painting or waiting? After your house needs painting, every year you wait it will require more paint and more labor to put it in good condition. And every year you wait, your house is worth less. A little paint-money is good paint-insurance. THE CUARANTEED LEAD AND ZINC PAINT

Just as soon as your house needs painting, come in and let show you how little it will cost you to use DEVOE. We say "DEVOE" because it's absolutely pure.

That's why DEVOE takes fewer gallons, wears longer-and Fosts less by the job or by the year.

And that's why we guarantee Devoe without reserve.

Kohlhass.

Conscripts May Train

"Charley" Taft, son of former President William Howard Taft, is planning to enlist in the regular army and take his chances for advancement with the rest. He urges all Yale men to seriously consider a similar course, in an effort to remove the suspicion that undergraduates will not serve except in the capacity of officers.

Charles P. Taft, 2nd, is prominent in undergraduate life at Yale, Guard on the varsity football team, captain on fa championship basketball team, scholastic leader in his class, young Taft stands for democracy and believes in putting his principles into action.

washed, the bacteria pass into the egg through the open pore's of the egg through the same opendings. The egg becomes stale and rots. The evaporation draws in air to fill the vacant space, and as a result the air cells in the large end in creases in size.

Such a bad and stale egg cannot be preserved by any method and made fit to eat. All any liquid preservative canedo is to seal the pores of the shell and prevent the evaporation we have mentioned, and also prohibit the entrance of these injurious bacteria. It can be readily understood, that if the contents of the egg are perfectly fresh when it is placed in the preservative, it will retain its perfect condition. An expert can buy eggs, examine them with a reliable tester and preserve those that are fresh, but, unless the housewife can obtain fresh eggs from a reliable person, this practice of buying eggs to preserve is not secondmended.

Waterglass is a strong antiseptic that each of the contents of the past six months and you can save by preserving surplus spring eggs.

ommended.

Waterglass is a strong antiseptic that can be bought in two forms—a syrupy liquid or a white powder. Both forms are sold by leading druggists, though money can be saved, as a rule, by ordering direct from the manufacturers. manufacturers.

ing these vessels. More preservative may be added, if necessary, when they are filled with eggs.

Rules For Preserving Eggs
Do not buy eggs for preserving,
unless you understand how to select
those that are suitable for the purpose. However, many persons obtain
eggs from neighbors or from reliable
poultrymen, and preserve these with
excellent results. The eggs should
be gathered twice daily to prevent
early development of the germ. Fertile eggs gathered twice daily will
keep as well as infertile eggs.

As the eggs are gathered place

A new and increasing demand has arisen for the guinea fowl, whose culture has hitherto been neglected. Generally speaking, the guinea of the past was merely tolerated on the farm; to-day it is bred as a source of profit. This fowl now consorts with most select company on the menus of the best hotels. Next week's article is about the guinea.
