U-Boats to Sink Hospital Ships

erlin, by wireless to Sayville, , Feb. 1.—The Admiralty yes-ty made the following an-cement:

L. I., Feb. I.—The Admiralty yesterday made the following announcement:

"The German Government has convincing evidence in hand that hostile hospital ships frequently are misused for the transportation of ammunition and troops. The government has communicated these proofs to the British and French Governments by diplomatic means. At the same time, it declared that hospital ships passing on the military route of the hostile army engaged in France and Belgium, within the lines Flamborough Head-Terschelling on the one hand, and the Quessant-Land's End on the other, shall no more be treated as such. "Hostile powers are free to use hospital ships for the transportation of wounded and sick army members on ways outside this district. The barring of other sea routes is reserved, in case of further misuse of hospital ships in violating of international law."

The text of the central powers' communication was made known in an official announcement by the foreign office.

RUTHLESS WAR PLAN IS NOW IN EFFECT

Germany, in a note on President Wilson's recent speech in the Senate, yesterday served notice on the United States that because of the failure to open peace negotiations with the Allies, it would open unrestricted warfare on the seas After saying in the note that all her peace overtures had

een rejected, Germany says: The Imperial Government, therefore is forced to do away with all restrictions, which until now it has pressed upon the use of its fighting means on the sea.'

The note says it is hoped the American Government will warn American ships against entering barred zones around England, France, Italy and in the Mediterranean, and also wil warn Americans against traveling on ships to ports in the forbidden zones.

The decision of the German Government on the unrestricted naval warfare will take effect to-day.

An official statement issued by the German Government announces, that neutral ships plying within the new barred zones will do so at their own risk. Precautions will be taken to protect neutral ships which sailed for those zones before February 1.

American intervention in the war is regarded now in Washington as inevitable.
