The Way It Is Cut

On this depends to a considerable degree the fire, light, snap and brilliance of a diamond. The stone not cut with geometrical accuracy, although perfect in quality, lacks in brilliance.

A Diener diamond is a perfect-cut stone. It is also one free from flaws and of excellent color. We buy direct of importers and mount the stones in our shop. Exceptionally fine values are offered in rings priced from \$25 to \$425. Ask about our three easy plans for buying a diamond.
