KENNEDY'S 321 Market Street

FOODS THEY BUILD OR DESTROY

AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

By ALFRED W. McCANN

While Federal Officials Find Tubercular Cows Indescribably Diseased, City Officials Find Them Quite Normal. The Reasons for This Conflict of Official Opinion Must Be Fully Understood by the Public Before the Corruption Which They Reveal Can Be Reformed. Of the sixty-five cows purchased in the Jersey City stock yards for slaughter in Brooklyn, the government officials sent thirty-three to the Swift & Co., federal-inspected establishment at Kearny, N. J., for post-mortem examination. The other thirty-two cows were forwarded to the Brooklyn slaughtering establishments operated by S. & H. Plaut and Robert Plaut & Son. I communicated at once with Dr. S. S. Goldwater, commissioner of health of New York City, informing him that the government officials were unable to hold these thirty-two cows because palpitation did not reveal cervical lesions, although in the belief of Drs. Mullings, Wilson, and Keene of the Bureau of Animal Industry, at least thirty of the thirty-two cows would be found on post-mortem to be diseased. I called his attention to the fact that under the federal law the officials had no power to seize these thirty-two cows, although none of them would be passed in a federal inspected establishment on account of their extreme emaciation and exhaustion. I urged him to follow them to slaughter and make post-mortem examinations of his own for the purpose of obtaining some adequate idea of the kind of animals which corrupt representatives of the New York City Health Department were passing for food purposes. Dr. Goldwater acted upon these and passed for food purposes. I suggestions and undertook an investigation only to find that the slaughterers had mixed the entire lot of thirty-two suspects with another lot of one hundred and seventy cows so that it was impossible to identify the original thirty-two and post-mortem them as one lot. An appeal was then made to the Bureau of Animal Industry for assistance. Dr. Long, in charge of the Brooklyn station, responded to the appeal, but was unable to pick out the thirty-two animals from the pens in which they had been confined with one hundred and seventy others. Nov. 6, 1914, I escorted Dr. E. B. Ackerman, chief veterinarian of the New York City Health Department, and Dr. Carl E. McCombs, of the Bureau of Municipal Research to Kearny, N. J., to witness the post-mortem made by Dr. A. W. Combs of the Bureau of Animal Industry. The post-mortem held upon the 32 cows seized by the government revealed loathsome pathological conditions. The animals were literally consumed with tuberculosis. Every gland of their bodies was diseased. The lungs in many instances consisted of mere patches of tissue sufficient to keep the creatures alive for a short time. The glands of the neck and intestines were rotten. The disease had so eaten into the tissue of some of the cows that the flesh between the ribs and the hide was in a suppurating condition. When the carcasses were eviscerated they discharged pus from tuberculous abscesses of the liver, kidneys, lungs, and even the spleen. All of these animals were condemned and "tanked." They would have been killed in the Brooklyn establishments if not for the fact that the slaughterers have confessed it to be true. Up to the date of their slaughter these same cows were producing milk and butter. Dr. Ackerman confessed that he had never before seen such a sight. He was visibly affected by the fact that the cows had evidently been producing milk to the very day in which they were sold for slaughter. Milk dripped from their udders even on the killing floor. "All during my service in the Brooklyn establishment," he said, "I was constantly approached by insinuating suggestions from strangers who managed to make it clear to me that I could earn three times as much money as the city paid me. My men were pretty severe in condemning stuff at that time and I soon found myself relieved of duty." Notwithstanding such disturbing facts as these the Health Department officials remained unmoved. Other significant revelations followed each other in quick succession, but to no purpose. A. F. Hunt, manager of the Swift establishment at Harrison, N. J., inspired by these incidents, purchased various lots of cows at \$9.25, \$9.15, and \$9.10 a head. His experiment with them, as reported to me in one paragraph, should be quite enough to arouse the entire country to an appreciation of the horrible truth now receiving so little attention. "Heretofore," he said, "these animals have always been killed in un-inspected establishments. At an average cost of \$9 a head we have tried them out for the reason that the hide of every one of them is worth \$5 and the tallow and fertilizer stock \$5 more. Our experience with them, however, has proved so offensive that we have abruptly ended the experiment. Apparently all such cows are grossly diseased and should not be slaughtered in any establishment where meats intended for human food are prepared." Here then are two sets of records. The federal officials found the Jersey end of these transactions to be indescribably bad. The city officials of New York found the Brooklyn end of them to be quite normal. I had spent two years in dragging the truth to this resultless issue. As far as official action was concerned the government ceased to interfere as suddenly as it began, and the New York City Health Department whitewashed the entire affair. The New York Globe published the facts. I went before men's clubs, women's clubs, and organizations of any kind that would give me audience for the purpose of arousing public opinion, but my charges of corruption stood discredited. The people were not alarmed, for surely if things were as black as they were painted the officials would have attended to them long ago. Saddened and discouraged, I continued to cry out against a situation which I was powerless to change. Not until two years later was the truth completely established. At the beginning of 1917 all the facts stand forth in their hideous and dreadful nakedness. But public officials remain as indifferent now as when they first sneered at every reference to the truth. INDICT CONFESSED SLAYER True Bill Found Against Man Who Killed Woman Wilkes-Barre, Pa., Jan. 4.—Charged with murder in the first degree, Thomas (Doughey) Williams, who confessed to murdering Ida May Brown and throwing her body in Carpenter's Creek on November 17 last, was indicted by the Grand Jury here. He will be brought to trial at the next session of Criminal Court. The body of Ida May Brown was found by fishermen. First theories were that she committed suicide. An investigation followed, and Williams, who had pretended to aid detectives in the search for the girl's body, finally broke down and on the night a coroner's inquest was held admitted the crime.

