Sunbury Veteran, Oldest Teacher in United States

PROF. S. O. REED

Sunbury, Pa., June 29.—This borough claims it has the oldest active public school teacher in point of service in the United States. He is Sirvetus O. Reed, aged 73 years, who has just finished his forty-third consecutive term, and has been chosen by the Board of Education for his forty-fourth. He has taught nearly three thousand young folks the rudiments of reading, writing and arithmetic, and many have passed into important positions in life. When the Civil War broke out he enlisted and after an honorable service he came to Sunbury and took up teaching. Professor Reed is a staunch Republican, owns fine property, and is active in civil affairs. His only daughter is the wife of William B. McCaleb, of Harrisburg, superintendent of the Middle division of the Pennsylvania railroad.

JUDGE HOLDS UP SALE Sunbury, Pa., June 29.—Federal Judge Witmer refused yesterday to sign an order of private sale of the \$700,000 assets of the bankrupt Pullman Auto Company, of York, Pa. Henry D. Proper Thing Now Is to Peel Off Soiled Skin

Those who abhor sticky, greasy, shiny, streaked complexions should religiously avoid soaps, powders and rouges during the heated days. There's no need for them, anyway, since the virtues of a good skin peeler have become known. No amount of perspiration will produce any evidence that you've been using it, while as it is applied at bedtime and washed off in the morning, the complexion never looks like it has been soiled. Instead of adding anything to make it worse, it has none of the disadvantages of cosmetics and accomplishes much more in keeping the complexion beautiful in what is called a "face bath." Just get an ounce of it at your druggist's and see what a few days' treatment will do. Another effective warm weather treatment for the skin is a skin-tightener made by dissolving one ounce powdered salicylic acid in what is called a "face bath." Remarkable improvement is noticed immediately, and there is no harmful effect whatever.

How's This? Corns Lift Out With Fingers--No Pain!

Thanks to a new discovery made from a Japanese product your foot troubles can be quickly ended. "Ice-Mint," as this new preparation is called, is said to shrivel up hard corns, soft corns or corns between the toes so that they can be lifted out easily with the fingers. It's wonderful. Think of it, only a touch or two of Ice-Mint and real foot-pain is yours.

There is not one bit of pain or soreness when applying it or afterwards and it doesn't even irritate the skin. If your feet are inclined to swell or puff, or if you have cracked or bleeding toes, it will draw the inflammation right out and quickly heal the sore and tender places. It keeps the feet healthy and is greatly appreciated by women who wear high heel shoes and by men who have to stand on their feet all day. Try it. Just ask in any drug store for a small jar of Ice-Mint and learn the wonderful self what solid foot comfort really is. There is nothing like it.
