on losses as returned premiums in the defunct American Union Fire Insurance Company which went into the hands of receivers in 1912. This dividend is 50 per cent and illustrates the policy of the department to conserve. A further dividend of from 15 to 30 per cent, may be made depending on litigation in court. The department took charge of this company under the Toner act of 1911 and named one of its men to take charge. There were no receiver's fees under this system and it will be applied to the Pension and Union.

Two Going at Once. — Deputy Attorney General Hargest has solved the problem of distating to two stenographers at once. Yesterday he dictated the petitions for vacating the receiverships in federal court in the insurance cases to two shorthand workers at the same time. It was a record even for the Attorney General's fast working office.

Purchase Authorized. — The Public Service Commission in an opinion by Chairman Amey last night authorized the Counties Gas and Electric Company to acquire the stock of the Lansdowne Construction Company, a New Jersey corporation which owns securities of the Conshohocken and Norristown Power Companies. The opinion says that no attempt was made to value properties or franchises.

Compensation Allowed. — The compensation board last night allowed \$3,375 to Tony Ferratt, of Philadelphia, who was permanently crippled by an accident. In an opinion by Chairman Mackey it is stated that the action was taken to give a lump sum so that the injured man could go to his native land where the money he gets will be of more value than in the United States.

Object to Directory. — The chambers of commerce of Sharon and Farrell have made objection in a manner in which the industries of those places have been handled in the new industrial directory.

The Game Conference. — Considerable interest is being shown in the plans for the conference on the State game laws to be held in the week of the organization of the Legislature. A general plan will likely be agreed upon.

Hearing To-morrow. — Arrangements have been made for another hearing to-morrow in the fight between the Newcastle Electric Company and the Pennsylvania Utilities Company.

To Attend Institutes. — State officials are arranging to attend the institutes to be held this week in Perry county. The meetings will be addressed by State experts.

Want the Jobs. — Secretary of Agriculture Patton is out in a long discussion of the proposed plan for dairy inspection. The plan of the Department of Agriculture is to have the numerous inspectors placed under that department and not under the Department of Health.

Buller's Busy Days. — Commissioner of Fisheries Buller is having a busy day. He is out in the field with fishermen's license, for sixty-five stream inspectors and for the fish code are being much discussed and he can have a debate any hour.

Figures on Apples. — Figures issued by the State Department of Agriculture are that the 1916 crop of apples amounted to 16,932,000 bushels and was worth \$11,275,000. It is stated that there are 9,000,000 apple trees in the State and that 2,000,000 barrels of Pennsylvania apples were shipped to New York, many of them for export.

Board Adjourns. — The State Compensation Board adjourned here to-day to meet to-morrow in Pittsburgh. There will be no further sessions before Christmas.

Appointed Justice. — E. E. Conrad was to-day appointed as justice for Waynesboro, Franklin county.

Complaint of Rates. — Complaint was filed to-day by the Bituminous Coal Operators Association of Central Pennsylvania to-day with the Public Service Commission against the rates of the Pennsylvania, Philadelphia, Baltimore and Washington and the West Jersey and Seashore Railroads for hauling coal, claiming that they are discriminatory as compared with other rates.

Gabriel Comes Down. — Ralph Gabriel, the new food inspector, came down from Wilkes-Barre and reported for duty to-day. He succeeds the veteran M. J. Walsh.

## TO PREVENT ABUSE OF CAR RECONSIGNMENT

(Continued From First Page)

industry, would be seriously affected unless exempted. The meeting was attended by representatives of the Interstate Commerce Commission and by G. W. Anderson, United States attorney at Boston, in charge of the government's inquiry into the high cost of living.

The chief topic was a method under which abuse of the reconsignment privilege could be prevented. Information gathered by the railroads and interstate commerce commission officials is said to indicate that speculators in foodstuffs and other necessities, by abuse of the reconsignment privilege, have withdrawn cars from their normal uses for unwarrantably long periods, thus contributing to the car shortage and indirectly to the higher cost of living.

Under existing regulations it is possible for speculators to ship cars to their order, reconsign them upon delivery, to other destinations and continue the practice indefinitely, keeping cars in transit awaiting favorable markets and virtually using the railroads as warehouses instead of carriers. Thousands of cars are said thus to have been made unavailable for legitimate shipments of manufacturers and other producers.

## BROADER SCOPE OF Y. M. C. A. WORK

(Continued From First Page)

of work, to make a public reply to the criticisms published in the Sunday papers directed against the management. The board, it was announced, has recognized the need for action at would widen the scope of the Y. M. C. A.'s field of service and for the months plans have been in the course of evolution, which when completed are expected to result in a re-organization of the association to its old position of influence and activity. Although no official statement would be given to the press relative to the definite solution which the board has in mind, it is understood that an investigation is under way that when completed will make possible such recommendations as will meet with popular support.

It is understood to be the sentiment of the board that in whatever is undertaken, the success of the undertaking will depend largely upon whether the Y. M. C. A. is given the financial and personal support of a sufficient number of citizens to permit of the expansion which is still in the process of crystallization in the minds of the members of the board.

In answer to criticism of the association, Charles A. Kunkel, president of the board of directors, issued the following statement:

"In answer to a recent rather public criticism of the management of the Y. M. C. A., I think it is only fair to say that those that have been most closely identified with the work for a long period of time are thoroughly conscious of the association's shortcomings and of its restricted opportunity for service to the general public. We feel, however, that in view of the limited public support the association has received that we have been doing as much as could reasonably be expected under the circumstances. The service has not in any way approached what we would have been glad to make it if the funds had been available, but we have no source of income other than our membership dues and a few individual contributions and our efforts in behalf of the public must be measured by the public's support.

"We will gladly welcome the cooperation, assistance and support of any man or body of men who care to join us in promoting the interests of a Young Men's Christian Association in this community, but we do not think a fair-minded public can reasonably criticize us for trying to keep

up from the Harrisburg Railways crew of linemen to get the tree loaded on wagons. It ought to be in Harrisburg by this evening."

"It's the biggest tree the city has ever had," chimed in President Howard C. Fry, of the Rotary Club, who was in the party.

"We found it up in Clark's Valley on the tract belonging to David Hoffman. It is a handsome specimen, measuring sixteen inches in diameter across the stump. Mr. Musser has offered to pay all the bills incident to the purchase of the tree, the bringing of it to the city and setting it up in Market Square, as well as its removal. Until he came to the rescue it looked very much as if there would be no Christmas tree."

The Rev. Dr. George E. Hawes, pastor of Market Square Presbyterian Church, will read the Christmas service under the tree at 9.15 Sunday evening. The change from Saturday to Sunday evening has been made at the request of many church people, who thought the program should have the distinctly religious touch which the occasion merits and who believed the crowds attending would be quieter and more orderly on Sunday evening.

The program, which will include selections by the Municipal band and the Moorhead chorus in costume, will be completed at a meeting of those in charge late to-day.

The tree is being brought to town under the supervision of David Cunningham, superintendent of the Zarrman Lumber Company, and will be wired at cost by the Harrisburg Light and Power Company, which will also lend the lamps free and provide the current without cost.
