Locust Grove Inhabitants Well Taken Care of by Local Steel Plant

How well the southern colored men ployed by the Steelton plant of the Bethlehem Steel Company were taken care of during the winter months is shown by reports from Locust Grove, where they are housed, that there has been but little sickness. Only a few have been ill with pneumonia and these were not serious cases. Locust Grove is reputed to be the finest camp of any corporation.

Associated Press dispatches this morning told that 2,000 aeroplanes are being rushed to completion for the war department at Washinngton; and that the war department will recruit the flying branch of the service to 4,000 aviators. This means, of course, that in addition to the aviators themselves there will be assistants and hangar helpers of various classes, from whom in the event of hostilities the ranks of aviators will be repleted. Already plans are being shaped for a giant school for army fliers, in which, according to dispatches, American aviators now serving in the Allied armies in Europe will be the instructors. Word from the French battlegrounds is to the effect that the American fliers will return home immediately when war comes and will be found in the American army.

That the United States fliers will include many Harrisburgers is certain.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the tomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach.

putting more food into the stomach.

Men and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty oreath, others who are bothered with headaches, billous spells, acid stomach or constipation should begin this phosphated hot water drinking and ere assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin porce do not absorb impurities into the blood, while the bowel pores do,
