New Country Club Home

The new home of the Harrisburg Country Club, near Fort Hunter, will probably be open within the next two weeks. Only minor work re-mains to be finished on the large building. A formal opening is being planned for the fall. The new structure replaces the building destroyed by fire early in 1915. It has a frontage of 90 feet, a depth of 42, and is two and a half stories high.

every day usefulness to you?

wise were swung into line and the numerous antisubmarine devices on deck were in the hands of their skilled expert crews. But even while this was being done came the torpedo, clearly visible from the deck, its gleaming brass body glistening in the bright sunlight, its propellers sending it at express train speed straight toward the destroyer. Something was wrong with the mecr-anism of this particular torpedo, for it should have traveled tweive or fif-teen feet below the surface. Instead, it came bounding along in plain sight, now and then leaping out of the wa-ter, like a flat stone made to skip over the surface. **Missed by Six Feet** Even thus, it might have found rs target but for the presence of mind of the 60-year-old coxswain. He had been first to sight the periscope, and had rushed immediately to an emer-gency lever whizzed through the water six feet behind the stern of the destroyer, its gradually lessen-ing speed as it sank into the swird of the destroyer, its gradually lessen-ing speed as its ank into the swird of the destroyer, its gradually lessen-ing speed as its ank into the swird of the engines indicating that its possi-bilities for mischief were nearly done. Except for the coxswain's action in twisting the ship from its course, the missile would apparently have made a square hit in the stern maga-zine.

The management of this paper has made special arrangements with The Lincoln Correspondence Schools, Inc., of New York City, a leading educational institution, by which every subscriber to this paper may receive a thorough practical education by correspondence, in any one of the following home-study courses:

Physical and Beauty Culture — Millinery — Sewing and Plain Dressmaking—Cookery—Home Management—Etiquette

These courses were prepared by experts who are known the world over because of their unquestionable ability as teachers and authors. You will have the opportunity of learning, what years of study and practical experience have taught them-you will have the opportunity of studying the most practicable lessons of their kind that have ever been prepared.

The first consideration in preparing these courses was practicability, and a system of thorough instruction for the busy woman, who has no time to devote to unnecessary things, and who only desires to apply herself to undertakings that will benefit her, such as economy in household expenses, the scientific management of the home, saving two-thirds of her own and children's dress expense by knowing how to sew, making her own hats at a great saving in cost, at the same time having more attractive and becoming headwear, learning how the proper care of the body develops a graceful figure

and promotes good health, and the science of having a perfect skin and a beautiful complexion, and many other scientifically prepared sub-fects, each one of which can be applied for personal gain in countless ways.

These courses deal with facts, formulas and methods based on actual experience and practice in teaching thousands of students in every part of the world. Whether you are a woman of the home or a woman following some occupation or business, any one of these courses holds vitally important essentials for you; they will help YOU.
