

LEGISLATURE NEWS

NARCOTIC BILL WILL BE PASSED

Important Measure Has Been Amended to Suit Almost All Persons Interested

What is believed to be one of the stiffest antidrug bills presented to the Legislature in this part of the country is on the House calendar for second reading to-night. It is a combination of the various bills and is said to have general approval.

The bill surrounds physicians, dentists, druggists, nurses and others, whose business it is to handle drugs with strict rules for disposing of drugs and provides heavy penalties for violation of the act. The license of such persons may be revoked if they become addicted to drugs or violate the law. Failure to comply with the law subjects persons to a fine not exceeding \$2,000 or imprisonment not exceeding five years, or both.

Every physician, dentist and veterinarian must keep a two years' record of all drugs administered, dispensed or distributed by him, showing the amount, the date, the name and address of the patient, and in case of a veterinarian, the name and address of the owner of the animal treated. Persons selling drugs also must keep a similar record for two years which must be open at all times to the proper authorities. The State Commissioner of Health is to enforce this in conjunction with local authorities.

The Campbell House bill prohibiting the manufacture and sale of adulterated or misbranded drugs, has been reported from the Senate committee on public health and sanitation with two amendments. One provides that drugs to be considered misbranded if the package or label contains any statement or device regarding the curative or therapeutic effect of such article or any of its ingredients, which is false or fraudulent.

The other amendment gives the agents of the State Pharmacy Examining Board power to enter any place where drugs are compounded, dispensed or sold for the purpose of purchasing samples to test. Any person who interferes with the agents is subjected to a fine of \$10.

COLLEGE BILLS WILL BE RUSHED

Plan to Report Out the Big Educational Appropriations During Present Week

Appropriation bills for the educational institutions receiving State aid will be reported out by the House appropriations committee, probably on Tuesday, and will be followed during the week by a number of other appropriations of a general character. Chairman James F. Woodward, of the House appropriations committee, said today that the bills for the Universities of Pennsylvania and Pittsburgh, Temple University and State College would be reported out this week, but he declined to forecast the amounts they will carry.

When these bills are started out it is expected that the hospital bills which are on a special second reading calendar for to-night will have been passed on to the Senate so that the House will be ready to push them right along. The Philadelphia port improvement bill and other measures for public works will be sent out immediately after.

Capitol park extension landscape and improvement work will be provided for in an appropriation of \$350,000 in the Woodward bill, which will be reported later in the week.

Chairman Buckman, of the Senate appropriation committee, who has about forty appropriation bills, will not be in a hurry to report them. They will probably not appear until next week.

The Swartz bill to amend the act of 1915 will be amended form to-night. It exempts deposits in savings funds, banks and institutions from escheat proceedings and extends the escheat period for other institutions from fourteen to seventeen years.

GERMAN SUBSTITUTES FOR RUBBER TIRES

Rubber being scarce in Germany nowadays, a number of bicycle tires made of substitutes for rubber are reported to have appeared on the German market, says the Popular Mechanics Magazine. First came a tire made of steel wire about 3-16 inch thick, closely coiled, with ends welded together. This was high-priced, damaged pavements and rattled in use. Then came three different types of wooden tires, the cheapest being made of a single piece of wood, while others are made of wooden sections. Another type of wood tire has the outer surface covered with a leather strip. Steel springs are used with all the wooden tires, either in forks or between tire and rim, which adds considerably to their cost. Tires covered with leather or with canvas, instead of rubber, are also on the market. But the best substitute for the rubber tire has an outer tube of prepared canvas, and a cloth-covered inner tube filled with a solid preparation resembling rubber, that is said to be quite elastic.

GROUND BROKEN FOR FACTORY Marysville, Pa., May 21.—Ground was broken Saturday by Contractor W. L. Roberts for the new brick factory of the revived Hosiery Company, in Cameron street. The building will be 42 by 80 feet. The present capacity of the plant will be doubled.

