# Encyclopaedia Britannica

printed on genuine India paper

**SATURDAY, MAY 26th**, one week from tomorrow, and possibly a day before, will end forever your opportunity of owning, in its most useful and usable form, the greatest reference work ever published. **NOW—today**—you can make a first payment of only \$1.00 (to be followed by convenient, small monthly payments for a limited period) and the entire set of 29 volumes will be sent you—to use and profit by while you are paying for them. When the last set is sold you will NEVER have another opportunity of buying the Britannica printed on India paper. Knowledge of facts is the greatest power in the world today. It is the thing that marks the difference between the day laborer and the merchant prince, between the clerk and the general manager, between the cabin boy and the captain.

All the world's knowledge—the facts about every trade, every profession, every art, every industry, every science, is summed up and set down for your use, for the use of your wife, for the use of your boys and girls, in the 29 volumes of The Encyclopaedia Britannica. You cannot own and use these books without growing in knowledge, without increasing your ability, your earning capacity, your intellectual caliber.

**Today—NOW—you can buy this wonderful opportunity for Advancement, Power, Education, Efficiency, Profit, Success, Culture and Prosperity for**

**\$1** down and as little as **\$3.00** a month (for the cloth binding) for a limited period. If you wait, you will NEVER be able to buy.

You haven't any time to lose. You simply must look this question squarely in the face and decide it. Will you buy the Britannica NOW and have, at your finger ends, the practical advantage—the actual, positive facts that cover all the achievements of all men from the beginning of the world; all the facts that are known about the world; all the facts about the things men make with their hands and with machines; all the facts about every product in the world, its uses, how it is made, how it is used and where it comes from, the people that produce it or manipulate it; all the facts about every country, its history, development; the biography of every notable man and woman; all the facts about the discoveries of every science—will you have these things as your tools to make success for yourself, your wife and your children, or will you let this chance slip and NEVER have another?

**THE** publishers of the Encyclopaedia Britannica announce that they have made arrangements for the issue, as soon after the end of the war as possible, of a new volume, containing a full and authoritative history of the war.

- 1. A judicial account of the real causes of the war, the progress of the struggle, and the results all over the world; with maps, as necessary, to show changes in boundaries.
- 2. The lives of the new leaders, whether civil, military or naval, in the belligerent countries.
- 3. The results of the war outside the sphere of fighting, the progress of surgery, the prevention of contagious disease, the new scientific discoveries, etc.

The new volume will bridge the gap between the days of peace before and after the war. It will be printed and bound to match the Britannica and the publishers guarantee that no matter how difficult and costly the supplementary volume may be from the editorial point of view, the price of it to all who purchase the Britannica during the present sale will not be more than that of a corresponding volume of the Britannica.

The New York Times said, "The Encyclopaedia Britannica is something more than a book—it is an institution."

We do not want even one of these last few sets to go to any one who is not positive that he will find the Britannica useful and helpful to him and his family. There will not be nearly enough sets to supply all those who do know the Britannica will be useful, and who are ordering today, tomorrow and in the next few days.

### The END of the Sale is HERE!!

Decide NOW, for you will NEVER have another opportunity like this

This sale must end because we cannot get from the publishers any more sets of the "Handy Volume" Issue of the Britannica, printed on genuine India paper.

The publishers cannot print any more sets because they cannot get any more genuine India paper.

This is because the war has made it impossible for the paper makers to obtain two essential raw materials for making India paper, a certain quality of flax from Belgium, Germany or Ireland and hemp from Russia. It will be impossible to secure these materials in sufficient quantities for many years after the war—therefore the Britannica can never be printed in the "Handy Volume" form again.
