**U. S. TREASURY**  
All Previous Records Eclipsed From Nation's Ordinary Tax Sources

Washington, May 26.—The amount of gold flowing into the treasury these days from ordinary sources of taxation has eclipsed all previous records. For the first 24 days of May it aggregated \$159,857,267, bringing the total for the first 24 days of the month to approximately \$200,000,000 more than a year ago, which then stood as a new high record.

The chief source of revenue thus far in May has been the income tax which has yielded \$88,714,322 against \$3,835,834 for the corresponding period last year. The tremendous increase is attributed to the patriotism of the taxpayers who, believing the government needs the money, are making their payments a month earlier this year than formerly. Officials estimate that the income tax will yield approximately \$235,000,000 in excess of the sum estimated last fall.

Next in importance of miscellaneous revenue on whisky, beer, cigars and cigarettes. These payments totaling \$32,597,474 for the first 24 days of the month are 50 per cent higher than for the same period last year. The increase in these taxes is attributed to what is called the "war premium" in the demand for the commodities to get them out of bonded warehouses before the taxes are levied. The war revenue bill, now pending in Congress, shows an increase of approximately \$3,000,000 in the amount of duty on cigars and cigarettes, which were a year ago.
