Remove Those Hairs Roots and All (Absolutely New Method)

The new way to remove disgusting growths of superfluous hair, roots and all, will astonish and delight you. You never saw or heard of anything like it before. It is not a electrolytic and not electrical. You simply get a stick of phelactine from your druggist and follow the simple directions at home. In a few seconds you have removed the offending hairs, roots and all. With your own eyes you see the roots come right out. Phelactine is absolutely harmless, non-poisonous and perfectly odorless. Satisfaction guaranteed or money refunded.

CAMPHOROLE—AT ONCE RELIEVES PAIN

It Soothes and Loosens Up Those Stiff, Rheumatic Joints, Reduces Inflammation and Drives Out Pain

Don't suffer with Lumbago, Rheumatism, Neuritis, Pleurisy, Neuralgia and Congestion. Here is the quickest and surest relief. Pain is an easy thing to stop. Get a jar of Camphorole from the nearest drug store, and while you are applying Camphorole you will wonder where the pain has gone. The remarkable success of Camphorole is entirely due to Wintergreen, Menthol and Camphor, prepared in a synthetic way to give results. It is well known that the medical profession and medical papers testify to their great curative properties. At all drug stores, 25c and 50c jars. Dr. Brigadell, Manufacturer, Atlantic City, N. J.

THE MAGIC FLUID

Few drops and corns or calluses loosen and lift off with fingers. No pain!

The world owes thanks to the genius in Cincinnati who discovered the new ether drug.

Tiny bottles of the magic fluid can now be had at any drug store for a few cents. You simply apply a few drops of this freestone upon a tender, itching corn or a hardened callus. Instantly the soreness disappears and shortly you will find the corn or callus so loose and shriveled that you lift it off with the fingers. Not a bit of pain or soreness is felt when applying freestone or afterwards. It doesn't even irritate the skin or flesh.

NEWS OF STEELTON

NEED FIFTY RED CROSS WORKERS

With Large Membership in Local Society Only Small Percentage Are Active

WANTED—Fifty Steelton women to volunteer to assist in sewing Red Cross materials for Steelton Red Cross Society in Trinity parish house each Friday afternoon.

Yesterday afternoon only twenty-five women assisted in the weekly work of the society. This is less than one-half the number of helpers offered by the society would like to have.

Efforts are being made by a committee to devise ways and means to arouse more interest in the Friday afternoon work. For the first few weeks the society was organized nearly fifty women turned out to sew but yesterday's number was very small out of the ordinary officers declared to-day.

SUBMARINES GET SUPPLIES IN SPAIN

Government Unearths Plot to Keep U-Boats in Operation

By Associated Press Madrid, March 24.—An elaborate organization, by which a far-flung cordon of German submarines, stretching around the Spanish and Portuguese coasts, has been maintained in provisions and supplies, has been unearthed by the Spanish authorities.

A rigid censorship has been established, but it is known that at least four men have been arrested, one of whom was supposed to have been an American, but later proved to be a German.

It was reported that other suspects sailed from the United States, but this was later shown to be due to the fact that they had used aliases and had found American names to be the most useful.

A most ingenious method was used in getting the supplies and provisions to the submarines, but later proved to be run from Madrid to certain coast points, in order to avoid using the regular train service.

At designated points floating depots were established beyond the limits of Spanish waters. These depots consisted of a series of small stout wooden floats, about the size of a fisherman's dory.

Each float formed a good sized receptacle, securely built to protect the contents against the water. Under cover of night small boats loaded with these depots with provisions of various kinds, grease and fuel oil and any other articles required by the submarines.

A coast guard patrol boat discovered one of these depots as a number of men were busy restocking it from some of the small sailing craft used by the coast fishermen.

The coast guards and captured several prisoners as well as a large quantity of supplies and considerable correspondence. Later investigation showed that one or more members of the coast guard itself was implicated.

Driving Ease a Feature of the Cadillac Eight

Having provided the extreme of smoothness and flexibility in our eight-cylinder engine, Cadillac engineers have gone equally far in other directions which contribute to easy handling and control of the car.

The Cadillac eight-cylinder engine largely disposes of the necessity for gear shifting. It has been overhauled that a man will often drive a hundred or two hundred miles a day, and that ordinarily the effort of keeping a

car in the road is considerable. The Cadillac Eight is noted for the ease with which it steers. A gentle influence on the steering wheel is sufficient to guide it, and it keeps the road without material effort on the driver's part.

The brakes are manipulated scores of times without muscle-strain or fatigue. Hardly more than a gentle pressure of the foot is required to put them "on," either lightly or firmly, as the occasion demands. And the same ease applies to the operation of the clutch.

Especially on a long drive are such features appreciated by men who like their touring as well behind the wheel of a car as in a tonneau seat.

ABDICATION OF KAISER IS NEXT

Burdens of War Hang Heavy on Emperor Says Former Official

Paris, March 24.—The abdication of the German emperor is forecast by the former German magistrate who wrote the celebrated book "J'Accuse," in an interview published in Oeuvre. He says:

"The Kaiser is obsessed by the thought that he is responsible for the war, a thought which poisons his whole existence. He feels that he is menaced by three enemies at home, without counting those abroad: First is the crown prince, the real author of the war; second is the Junker pan-Germanist; you cannot imagine the smoldering hatred of the emperor for those whom he believes to be the maniacs who are driving him into an abyss; third are the people, not the Socialist party, but the people who are starving and who, he feels, are growing in number and rising little by little against those who organize the war.