I KNOW THOUSANDS OF BOYS AND GIRLS WHO EAT POST TOASTIES EVERY MORNING

BECHTOLD BILL IN THE SENATE

Measure of Importance to Steelton Is Being Advanced in the Legislature

The Bechtold bill to authorize boroughs to secure assistance of voters to changes of objects of municipal loans which have been authorized at popular elections, a measure in which Steelton is greatly interested, has been reported to the Senate and will be on first reading to-night. The bill passed the House ten days ago. Calendarers of both branches of the Legislature are commencing to show the approach of the close of the session. On the House calendar for to-night are no less than 199 bills, 25 of which measures are in a special list of appropriation bills for hospitals and other charities which are to be reported to-night. They were reported out last Wednesday but because they were not printed could not be considered on second reading on Thursday when the House adjourned for the week.

The Lynch Senate bill to repeal the non-partisan clause of the second class city election law is a special order for 10 o'clock and after this measure and the appropriations are disposed of there will be 152 bills on third reading, some of which have been on the calendar for more than a fortnight. Fifty-eight bills, all reported from committee last week, are on second reading. Tuesday morning the Senate bill relative to payment of State tax on foreign fire insurance company premiums to cities and boroughs will be a special order on third reading.

In the Senate calendar are less than 100 bills. In third reading are the Beideman third-class city amendment; Philadelphia debt increase; Swartz decedent code and orphan court code bills with the Paik bill providing a county system of relief and assistance to the families of soldiers. There are twenty-eight bills on the second postponed calendar and on the second reading calendar are the bills to make funds not used for armory construction available for immediate use; the McNichol salary adjuster together with the bills regulating fertilizers and the catching of bullfrogs and terrapins.

Numerous hearings are scheduled for the week by committees which are commencing to close up their work. The appropriations committee will give a hearing on the Public Service Commission appropriations Tuesday.

Carlisle Indian School Graduate Killed in France

ERNEST W. KICK Carlisle, Pa., May 21.—The first Carlisle Indian School graduate to fall while serving against the Germans in France was Ernest W. Kick, a full-blooded Indian whose home is in Oneida, Wis. A brief notice of the "death in action" of the former student was received by officials at the local government institution today.

Kick attended Carlisle and left here in 1904. When the war broke out he was living in Wisconsin and desiring to "do his bit" in the war, crossed the border and enlisted in the Canadian expeditionary force at Starathroy, Ontario. He left Canada in April for the front. Details of the way in which he was killed are lacking.

Kick was a football man and an athletic star while at the school. He was thirty years old at the time of his death. The receipt of the news created a profound impression at the local institution and special memorial services were held Sunday evening, when the religious bodies of the school met as part of the program of the annual commencement.

CHURCH CORNERSTONE LAID Marletta, May 20.—The cornerstone of the New Salem Lutheran Church was laid yesterday, attended by hundreds of people from all sections. The Rev. Dr. Frederick S. Gotwald, president of the West Pennsylvania Synod of the Lutheran Church, was the principal speaker. He was assisted by the Rev. Dr. George Enders, of York; the Rev. Dr. George Diffenderfer, of Carlisle, and others. The music was a feature of the services.

ENOIA SUNDAY SCHOOL PICNIC Enola, Pa., May 21.—The general committee in charge of Enola's annual Sunday school picnic will meet this evening in the First United Brethren Church. A transportation committee will be appointed to arrange for the date and the means of getting to the place of the outing.

ELECTRIC LOCOMOTIVES ARE SHIPPED IN BOXES Three large electric locomotives, weighing 130 tons each, were shipped recently from Erie, Pa., to Chile, South America, in knock-down form, being boxed for convenience of shipment, according to the Popular Mechanics Magazine. They were intended for use in transporting iron ore from the mines of an American steel company at Tofo, Chile, 2,200 feet above the sea. The route was Grande, the nearest shipping port. For a while the problem of getting the engines to Chile baffled the traffic men, as they were too big and too heavy to be taken aboard ship intact. The only alternative was to take them apart for shipment. When this was done and the parts were boxed it was found that each of the locomotives occupied eight freight cars and weighed 290,000 pounds. There were 62 separate boxes, ranging in size from 50 feet to only a few inches in length, the largest weighing more than a ton before being packed.

Sport Silks

Never were there prettier—never were there so many odd and beautiful weaves and color combinations in silks for sports wear.

What dresses—what skirts they will make! No woman can resist their appeal—nor will she try.
