Copper Is Making More Millionaires Than Steel

The interests behind the United Magma Mines are practically the same as those of the Miami Merger. The latter stock was offered about two months ago at 25c, and since sold up to \$2.50. The United Magma has an excellent chance of duplicating or surpassing this market record. The property bears the same relation to the Magma Copper Co. property as the United Verde Extension to the Verde. United Verde Extension sold at 35c a few years ago; it is now quoted about \$38.

The advance in Copper shares has enriched thou-sands of large and small investors, who have profited by increased dividends and rapid advance in share values. Some stocks that started at 50c are now sell-ing at \$25 and above. A good Copper mine can pro-duce raw Copper at about 9c per lb. You can figure for yourself the immense possibilities with the metal selling around 50c.

The Great Magma Mine

The critical Wagma Mine The development of this mine at 1,500 feet, follow-ing an original fissure of high-grade ore, widened until it is now about 35 feet, has resulted in a record production. When this news was made public, Magma jumped from \$17 to \$54 per share in two days. It has since sold at \$69. Production increased from 1,364,000 lbs, in 1913 to over 7,000,000 in 1916 at an average cost of about 7c per lb. It joins the United Magma.

Past Records Can Be Surpassed

This great opportunity for investment at present is in the purchase of low-priced Copper Stocks. Big producing Copper mines are not made in a day or a month, but the investor far-sighted enough to have a vision of ultimate production on a large scale and contented to wait a reasonable time should expect to reap profits of the most substantial character.

United Magma, A Neighbor and Possible Rival to Magma

It is the intention to develop the United Magma along scientific lines as soon as the financing is completed. Its location of 34 claims (about 600 acres) adjoining and abutting the Magma Copper Co. and in close prox-imity to that great mine—the Silver King—makes it a possible rival to Magma and judging from surface indications is worth a king's ransom. The chances of opening up gigantic ore bodies in the United Magma Mines property are excellent and the possibilities of huge profits are almost beyond comprehension and fig-ures almost impossible for the human mind to grasp.

Buy United Magma Mines Shares at 50c NOW

The officers of the United Magma Mines Co. are among the foremost practical mining men of Arizona. You have an opportunity to join them and share in all the profits from the ground floor up.
