LIBERTY LOAN ON LAST LAP

Success of Issue Depends on Millions of Small Subscribers

Washington, June 11.—The Liberty Loan to-day entered its last lap in the race to reach the \$2,000,000,000 mark by Friday when the subscription period ends.

Small subscribers by the thousands or even millions must come in this week to make the loan a success. Treasury officials count strongly on the help of the men and women with small savings who will loan their dollars to the government for the nation's war against Germany.

Two days ago \$700,000,000 remained to be raised, and the amount probably is not much less to-day.

To help in the bond selling campaign, school, church and public buildings bells to-night will ring four times to remind citizens of the four days in which the bond selling campaign will be conducted.

The New York Federal Reserve district has approached nearest in total subscriptions its minimum allotment and the San Francisco district is farthest from the mark.

GERMANY MUST PAY FOR DEPREDATIONS, PRESIDENT DECLARES

Central Powers Must Be Put in Such Position That Repetition of War Cannot Again Be Possible

Washington, June 11.—President Wilson, in a communication to the new government of Russia, has made plain the war aims of the United States and its position on "no annexations; no indemnities."

"No territory must change hands except for the purpose of securing those who inhabit it a fair chance of life and liberty," says the communication.

"No indemnities must be insisted on except those that constitute payment for manifest wrong done."

"No readjustments of power must be made, except such as will tend to secure the future peace of the world and the future welfare and happiness of its people."

In unmistakable terms, President Wilson declares against Germany's proposal to restore the "status quo" before the war.

"It was the status quo ante out of which this iniquitous war issued forth," he said. "The power of the Imperial German government within the empire and its widespread domination and influence outside of that empire."

"That status must be altered in such fashion as to prevent any such hideous thing from ever happening again."

The President's communication was delivered to the Russian government by Ambassador Francis, at Petrograd. In full it is as follows:

"In view of the approaching visit of the American delegation to Russia to express the deep friendship of the American people for the people of Russia and to discuss the best and most practical means of co-operation between the two peoples in carrying the present struggle for the freedom of all peoples to a successful consummation, it seems opportune and appropriate that I should state again, in the light of this new partnership, the objects which the United States has had in mind in entering the war. Those objects have been very much belated during the past few weeks by mistaken and misleading statements, and the issues at stake are too numerous, too tremendous, too significant for the whole human race to permit any misinterpretations or misunderstandings, however slight, to remain uncorrected for a moment."

Germany Losing

"The war has begun to go against Germany, and in their desperate desire to escape the inevitable ultimate defeat those who are in authority in Germany are using every possible instrumentality, are making use even of the influence of groups and parties among their own subjects to whom they have never been just or fair or even tolerant, to promote a propaganda on both sides of the sea which will preserve for them their influence at home and their power abroad, to the undoing of the very men they are using."

"The position in America in this war is so clearly avowed that no man can be excused for mistaking it. She seeks no material profit or aggrandizement of any kind. She is fighting for no advantage or selfish object for her own but for the liberation of peoples everywhere from the agonies of autocratic rule. The ruling classes in Germany have been of late to profess a like liberality and justice of purpose, but only to preserve the power they have set up in Germany and the selfish advantages which they have wrongly gained for themselves and their private projects of power all the way from Berlin to Bagdad and beyond."

Must Alter Status

"Of course, the Imperial German government and those whom it is using for their undoing are seeking to obtain pledges that the war will end in the restoration of the status quo ante. It was the status quo ante out of which this iniquitous war issued forth, the power of the Imperial German government within the empire and its widespread domination and influence outside of that empire. That status must be altered in such fashion as to prevent any such hideous thing from ever happening again."

"We are fighting for the liberty, the self government and the undisturbed development of all peoples, and every feature of the settlement that concludes this war must be conceived and executed for that purpose. Wrongs must first be righted and then adequate safeguards must be created to prevent their being committed again. Remedies must be found as well as statements of principle that will have a pleasing and sonorous sound. Practical questions can be settled only by practical means. Phrases will not accomplish the result. Effective readjustments

will, and whatever readjustments are necessary must be made.

Must Be Free

"But they must follow a principle and that principle is plain. No people must be forced under sovereignty to live. No territory must change hands except for the purpose of securing those who inhabit it a fair chance of life and liberty. No indemnities must be insisted on except those that constitute payment for manifest wrong done. No readjustments of power must be made except such as will tend to secure the future peace of the world and the future welfare and happiness of its peoples."

Can Afford to Pay

"For these things we can afford to pour our blood and treasure. For these are the things we have always poured out blood and treasure now, if we succeed, we may never be able to unite or show conquering force again in the great cause of human liberty and the liberty which victory will secure. If the forces of autocracy can divide us, they will overcome us; if we stand together, victory is certain and the liberty which victory will secure. We can afford them to be generous, but we cannot afford them to be weak or omit any single guarantee of justice and security."

Freedom Fires to Burn Fourth of July

The dawn of a new era of democracy is to be celebrated by the 96-625 Camp Fire Girls in this country in a novel and interesting manner next month on Independence Day.

As the Greeks of old lit their signal fires which flashed from hill to hill the night of the fall of Troy, the Camp Fire Girls and possibly the Boy Scouts will light Community Fires to blaze out the signal of Freedom on the tops of the hills from Eastport, Me., to the shores of the Pacific.

As the Grecian fires announced the return to her own country of the most beautiful woman in the world, so the American fires will announce that there are brave men across the blue waters fighting for an ideal—the most beautiful woman in the world, Liberty. In the opinion of the Camp Fire Girls, we cannot alone celebrate the birthday of Freedom. There is a new birth of Freedom in far off Russia, and the whole world celebrates with us.

The plan is to get the city and town officials, who are desiring clear across the country the absence of gunpowder from Fourth of July celebrations, to co-operate with all those interested in these nation wide signal fires. The first, prepared in advance, are to be lit just at sunset as a signal that Liberty is again awakening throughout the world.
