URGE COUNCIL TO MAKE SURVEY OF ASH COLLECTION

Careful Investigation of Problem Should Be Made, It Is Pointed Out

LABOR ENDORSES PLAN

Higher Wages Must Be Paid if Men Are to Be Procured For Carts Say Leaders

Pressure will be brought to bear or City Council, it was unofficially learned to-day, by the Harrisburg Chamber of Commerce and other organizations to induce the Commissioners to order a "survey" of the city's ash and garbage collection

Time and again it has been pointed out that the ash nuisance will continue to recur in Harrisburg until collections are put under municipal supervision. Dr. J. M. J. Raunick, city health officer, has frequently urged municipal control following the expiration of the present contract with the Pennsylvania Reduction Company. It is generally conceded that this step

It is generally conceded that this step is the only solution and that the quicker it is taken the quicker the problem will be solved.

However, it would be a dangerous move for the city to jump into the ash and garbage collection problem blindly, it is pointed out by city officials and interested citizens. A careful survey of the entire problem is an absolute necessity before any definite moves are made, they insist.

To-day the suggestion was made that the city retain the Municipal Bureau of Research of New York—about to make surveys of the police department and city school finances for the Chamber of Commerce—to make a thorough investigation of the ash and garbage question. Chamber of Commerce officials point out that such a survey is most certainly up to Council and that it should be made as soon as possible. It is generally believed about municipal circles that action on the matter will be taken shortly.

Labor Endorses Plan

Labor Endorses Plan
Labor's Open Forum last evening discussed the ash problem after listening to an educational address on the subject by Dr. Raunick, the city health officer. Dr. Raunick pointed out that labor shortage had much to do with the present tieup. C. F. Quinn, secretary of the State Federation of Labor, declared that just solong as ash and garbage men are paid \$1.50 a day, just so long will there be a shortage of labor.

The Forum endorsed the plan for municipal control of ash and garbage collection, but pointed out that better wages must be paid if men are to be employed.

Mexican Women Renew Rioting and Hurl Missiles at American Soldiers

El Paso, Tex., Jan. 29.—Rioting in Juarez as a result of American quarantine regulations was resumed early to-day. It was a continuation of the demonstration yesterday in which hundreds of women participated.

More men than women engaged in the demonstration to-day. Rioters approaching the middle of the international bridge hurled missiles at United States soldiers on guard. Two noncommissioned officers were injured, one by a flying bottle and the other by a rock

Mexican cavalry ultimately succeeded in driving the demonstrators away from the bridge. Andreas Garcia, inspector general of Carranza consulates, crossed to Juarez to attempt to pacify the mob. There was no street car traffic.

Despite the severity of the weather reported from nearly all the European battle fronts, spirited fighting is taking place in several of the war areas. The most notable recent development is on the northern end of the Rumanian line, where the Russians took the offensive on Saturday and broke through the Austro-German lines on a two-mile front along the railway from Kimpolung to Jacobeni. Efforts have been made by Russians, after heavy artillery fire, to advance farther in this region, but according to to-day's German official statement the Russian forces were unable to make progress.

The Russians are also on the offensive in the Ziota Lipa region, in Galicia, where their campaign for Lem-[Continued on Page 8]

The declaration was drawn forth by reports published within a few days that ships are beginning to arrive in American ports or on this side of the Atlantic armed fore and aft, and that the present plan of the entente appears to be dismounting the forward guns before entering American harbors,

to Stop Escape of Raiders

London, Jan. 29. — Nothing has been officially announced here in regard to the extension of the "danger ous to shipping" zone in the North Sea but the censor has permitted the publication of Scandinavian dispatches referring to the new naval measure. According to telegrams from Copenhaven, Scandinavian traffic with Holland hereafter will be very difficult and the Danish fishing industry will be considerably hampered.

A warning that Great Britain had made a considerable extension to the danger zone in the North Sea was received by the State Department in Washington on Saturday from the American embassy at London. The new line cuts off the entire German North Sea coast and its purpose is presumed to be a bottle up more closely the German warships at Helgoland and lessen the possibility, of the escape of raiders.

of Congatulations

New York, Jan. 29. — Samuel Gompers, president of the American Federation of Labor, received one of the greatest ovations of his career when he arose to speak early to-day at the close of the testimonial dinner attended by more than 1,000 labor leaders from all parts of the country. Mr. Gompers urged organized workmen to think about peace to work for peace and to pray for peace. "Labor stands with its shoulders squared," he said, "not defiant, but determined. The protest against conditions that work hardship must not be diverted for a moment."

The labor leader declared that while he could leave his children not fortune, he would leave better labor conditions under which they would not find it so hard to live as he had found it when he first entered the industrial fields. After every great time of strife and destruction, he said, there was a corresponding reaction which affected the mass of the
