By Associated Press

Scranton, Pa., April 19.—Actions were started in the United States court here by District Attorney Bur-nett of the Middle Pennsylvania district to recover a total of \$71,500 fines from the Philadelphia and Reading railroad and the same from the West-

rannoad and the same from the West-ern Maryland rail, ad. Against the former railroad there are seventeen counts totalling \$8,500 and the joint action against the two companies is for \$63,500 on 126 counts. The actions are for liolations of the federal law against employing train-men more than sixteen hours a day and are brought by the Interstate Commerce Commission.

SHOOT RUNAWAY HORSE

A horse belonging to J. E. Rhoads was so badly injured in a runaway after it had collided with a plate glass window that it had to be shot by Motorcycle Officer George Fetrow. George Johnston the driver of the team, was not with the horse when it became frightened at Broad and Wallace streets. Several unsuccessful efforts were made to stop the team before it plunged into the window of Harrison's Bakery, 625 Herr street.

RETURNS TO IOWA

G. Samuel Stites, a former resident of this city, now residing in Grinnell, lowa, has returned home after visiting his mother, Mrs. Harry Stites, of \$25 North Sixth street, who has been seri-ously ill for three months. Mrs. Stites ously ill for three months. Mrs. Stites is slowly improving in health.

GIRLS! LOTS OF

25 cent bottle of "Danderine" makes hair thick, glossy and wavy.

Removes all dandruff, stops itching scalp and falling

To be possessed of a head of heavy, beautiful hair; soft, lustrous, fluffy wavy and free from dandruff, is merely

a matter of using a little Danderine. It is easy and inexpensive to have nice, soft hair and lots of it. Just get a 25-cent bottle of Knowlton's Dan-derine now—all drug stores recom-mend it—apply a little as directed and within ten minutes there will be an appearance of abundance, freshness, fluffiness and an incomparable gloss and luster, and try as you will you can not find a trace of dandruff or fall-ing hair; but your real surprise will be after about two weeks' use, when you will see new hair-fine and downy at first--yes-but really new hair-sprouting out all over your scalp--Danderine is, we believe, the only sure

Danderine is, we believe, the only sure hair grower, destroyer of dandrurf and cure for itchy scalp and never falls to stop falling hair at once.

If you want to prove how pretty and soft your hair really its, moisten a cloth with a little Danderine and carefully draw it through your hair—taking one small strand at a time. Your hair will be soft, glossy and beautiful in just a few moments—a delightful surprise awaits everyone who tries this.

PUT STOMACH IN

Says Indigestion Results From An Excess of Hydrochloric Acid

Undigested food delayed in the stomach decays, or rather, ferments the same as food left in the open air, says a noted authority. He also tells us that Indigestion is caused by Hyper-acidity, meaning, there is an excess of hydrochloric acid in the stomach which prevents complete dispestion and starts food fermentation. Thus everything eaten sours in the stomach much like garbage sours in a can, forming acrid fluids and gases which inflate the stomach like a toy balloon. Then we feel a heavy, lumpy misery in the chest, we belong gas, we eructate sour food or have heartburn, flatulence, water-brash crauses.

heartburn, flatulence, water-brash cr nausea.

He tells us to lay aside all digestive aids and instead, get from any pharmacy four ounces of Jad Salts and take a tablespoonful in a glass of water before breakfast and driuk while it is effervescing and furthermore, to continue this for a week. While relief follows the first dose, it is important to neutralize the acidity, remove the gas-making mass, start the liver, stimulate the kidneys and thus promote a free flow of pure digestive juices.

Jads Salts is inexpensive and is made from the acid of grapes and lemon juice, combined with lithia and sodium phosphate. This harmless salt is used by thousands of people for stomach trouble with excellent recults.

FOODS THEY BUILD OR DESTROY DESTROY

AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT (Copyright, 1916, by Alfred W. McCann.) By ALFRED W. McCANN

THURSDAY EVENING.

The thing we call food shortage is in reality food waste—our corn waste alone, of which, through denatured milling processes, we reject nearly 50,000,000 bushels annually, would give, if conserved, more than three pounds of whole corn bread every week to every man, woman and child in the United States.

There is no need to develop hyssteria over the food shortage situation. Even though the Department of Agriculture does show us that we are facing a serious deficit in wheat, corn, oats, and barley, and that owing to the extra demands of Europe upon us for these very foods the outlook is exceedingly gloomy. I propose to show that by adjusting our needs to our supply we can not only go on exporting, without incurring the risk of hunger at home, but wecan actually part with-much more food than any of our statistics seem to make possible and still leave an abundance for home consumption.

The crop reporting board of the Bureau of Crop Estimates, Washington, reports that we had less corn March 1, 1917, on our farms by 327, 143,000 bushels than we had March 1, 1916. But, wearereasonably sure of producing in the United States during 1917 2,500,000,000 bushels of corn.

We have not produced less than

of producing in the United States during 1917 2,500,000,000 bushels of corn.

We have not produced less than this quantity in any one year since 1907. In 1915 we produced more than 3,000,000,000 bushels. It is hardly probable that we will now fall below the lowest record of fen years. Ordinarily we export about 100,000,000 bushels of corn annually. Even though in 1917 we should be called upon to export 500,000,000 bushels we would still have for our own use 2,000,000,000 bushels.

Of this amount every year 50,000,000 bushels are converted into glucose and laundry starch. The glucose is used for numberless technical purposes, including the manufacture of pastes, sizes, blacking, printers' rollers, shoe polish, silvering glass for mirrors, liquid soaps, hair tonics, sponges and in the tanning of leather, the roasting of coffee, the polishing of rice, and the production of logwood.

