year will amount to 21,000,000 bush-eds, which is a decrease as compared with the crop of 1916. The condition of the wheat on June 1 is given as 86 per cent. of an average on that day for the last ten years. About 20,000 acres of land sown to wheat last fall was ploughed down this spring because stalks were dam-aged, but many farmers allowed the wheat to stand, figuring that a half erop would still yield a good return. The bulletin also gives 22,000 acres as the increase in acreage sown to oats as compared with 1916 and pre-dicts a big increase in the acreage where the other in More and June
