John H. Attick, 81 Years Old, Only Charter Member of Musical Organization

Mechanicsburg, Pa., July 30.—While arranging for a festival to be given by the Singer band on Saturday, August 11, some interesting bits of history are brought to light concerning this musical organization, one of the oldest and best known in the Cumberland valley, through conversation with John H. Attick, who is aged 81 years and the only charter member living. He played in the band from the time he was 18 years old and recalls the early days of the organization when it was known as the Keystone band, later as the Mechanicsburg band and finally, when David Singer was made leader, it was named in his honor and has retained the name of Singer Band ever since.

The band was organized in the year 1854, and during the Civil War, a number of the members left for the army. Mr. Attick joined the band in the Seventh Regiment Pennsylvania Reserves. In the year 1876, the band played for the Granger Encampment of the Centennial in Philadelphia, where one of their number, Roger Hefflinger, was struck and killed by lightning during a severe storm, when he was closing the windows in the building where they were playing. The band presented a fine appearance, it is said, dressed in non-combat uniforms. Many prominent citizens have been connected with the Singer band, which now has a membership of thirty-five.

14 Chances Out of 15 to Cheat Death in War

Boston, July 30.—The man who goes to France to fight has fourteen chances out of fifteen of returning home a safety, according to figures compiled by Roger W. Babson, the noted statistician.

Mr. Babson's conclusions are based on the mortality figures of the French army during the three years of the war, which include the heavy losses at the Marne and Verdun. According to the death rate of the last year, a man has thirty-nine chances in forty of surviving warfare and is only about three times as likely to meet death as he would be at home. In fact, says Mr. Babson, a man in the heavy artillery is in no more danger than is a railway employe.