Enormous quantities of corn are employed in the production of dextrines, used in the textile industries; for strengthening the fibre and finishing the fabrics of cloth, carpets, and twine: for the thickening of colors for calico and other printing; for leather dressings: for guns and glues; for ink, mucilages, and adhesives.

Corn oil and paragol are used in

glues; for ink, mucilages, and adhesives.

Corn oil and paragol are used in the manufacture of soap powders, oilcloth, rubber substitutes, insulating material, etc.

Surely, if necessary, we can do without laundry lump starch, corn soap and lollypops, in order to add to our food supply the 50,000,000 bushels of corn which annually go into the production of these luxuries. In the production of these luxuries, in the production of grain alcohol, whiskey, and beer from corn grits and glucose another batch of 50,000,000 bushels of corn can besaved for food purposes, thus yielding from these two sources alone 100,000,000 bushels of sixty pounds each.

In the manufacture of degerminated cornmeal, which, with the exception of a small quantity of whole cornmeal, produced by Knox Crutchfield, Richmond, Va., and the Great

NITROGEN FOR FARM CROPS

NITROGEN FOR FARM CROPS
Fertilizer experiments at the Pennsylvania State College indicate that in a four-field rotation, in which clover occurs once every four years, there is little need of commercial nitrogen on our limestone soils for corn, oats or wheat. Where manure is available for corn, phosphoric acid at the rate of 200 pounds per acre is the only commercial product needed for this crop. Ordinarily oats will require no ferti-

mercial product needed for this crop.
Ordinarily oats will require no fertilizer. Ten to fifteen pounds of nitrogen along with phosphoric acid and potash, may prove beneficial to wheat, especially when grass is seeded with it. If the grass is to remain for two years the nitrogenous fertilizer, preferably as nitrate of soda, may be applied with profitable :esuits early in the spring just as the grass begins to start.

The fertilizer recommended for such a dressing consists of 159 pounds of nitrate of soda and 150 pounds of soil

The Tertilizer recommended for such a dressing consists of 150 pounds of nitrate of soda and 150 pounds of acid phosphate per acre. When potash is at normal prices, the mixture should be supplemented with about fifty pounds of muriate of potash.

President Judge of Blair

County Courts Marries

By Associated Press
Hollidaysburg, Pa., April 19.—
Thomas J. Baldridge, president judge of the Blair county courts, and Miss Anna P. Dean, daughter of the late John Dean, an associate justice of the State Supreme Court, were married at the home of the bride's mother, Margaret Dean, vesterday. The Rev. Rutledge T. Wilbank, of Chicago, was the officiating clergyman.

MAKE 60,000,000,000 LOAN
Amsterdam, April 19.—A Berlin dispatch gives the amount of subscriptions to reports thus far received, as 12. To 100,000,000 marks, exclusive of conversions of older war loans. Some subscriptions are still to come from small subscribers and from troops at the front. The total for all war loan exceeds 60,000,000,000 marks.

The amount of the preceding generation of the front of the preceding as 10,698,994,990 marks.

"Come on Over, See My Corn Fall Off"!

"I Put 2 Drops of 'Gets-It' on Last Night—Now Watch—"
"See—all you have to do is to use your two fingers and lift the corn right off. That's the way "Gets-It' always works. You just put on about 2 drops. Then the corn not only shrivels, but loosens from the toe, without affecting the surrounding fiesh in the least. Why, it's almost a pleasure to have corns and in NITROGEN FOR FARM CROPS Fertilizer experiments station or the incubator router. A farm laying flock should be composed of one-half pullets and one-half yearling hens. Thus a flock of 300 hens would require the addition of 150 pullets each year. On an average not more than one pullet is obtained from five eggs to secure 150 pullets. Allowing fifteen eggs to a hen, fifty hens would be required to set 750 eggs. Caring for fifty sitting hens is somewhat of a task. It would seem that two or three incubators would be less trouble than fifty hens.

POSTOFFICE TO CLOSE
On Saturday, April 21, 1917, the main postoffice will be closed from 1.30 p. m. to 6 p. m. and Hill and Maclay stations will be closed from 1 p. mfl to 6 p. m. Carriers will make the 7 a. m. and 10.50 a. m. deliveries and collections and the regular night to the following the

Some Men Cannot Stick to Facts

We have a name for them which is far from complimentary, but we are apt to be far more lenient toward those newspapers which serve the news with a naive disregard for the verities.

However, it takes all kinds of people to make a world, and all kinds of newspapers to please them, but the solid, substantial, "worth-while" people of Philadelphia and vicinity buy The Record because it is "Always Reliable." That slogan, by the way, is not an idle phrase, for the policy of The Record as a newspaper is expressed in those two words.

"Always Reliable"—a newspaper that does not indulge in flights of fancy nor jump at conclusions, but sticks to the facts and serves them carefully, correctly and readably.

"Always Reliable"—a newspaper that you can safely allow your boys and girls to read, for the lewd, the suggestive, the scandal mongering are not there. It is clean, sane, complete and most thoroughly a newspaper.

"Always Reliable"—a vital point to remember when it comes to Woman's Pages. The Record was the first newspaper in this country to publish a daily page devoted entirely to feminine interests, and so far, no other newspaper has succeeded in equalling it from a practical standpoint.

These are just three points out of many that will appeal to those who prefer facts to fiction.
