### To Relieve Catarrhal Deafness and Head Noises

Persons suffering from catarrhal deafness and head noises will be glad to know that this distressing affliction can usually be successfully treated at home by an internal medicine that in many instances has effected complete relief after other treatments have failed. Sufferers who could scarcely hear have had their hearing restored to such an extent that the tick of a watch was plainly audible seven or eight inches away from either ear. Therefore if you are deaf or have head noises or a ringing in the ears, you may have the means of saving some poor sufferer perhaps from total deafness. The prescription can be prepared at home and is made as follows:

Secure from your druggist 1oz. Parmin (Double Strength), about 75 cents worth. Take this in home and add to it 1/4 pint of hot water and 4 oz. of granulated sugar; stir until dissolved. Take one tablespoonful four times a day. Parmin is used in this way not only to reduce by tonic action the inflammation and swelling in the Eustachian Tubes, and thus to equalize the air pressure on the drum, but to correct an excess of secretion in the middle ear, and the results it gives are nearly always quick and effective. Every person who has catarrh in any form should give this recipe a trial.

### CAN RECLAIM MUCH BARREN LAND NOW

State Tests Show That It is Feasible; Franklin Makes Good Showing

Estimates that 5,000,000 acres of barren land in Pennsylvania can be reclaimed by reforesting on a systematic basis were made to-day by the State Department of Agriculture after study of reports of the success attained with reforesting tests. About 21,000,000 trees have been set out on 15,000 acres of land, including State lands where favorable and unfavorable conditions were observed.

The oldest reforestation tract, located in Franklin county, and planted in 1902 with white pine, shows 99 per cent of trees living. In other sections from 80 to 90 per cent of trees set out are reported as living and flourishing, while one small tract reports every 500,000 trees growing. Most of the results are declared at the Capitol to compare favorably with reports on German reforestation operations.

The reports for 1916 show that almost 6,000,000 trees, practically all grown in State forestry nurseries, were set out, and one tract took almost 600,000 trees, which will be studied by foresters. This year's operations will be on as great a scale if labor and funds are available when needed, it is stated at the Capitol.

It is said that the barking lizards are only found in the section of the country extending from Medina to Devil river, which is about 20 miles.

### Moves, Forgets Number, Sleeps in City Hall

St. Louis, Mo., Jan. 14.—Mrs. George McGuire moved to East St. Louis from St. Louis a few days ago. She visited here to-day with her three-year-old son, Theodore. When she returned she was unable to find her home, forgetting the number and location.

She walked for hours and, finally, bewildered and exhausted, applied at the East St. Louis police headquarters for aid. She was driven around in the patrol wagon for some time in an effort to locate where she lived, but the trip proved fruitless. She and her son were taken care of by the matron. Her husband works in a packing house.

### TOBACCO CROPS BREAK RECORDS

Kentucky Farmers Get Big Prices For 200,000,000-Pound Yield

Louisville, Ky., Jan. 16.—Kentucky farmers who raise approximately one-third of the tobacco produced in the United States, and about one-tenth of the crop produced in the world, are enjoying the unusual position of marketing for record-breaking prices a crop of almost record-breaking size. In addition to being one of the largest crops ever produced in this State, Kentucky's output this year is of unusual quality. Leaf, stems and trash, as they are called in the terminology of the tobacco trade, are of the finest character. The leaf tobacco is long, clear leaf which comes from the middle of the plant; lugs are the heavy leaves, possibly spotted by the soil which has been splashed on them by rain, which grow at the bottom, while trash is made up of small immature leaf at the top of the plant.

So good has the quality been that farmers are becoming accustomed to receiving proportionately higher prices for the poorer grades than they do for the best. These poorer grades are essential to the production of certain brands of manufactured tobacco and the bidding for them has been keen. Even frosted tobacco, which in former years sold for one or two cents a pound, and was used only for the making of an extract shipped abroad to be used in fortifying certain sorts of foreign tobaccos, are bringing prices farmers would have been glad to obtain for trash of the first grade last year.

Within recent years Kentucky farmers have received an average price for all quantities of white burley, the backbone of the tobacco crop in this State, of about \$10 a hundred pounds. Sales on the various markets this year have been at an average price of \$16 to \$18.50 a hundred pounds. The crop of white burley this year will run well over 200,000,000 pounds. As a result of these conditions millions of pounds of tobacco are being rushed to market by the farmers of the State each week, and it is estimated by tobacco men that farmers have now released a greater portion of their crop than has been out of their hands at this season for many years.

### Baby Flees Fire Via Clothesline

### ACT QUICKLY

Delay Has Been Dangerous in Harrisburg Doan's Kidney Pills are most effective. Plenty of Harrisburg evidence of their worth. Mrs. Geo. Greenour, 2001 Penn street, N. Harrisburg, says: "About two years ago I found it necessary to take a kidney medicine, and as I had heard so much about Doan's Kidney Pills, I got a box at J. Nelson Clark's Drug Store. I used them mainly for my back, which was weak and lame and made it miserable for me, especially when stooping. This one box of Doan's Kidney Pills cured the trouble and it has never returned."
