Garman Home at Dauphin Invaded by Swarm of Bees

Dauphin, Pa., June 6.—The home of William Garman, in High street, contains now probably the busiest workers ever housed. Besides being busy workers, they are very hot bed fellows. The worst of it all is that these bees—for they are bees—come uninvited. Escaping from a hive in the yard of William Howard, in Market Square, they swarmed to the home of Lewis Maus, in Erie street, and settled on the roof. This was not a good home for the wandering tribe, so Tom Kinter attempted to move them to a hive which he prepared for the purpose. The bees, however, had another view in mind. Leaving him with a few painful stings, they flew away and entered Mr. Garman's house by an unknown entrance. Mr. Garman, who is night watchman of the Pennsylvania railroad bridge here, says that though he tried to keep the bees, "they make sleep" a little hot.

At the regular monthly meeting of the Ministerium, held May 28, a resolution was unanimously and enthusiastically adopted that in all the churches of the city and vicinity the evening service on Sunday, July 1, should be made the occasion of a great patriotic demonstration, that services of special character be held and that with such end in view each church should make such plans as its pastor and official board deemed wise.

Lemoyne, Pa., June 6.—Until a report from officials of the Valley Railway Company is received by council, the paving of Rossmoyne street is at a standstill. Council will not go before the State to request aid until it is positive what the railway company will do. The tracks of the company run the entire length of this street, which is on the highway to York and is in bad condition. Council is making efforts to place some permanent paving on it as much money has been spent in repairing it for several years. A meeting of council was held last night at a special session to discuss the principal topic. Residents of Bosler avenue communicated with council, asking for crossings at several of the street intersections, and requested council to compel several property owners to lay pavements. Dr. J. W. Bowman made the annual report of the borough board of health, which was accepted.

Gang of Youthful Bicycles Thieves Are Placed Under Arrest

Five juvenile offenders, none of them over 14, placed on trial at the police station yesterday afternoon told thrilling tales of a ring of bicycle thieves. Immediately after the theft of the wheels they were taken to one of the boy's homes where they were taken apart and interchanged until the bicycles could not be recognized. In many cases they painted them to make identification more impossible. A total of fourteen bicycles stolen have been reported to the police, but whether they made away with all of them would not be learned as their operations were so extensive none of them could remember the various transactions. Because of their extreme youth and their former good records Alderman DeShong dismissed them with a reprimand and requested they report every Saturday to Captain Thompson. George Shuler made the arrests.

You Need Not Suffer from Catarrh.

But You Must Drive It Out of Your Blood to Get Rid of It Permanently. You have probably been in the habit of applying external treatments, trying to cure your Catarrh. You have used sprays, washes and lotions and possibly been temporarily relieved. But at a short time you had another attack and wondered why. You must realize that catarrh is an infection of the blood and to get permanent relief the catarrh infection must be driven out of the blood. The quicker you come to understand this, the quicker you will get it out of your system. S. S. S. Swift Laboratory, Atlanta, Ga.

Old methods were wasteful—so they had to make way for new

Men can no longer afford to sow wheat by hand—nor burn good gasoline in wasteful motors. Those inventions have served the world best which have enabled it to do more work with less expenditure of time, energy, money. More power—smoother power—and the saving of gasoline! The time had come for a more economical motor—and the Twin-six met the need. And a three-fold production, to satisfy the greater demand, was the immediate result. There are twenty and more body styles to select from—all with that matchless splendor of finish which helps to give the Packard its marked distinction.
