LABOR DEMANDS RIGHT TO STRIKE

Labor Leaders Protest Against Forced Arbitration Ruled by Supreme Court

Washington, March 22.—President Gompers and Secretary Morrison, of the American Federation of Labor, presented to Attorney General Gregory today a protest against the declaration of the Supreme Court in the Adamson law decision that the right of railroad employes to strike is limited by the public interest.

The labor leaders declared the court had gone out of its way to inject this "reactionary" assertion into its opinion. Later the following statement was given out with the approval of Mr. Gompers at federation headquarters:

The president and secretary of the American Federation of Labor, Samuel Gompers and Frank Morrison, today presented to Attorney General Gregory in his office a protest in the name of the workers of this country against the opinion rendered by the United States Supreme Court in going out of its way upon matters not before the court and dragging in compulsory arbitration.

The Supreme Court, by interpolating into the law and argument before it for consideration a foreign matter, namely, denial to workers of the right to quit work in furtherance of their just and necessary rights, pointed out the way to those who wish to tie workers to their work in order to protect the supposed convenience of the public.

Mr. Gompers called attention to the splendid, progressive fundamental declaration in both Mexico and Russia, countries which are passing through a period of danger and national stress, assuring to the workers of those countries the "right to strike."

The opinion of the United States Supreme Court in connection with the Adamson law decision belongs to the old reactionary despotism of Russia, and Mexico, and is out of harmony with the free institutions of this republic.

In rendering its decision on the constitutionality of the Adamson law on Monday the Supreme Court said:

As to the employe, here again it is obvious that what we have previously said is applicable and decisive, since whatever would be the right of an employe engaged in a private business to demand such wages as he desires to leave the employment if he does not get them and by concert of action to agree with others to leave upon the same condition, such rights are necessarily subject to limitation when employment is accepted in a business charged with a public interest and as to which the power to regulate commerce possessed by Congress applied and the resulting right to fix in a case of disagreement and dispute a standard of wages as we have seen necessarily obtained.

In other words, considering comprehensively the situation of the employe and the employe in the light of the obligations arising from the public interest and of the work in which they are engaged and the degree of regulation which may be lawfully exerted by Congress as to that business, it must follow that the exercise of the lawful governmental right is controlling.

Stock Distribution Plan Proves Very Successful

Akron, Ohio, March 22.—Books just closed on stock distribution plan of the Firestone Tire and Rubber Company justifies Babson's prophecy of success of this new industrial move. Over eleven thousand employes, or ninety per cent, purchased on the liberal plan whereby the humblest worker was offered equal allotment with executives, with minimum payments of fifty cents weekly arranged. Stock sold to employes below the current quotations gives them the benefit of good work in the past as well as future benefits. Every stockholder has all the privileges the term implies. Economists consulted by President H. S. Firestone, author of the plan, state it marks a distinct advance in the solution of industrial relations, going beyond profit-sharing or bonus ideas. The size and standing of the Firestone company gives added significance.
