APPOINTED BY STATE COLLEGE

State College, Pa., May 4.—Spurred
by the universal demand for maximum farm crops production, seven
more counties of this State have orzanized farm bureaus and have had
assigned to 'them agricultural experts from the Pennsylvania State
College. R. L. Watts, dean of the
school of agriculture, to-day announced the following appointments
as county agents: Dauphin County
—H. G. Niesley; Cumberland county,
Paul L. Edinger; Lebanon county, A.
C. Berger; Clinton county, M. H.
Keeney; York county, G. G. Weber;
Adams county, H. F. Hershey, and
Centre county, R. H. Olmstead.

#### **Spring Time** Is Tonic Time

Why Do We Need a Vitalizing Tonic in the Spring?

The Right Tonic at the Right Time

Puts You in Fine Fettle

Increases Your Pep With Cadomene Tablets

Tablets

Why a tonic in the Spring? Nature never intended that man should pass his time in over-heated dwellings and office buildings, nor take his exercise in poorly rentilated street cars and swift moving automobiles. But mankind does just such things all through the winter season, the consequences being that the flesh, the nerves and the spirit are in a poison-ed lethafy, giving rise to a sluggish feeling, with rheumatic or neuralgipains, faintness, loss of energy and appetite, and a feeling of being tired all the time. This is the reason for a tonic because they have dissipated and depleted the nervous system, by ever indulgence in eating, drinking and difference in eating, drinking and ther pastimes.

Herb Extracts in Tablet Called "Sulpherb Tablets."

Herb Extracts in Tablet Called "Sulpherb Tablets."

The wisdom of ages placed in a depetited the nervous system, by evinduitgence in eating, drinking dither pastimes.

If either case, serious illness may perfect the breather of the had opportunity to recuper for had opportunity to recuper through the amazing benefits of the amircle working tonic, as domene Tablets. Mankind never for had opportunity to recuper through the amazing benefits of the amircle working tonic, as domene Tablets. BELL 1991-2356 UNITED

Trustees of Atlanta

Offer Buildings to U. S.

The trustees of Atlanta University have, through Edward T. Ware, offered to place the university buildings and grounds, in case of need, at the disposal of the United States government, hoping that they can in some way be used to prevent upon warfare, especially as they may affect the negro people.

The grounds are already under skilful cultivation, making a valuable demonstration of the possibilities of intensive gardening. The buildings, high in location and removed from the dust and noise of the city, are well adapted to hospital purposes, and will be for four months (June-September) otherwise unoccupied.

SURVIVORS OF FAMOUS 127th REGIMENT PA. VOLUNTEERS STAND "AT ATTENTION" WHILE PICTURE IS TAKEN

Fifty-five of the fast fading ranks of the famous 127th Regiment, Pennsylvania Infantry, stood at atten-for the HARRISBURG TELEGRAPH photographer yesterday afternoon in front of the Harrisburg b. They didn't stand long, however. They were on their way double quick time, to the dining room ere a banquet had been prepared for them. They convened in business meeting earlier in the day and oved the recounting of the stirring times of '61, and elected officers for the ensuing year.

### PRESIDENT WANTS FULL CONTROL OF FOOD PRODUCTS

, way as to eliminate market mani-

of the executive tranches of the government hold the same view, believing that with such effective weapons in their possession they will encounter no difficulty in lining up on the side of the public interest without legal action all recalcitrant private agencies.

The bill is supplemental to the administration food measure introduced in the House earlier in the week, providing for a survey of the country's good resources and conferring

providing for a survey of the country's good resources and conferring certain powers to prevent food speculation. This measure was ordered favorably reported from the agriculture committee to-day, after the committee had reduced the appropriation carried from \$25,000,000 to approximately \$20,000,000, and had eliminated a section authorizing the secretary of agriculture to order the immediate sale of any food in such condition that unless promptly disposed of it will become unfit for use. The section will' be incorporated in a coming third measure which is to confer broad powers on the Council of National Defense.

#### Circus Has Good Home When Winter Blasts Come

What becomes of the circus when the cold winds blow and the snow piles high on the old show lot? It is the circus fan that asks the question and the circus fan is a very considerable part of the population of hearly every city in the United States. Mr. and Mrs. Fan and the little Fans see 'the parade and the performance and their curiosity is aroused. In every city the circus visits questions are asked about the winter quarters

and their curiosity is aroused. In every city the circus visits questions are asked about the winter quarters. To those who haven't received satisfactory answers, the following may be interesting when the Barnum and Bailey circus shows here May 21.

At the end of the circus year, generally about November 15, from every part of the country long trains of three animals and human beings are finding their way into the haven of the country long trains of the country long trains of the country long trains of the care and the winter of the country long trains of the care and preparation for the corperation and preparation for the corperation and preparation for the care and the winter was all circuses take winter vacations, but spend the winter months touring some warmer counity. The Barnum and Bailey circus, however, always spends its winters in its big quarters at Bridgeport, Conn., which has been its home ever since its organization by the late P. T. Barnum. The "greatest show on earth" is a highly organized business institution and is managed along the strictest business lines. The winter quarters employs relatively only a small -ro-dred at work during winter months, and the payroll, even when the show is off of the road and not earning money, totals quite a staggering amount.

The most important work of the winter consists of rebuilding the wagons and railroad cars for the next season, and the preparation of an entire new set of canvases to shelter the show—for the Barnum and Bailey circus uses entirely new tent equipment every year. More than 100 men, many of them professional sail makers of the professi

NEW METHOD OF TEST-ING DAIRY-CALF FOODS

An unusual series of experiments as conducted recently at Purdue inversity to determine the nutrive value of skim milk and milk abstitutes in feeding dairy calves, he Popular Mechanics Magazine substitutes in feeding dairy calves. The Popular Mechanics Magazine gives an interesting account of these tests. Instead of relying solely upon tabular records, individual photographs were taken of each of the trial animals, showing their general appearance and development at regaliar 30-day intervals during the tests. Thirty caives of three different breeds were used in the experiments, these being divided into three lots and fed three distinct rations for a period of 180 days. At the end of each thirty days the calves were photographed under the same conditions. The camera was placed on a stationary support, at the same height and distance for each exposure, the calves standing upon a convenient platform, with a background screen, divided into 6-in. squares. The lackground was black or white according to the general color of each calf. In this way the development of each nimal was clearly shown by the photographs and the merits of the respective rations could be judged.