4 INJURED IN BLAST OF SECRET EXPLOSIVE Pittsburgh, Pa., Jan. 5.—A mysterious high explosive, known as lanoline, made from a secret German process, blew to pieces a one-story frame building at the plant of the Holliday Chemical Company, North Side, yesterday. Four men were injured, and at first there were rumors of two other men being missing, but the company officials say they escaped. Fire started and spread to dwellinghouses in the neighborhood, destroying three and damaging four. The property loss is estimated at \$48,500. CHANCE FOR DRY NATION Pittsburgh, Pa., Jan. 5.—The Rev. Charles R. Scanlon, D. D., general secretary of the Board of Temperance of the Presbyterian General Assembly, told the board at its annual meeting yesterday that "there is a fair chance that the prohibition amendment will pass both houses of Congress at this session and then be submitted to the people. There is a good chance that the amendment will receive the endorsement of three-fourths of the States, as twenty-three of them are now dry." Sixty per cent. of the territory of the United States is now prohibitory territory and eighty per cent. 'dry.' AUTO HEAD KILLS HIMSELF Cincinnati, O., Jan. 5.—Frank J. Enger, president of the Enger Motor Car Company, of this city, which was recently organized with a capital stock of \$3,000,000, shot and killed himself while in his office at the motor company's factory. Mr. Enger is said to have been in ill health for months. He was reputed to be one of the wealthiest men in Cincinnati, and was said to have carried more life insurance than any other man in this city. He was fifty-eight years old. FIND SUICIDE DEAD IN SNOW Reading, Pa., Jan. 5.—Lying in the snow with a new revolver and cartridges beside it and a bullet hole in the temple, the body of Howard

Doctor Tells How To Strengthen Eyesight 50 per cent In One Week's Time In Many Instances A Free Prescription You Can Have Filled and Use at Home Philadelphia, Pa. Do you wear glasses? Are you a victim of eye strain or other eye weaknesses? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. Many whose eyes were failing say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now discard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many hopelessly blind might have been saved if they had cared for their eyes in time. Note: Another prominent Physician to whom the above article was submitted, said: "Bon-Opto is a very remarkable remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. The manufacturers guarantee it to strengthen eyesight 50 per cent. in one week's time in many instances or from any amount of money. It can be obtained by mail on hand for regular use in almost every family." It is sold in Harrisburg by H. C. Kennedy, Croll Keller and other druggists.—Advertisement. GETTING READY FOR THE 1917 FAR EASTERN OLYMPIC The tracks for use for the selection of Japanese champions for the next Far Eastern Olympic games have just been completed at the reclaimed grounds of Shibaura. The tracks are quarter-mile, and surrounded by a board fence. The track was made of cinders and red clay six inches deep, and leveled with machines. Inside the tracks are prepared special grounds for jumping and similar games. The grounds have been built for permanent use, and may be used for the Far Eastern Olympic games next May.
