PARALYSIS FATAL TO JUDGE BRUMM

Vigorous Opponent of Ballot Frauds Stricken New Year's Day

Pottsville, Pa., Jan. 12. — Judge Charles N. Brumm, who was stricken with paralysis while visiting friends New Year's Day, died at Minersville last evening. Only the remarkable physical strength and ruggedness for which Judge Brumm was noted enabled him to keep up the struggle this long. He had been unconscious ever since the stroke, although at times he showed indications of understanding conversations directed toward him. For the last 48 hours he was kept alive by the use of oxygen. Judge Brumm served this district fifteen years in Congress, the odd year being part of the term of Congressman George Patterson, who died in the middle of his term. He served in the House with President McKinley, and when the latter was elected President he offered the Schuylkill Congressman the position of United States minister to Belgium. Judge Brumm refused this tender, as he likewise refused the proffer of deputy attorney general, offered him by President Harrison. Judge Brumm was born on June 9, 1838, and when he became a candidate for judge in 1908 it was urged against him that he was too old to be elected to an office with a ten-year tenure. He was nominated by the Republicans, however, and defeated A. W. Schalck, the Democratic nominee. Having several times counted out by ballot frauds, as he believed, Judge Brumm particularly detested this species of crime; and soon after ascending the bench he publicly declared that any one who stuffed a ballot box was guilty of a crime against American sovereignty and should be declared guilty of treason. His suggestion that such culprits should be branded on the forehead with the letter "T" caused much discussion throughout the country. In the crusade against ballot crimes in Schuylkill county which followed his election, twenty-five prominent politicians were sent to jail for long term sentences by Judge Brumm. Four years ago a vain effort was made to impeach him, the Legislature voting unanimously against such a proposition.

The Telephone Cord

Here the green covering of the "cord" that connects your Bell Telephone to the bell-box, has been pulled back.

Three separate "conductors" are disclosed, each with its woven covering of silk and linen and cotton, and inside the tiny wires are plaited together that the whole may be flexible.

The little copper wires are finer—much finer than hair and there are many of them.

Think what must happen when the cord is kinked and snarled into a mass of twists and knots. The little wires rub against each other and, in the end, the transmission becomes "raspy" and "noisy"—the sound, in telephone parlance, of "tryin' turnips" on the line.

You can help to safeguard the high quality of your Bell Service by keeping the cord "kinkless" always.

A STRONG tobacco may have lots of flavor, but you can't smoke as much of it as you want. A mild tobacco often has only its mildness to recommend it. VELVET combines mildness and flavor in such a way you can smoke all you want, and want all you smoke.
