The New Way To Remove Corns, Japanese Method--Don't Hurta Bit

Just A Touch Stops Soreness, Then the Corn Or Callous Shrivels And Lifts Off. Try It. Your Feet Will Feel Cool and Fine.

Thanks to a new discovery made from a Japanese Product your foot troubles can be quickly ended. Ice-Mint as this new preparation is called is said to shrivel up hard corns, soft corns or corns between the toes so that they can be lifted out easily with the fingers. It's Wonderful. Think of it: just a little touch of that delightful, cooling, soothing, Ice-Mint and real foot joy is yours. No matter how old or tough your pet corn is he will shrivel right up and you can pick him out after a few nights use of Ice-Mint. No pain, not a bit of soreness either when applying it or afterwards, and it doesn't even irritate the skin.

If your feet are inclined to swell or puff, or if you have cracked or bleeding toes, it will draw the inflammation out and quickly heal the sore and tender places. It is the real Japanese secret for fine healthy little feet and is greatly appreciated by women who wear high heel shoes and men who have to stand on their feet all day. No more tired, aching or burning feet—No more foot trouble. Ice-Mint will make your feet feel so cool and fine that you will just sigh with relief. It is now selling like "Wild Fire" here.