Majority Against Kaiser The other day at the meeting of the parliamentary presidents and the ministers of the federal sovereigns, at which the submarine war was decided upon, the struggle between the Kaiser's party and that of Von Tirpitz was most bitter. The majority against the emperor was so great, however, that he was obliged to submit and pretend that he was convinced. In particular he was personally opposed to a break with President Wilson, but he was forced to consent. Documents will be published one day which will prove that secretly he did everything not to bring America down upon him and that he considers that the rupture was an irreparable mistake.

The failure of the submarine war will soon show that he was right, but it will be too late. If the Allies solemnly declared, as they did with Napoleon in 1815, that they would refuse to treat for peace with the Hohenzollerns, it will be a knockout blow. Our German people, who still believe in him, would abandon him, for peace at any price will soon be the unanimous and hidden thought of tortured Germany.

"What resource is left to him but a dramatic abdication in order to retain the sympathies of the German people and save the political future of Prussia."

The town has been free from inebriates since Constable Shaul made the announcement that the new lockup would be named after the first prisoner.

Residents of West Fairview are much excited over the matter to-day, as many were of the opinion that the new lockup would bear the name of one of their citizens.

KAISER ACCUSED OF STARTING WAR

Reichstag Deputy Denounces Ruler and Imperial Chancellor

London, March 24.—The German emperor and Chancellor von Bethmann-Hollweg were denounced in the Reichstag by the Socialist deputy Kunert as the originators of the war, according to a Berlin dispatch to Reuters by way of Amsterdam. The incident occurred Thursday during a debate on the public health estimates.

Vice-Chancellor Helfferich, referring to Herr Kunert's remark, declared that a German who spoke in the same breath of Russian and German conditions insulted his fatherland. The Socialist deputy retorted amid Socialist applause:

"Because I compared German reactionaries with Russian revolutionists you say I insulted the fatherland. I should be proud if such progress were made in our country as has been made in the Russian empire."

Socialist Deputy Hoch, criticizing the statistics of the president of the board of health, declared that they did not allow the formation of a conclusive judgment and that the president should not have painted such a rosy picture of the health of the population when "underfeeding is almost terrible and bound to affect the public health."

Another Socialist stated that in many establishments workmen had collapsed from hunger.

COL. ZINN GIVES PRACTICAL TALK

Prominent Commander of Regiment of Engineers Addresses Association

Members of the Harrisburg Military Association, an organization formed for the purpose of training its men for the service as second lieutenants in the event of a call, were given a very instructive and practical talk at the University Club last evening by Colonel George A. Zinn, Second Regiment of Engineers of the United States Army, now at El Paso, Texas.

Colonel Zinn, who is an expert on river and harbor work, has until recently been in charge of work on the Delaware river. He has been home for a short time, but returned to his regiment at El Paso, where he was ordered during the Mexican trouble.

Colonel Zinn discussed in general the theoretical and practical training through which every man must go before being fitted to command. He dwelt on the necessity of knowing how to take care of the men under one's command, how to maintain esprit de corps, and gave many valuable suggestions from the experience of an army man who graduated at the head of his class at West Point for the instruction of the embryonic officers.

After the meeting all the men who had been in Plattsburg in the last three years formed themselves into a committee on recruiting for the 1917 Plattsburg camp. It is understood that plans for the camps are going forward irrespective of the likelihood of mobilization and it is the purpose of the committee to double or triple Harrisburg's quota, if possible, this year.

The committee includes Coyne Kennedy, Jackson Herr Boyd, Ehrman B. Mitchell, E. Hackett, T. J. Gould, Fred B. Dapp, John M. Smith and E. J. Stackpole, Jr., chairman.

SCHOOL NOTES

CENTRAL The class pictures will be taken in the following order, in front of the building: Seniors, Monday at noon; Juniors, Monday at 1 o'clock; Sophomores, Wednesday at noon; Freshmen, Wednesday at 1 o'clock. Each student in any of the class pictures will be assessed ten cents. It is desired that each class will have practically a perfect attendance at these times.

The Senior class election resulted in Harold Eckert being elected as president, Louis Johnson assuming the duties of secretary.

Pinafore cast rehearsals will take place Monday and Tuesday evenings in chapel, at 7:30, with Prof. H. G. Dibble directing.

The challenge from a debating team representing York High School received by the Philonian Debating Society of Central has been accepted, the debate to take place in York during the latter part of May. The local team will consist of Harold Eckert, Marlin Geiger, Paul Selsam, and Louis Goldstein.

AMERICA'S MILITARY HOPE

There is not the slightest question that, given time, we could raise and equip a larger army than any of the nations engaged in the European war, excepting, perhaps, Russia. The census shows that there are 20,000,000 men in the United States of military age, from 18 to 45. If we take the military age as from 18 to 32, we have nearly 10,000,000, and if from 18 to 22, nearly 5,000,000. Moreover, about 1,000,000 young men reach military age here every year. Thus, if we went into the business of raising armies, we should have no difficulty in getting our huge manufacturing plants, should we lack equipment.—The World's Work for March.
