In The Use Of Lumber

It is too often supposed that all kinds of wood will give equal service under all conditions. This is not true. The poorest of oak, for example, makes a better furniture than the best of ash. But the best of oak makes a poorer axe handle than the poorest hickory.

We have lumber that is excellent for indoor use, but it would be very foolish to use it where exposed to the weather. Consult us before you place your order. Our knowledge of the proper uses of lumber will enable you to make a better selection.

Your Excellency will understand that although we regret the breach of diplomatic relations between Bolivia and the German Empire such relations have become insupportable under existing circumstances. In consequence your Excellency will find herewith passports for yourself and the members of your legation." The note declares that German subjects and property will enjoy all liberties guaranteed by law providing that they do not commit any act of delinquency, either collectively or as individuals.

First to Back U. S. Bolivia was the first South American state to announce its support of the United States in protesting against the German submarine blockade. In a note to the German Government under date of February 8 the Bolivian Government denounced the German blockade proclamation as an infringement of the "inimpressible rights of civilization and humanity," and declared that it "consolidated its attitude with that of the United States Government." The Bolivian press unanimously supported the position of the government.

Kaiser Conspired Against United States in 1898

By Associated Press. Washington, April 14.—Interesting diplomatic information not heretofore made public was disclosed in Entente circles yesterday concerning the friendship which Arthur J. Balfour, the British foreign Secretary and head of the British commission bears to the United States. At the outbreak of the Spanish American war in 1898 the German Emperor sought to form a coalition of European Governments to exert pressure on Spain's behalf against the United States. Mr. Balfour, then in the British Foreign Office, opposed the idea so vigorously that it died prematurely and the Kaiser's scheme came to naught.

Superfluous Hair Now Removed Roots and All!

A boon to women troubled with superfluous hair is the new electrolytic process. It is totally unlike the electrolytic, electrical and other methods heretofore employed for the removal of hairy growths. It is the only thing that enables one to remove the hair completely from the roots, in one's own home, without the assistance of an expert. The result cannot be doubted, for the user sees the hair-roots with her own eyes. A stick of pelachene, with easy directions, can be had at any drug-store. It is safe, harmless, and a child could safely eat it, odorless and non-irritating. Always sold under a money-back guarantee. It is an instantaneous method, and so thorough that the skin is left perfectly smooth and hairless. There is the least evidence of its former disfigurement.

GERMANS FAIL IN FIELD FIGHTING

British Outwit Teutons in Drives Through the Open. From a Staff Correspondent of the Associated Press. — British Headquarters in France, via London, April 14. — It is not without difficulty that one comes to a realization that semi-open warfare has replaced the old deep trench fighting on the greater part of the British front. It is difficult even for the fighting men actually to grasp the situation, a situation for which they have waited so long. The Germans possibly feel the change more than any one else for above all things they love their underground comforts. The Germans were the first trench fighters to dig and they are reluctantly giving up that style of warfare.
