"What do you mean by 50-50?" inquires a backward and belated reader. Simple enough. It means that all the average entry wants in any split offered by Fate is 80 per cent against your 20.

IT'S NEVER TOO LATE-

ice averaging less than 5c daily for each customer, was absolutely made necessary by the extraordinary cost of everything used in doing an ice business

Within the last twelve months coal to manufacture ice has advanced 100 to 150 per cent.; oils, etc., advanced 50 per cent.; packings advanced from 20 to 25 per cent.; waste 75 to 100 per cent.; mules and horses 20 to 30 per cent.; wagons, etc., 40 per cent.; wagon repair material from 60 to 150 per cent.; harness 50 to 100 per cent.; horse feed from 40 to 110 per cent.; horse shoes 50 per cent.; labor 20 to 25 per cent., etc., etc.

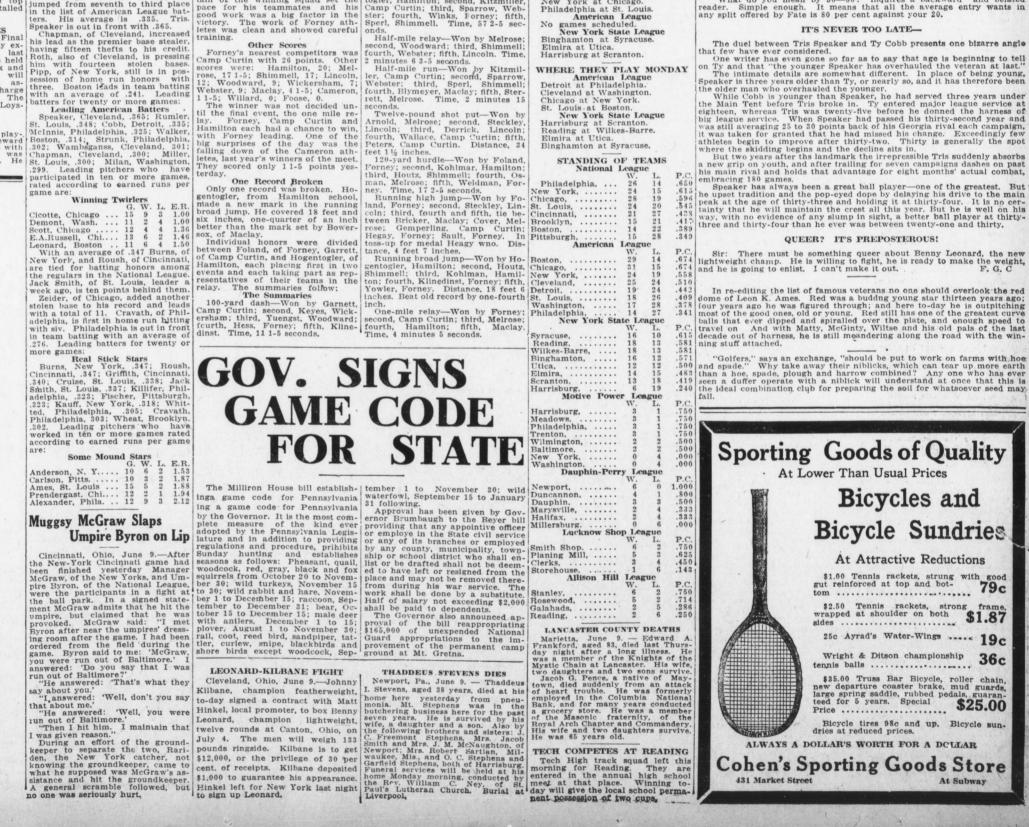

Not one single item of expense but that has increased in price.

Notwithstanding this heavy burden of increased costs for operation of plant and delivery expenses we have added but a small additional cost to the ice consumer. Only sufficient to enable us to remain. in business until conditions again become normal.

Taking everything into consideration you must admit that an increase in the price of ice, averaging about 5c daily to each family, is not an exorbitant advance. The question is can such a small difference be maintained in view of the fact that expenses are continually advancing?

Only through the co-operation of our customers can we hope to maintain the present rates. We request in all seriousness that wagons be detained as little as possible while making deliveries. A minute saved here and there will in the aggregate greatly reduce the time for such service.
