MISSIONARY FROM CANTON SPEAKS

Mr. and Mrs. Weidman Groff Tell of Their Work in China at Missionary Social

Last night was missionary night in the booster program of the Olivet Presbyterian Church and was in charge of the Women's Missionary Society. Miss Katherine Huber, president of the society, presided.

A brief program including devotions by the Rev. A. L. Taxis; vocal duet, Miss Mary Huber and Miss Gertrude Huber; address of welcome, Miss Nettie White, was given prior to the main address of the evening by Weidman Groff, a returned missionary from China where he is working among the natives at the Canton Christian College. Mr. Groff is professor in the agricultural department of the school. He gave an interesting talk on his work among the natives and brought greetings from his parents, Mr. and Mrs. A. L. Groff, and sister, Miss Elizabeth Groff, all of whom are doing missionary work in that country, to the people of the Olivet church where the Groffs were former members.

In connection with the talk on China, Mrs. Groff sang numerous Chinese songs and Mr. Groff displayed various historic and interesting curios. As an outgrowth of the unusually stimulating interest of last night's meeting a men's missionary auxiliary was organized. A social time with refreshments closed the enjoyable evening.

What Ice Does To Reduce Cost of Living

THE correct handling of food products in the home require that they be placed immediately in a well-iced refrigerator.

Meat which is kept in cold storage in the market, should be kept under refrigeration until every bit is consumed; otherwise the water comes out of it when brought into a high temperature and the meat soon spoils.

You can keep milk for an indefinite time at a temperature of 40 degrees, the temperature of a well-iced refrigerator. Is it economy to pay eight or nine cents for a quart of milk and have it sour and be unfit for use?

Is it economy to have fruits, that come from cold storage, kept in a warm temperature and half of them spoil?

The economical way to keep house is to buy in large quantities, but unless you arrange your plans ahead and keep these things at a cool temperature you are going to lose.

The use of **Aispure Ice** (all pure) gives you better food and a greater variety of it than your grandmother ever had.

What a hungry, half-starved nation this would be without ice.
