Waynesboro, Pa., May 28.—Alexander Bonner, a married man, aged about 60 years, came to town from Bessecker's Gap, on Saturday. He had been on the streets for some time and had stopped to lean against a post in front of the Waynesboro Gas Company office in the afternoon. After he had remained in one position for more than three hours, Patrolman Gillan, accosted him. When Mr. Bonner did not answer, the officer investigated and found that the man had been paralyzed and could not move. He was taken in a vehicle to the office of a physician and later sent to his home. His condition is critical. Mr. Bonner having been stricken about the sides and one leg, and made speechless.

Germans Execute Two Women on Spy Charges

Geneva, May 28.—La Suisse yesterday prints the details of a case similar to that of Miss Edith Cavell, the English nurse who was executed by the Germans in Brussels in October, 1915. The Germans, says the newspaper, recently arrested two women, Madame Preister and her daughter, 27 years old, on the Swiss-Italian frontier. They were charged with acting as spies. The women admitted at the trial that they had smuggled letters, without knowing their contents, from Italian families to relatives in Switzerland. This was done simply as a friendly act and without political or malicious purpose. Both women, says La Suisse, were shot at Mulhausen. The mother was a horrified witness of the execution of her daughter before her turn came.

U. S. Perfects Tractor to Haul Artillery

Washington, May 28.—A new type of tractor combining power, speed and ability to turn within its wheel base is being developed by army engineers for hauling guns of medium caliber. The War Department announced last night that it believed the tractor will result in elimination of artillery horses almost entirely. The new creeping or self-tracking tractor is a low and wide American army" says the announcement. It is built without steering arrangement in front and while possessing relatively little power, the tractor used in Europe, is capable of turning within its own length by simply reversing or stopping one of the drivers while the other side continues to move. Eventually, it is believed, horses will be used only for the lightest artillery required to move rapidly over bad ground.

DR. OXLEY'S FOR MORE CARE

Asks Mothers to See That Milk Furnished to Households Is in Good Shape

Better methods in the handling of milk served to the public are highly desirable in Pennsylvania, declares Dr. Samuel G. Dixon, state commissioner of health, in a discussion of the situation surrounding the State's commercial milk supply. Dr. Dixon says many methods are poor and urges co-operation to improve conditions. The commissioner says: "Milk is nature's complete food to sustain human and animal life. Under ideal conditions this delicate food, that meets all the demands of the body, would never be exposed to the atmosphere, but pass directly from the mother to the offspring at the proper temperature and without the possibility of becoming dirty or contaminated with disease-producing germs. Unfortunately the artificial methods of living adopted by man have exposed this food to the atmosphere, and the result is that it is not so faithful to the laws of nature. This week's chat will be confined to commercially handled cows' milk. Fresh milk, that milk that has been pasteurized may easily become unfit for use as a baby's food by the dust and dirt and disease germs introduced through atmospheric air, but after it is taken from the cow. The milk consumed in the State of Pennsylvania alone comes from about 1,000,000 cows. In addition to our own, besides the importation of daily trainloads from our sister States. Pennsylvania we have no thorough inspection of the milk at any stage from the time the cow is milked until the fluid reaches the consumer. There is no law and no provision that gives any government officer power to guard properly our little children from dirty milk. Some of our cities and other municipalities are doing all they can to take care of their milk supplies. The State Department of Health feels it is its duty to see that each mother or guardian of a child to help force a cleaner supply of milk. Never buy milk from a seller who wears dirty clothes or whose hands and face are unclean. See that his horse and wagon, truck, or any vehicle in which he carries his product are kept clean. If they are not the milk is almost sure to be dirty. The milkman should not fill his bottles on route. They should be filled only after being sterilized and before they are exposed to dust and dirt. Those who fill bottles as they deliver often take non-sterilized ones from one house to another and deliver them to the next customer. You should see whether or not the empty milk bottles collected are carried to a separate place from the full bottles. Before opening the bottles the cap and top of bottle should be thoroughly washed with water so the milk flows out over the dirty lip of the bottle. Look for dirt in the bottom of the bottle after it is permitted to stand."
