

FIRST CALL TO ARMY FOR DRAFT MEN SEPT. 1

Million Men to Be in Training Under Colors by First of Month

Washington, Aug. 9.—More than 200,000 men of the selective draft forces will be called to the colors on September 1, to go immediately to their divisional training cantonments. This will bring the strength of the United States Army on that date up to virtually 1,000,000 men.

exceed one-third of the quota from each state to be trained for mobilization camps between September 1 and September 5. Unless we wish to be put in a position of not furnishing men as fast as the War Department is ready to receive them, each state should have accumulated one-third of its quota not less than one month before the first of September. This can only be attained if local boards certify these lists up with great expedition.

The message was followed up by a new ruling regarding exemptions because of dependents, which is expected to decrease considerably the loss of men from the military service for this reason. Boards are authorized to grant exemptions to married men whose wives are solely dependent upon them, but where the parents or other relatives of either wife or husband are willing to assume the burden of her support during his absence. The same course is to be followed where any drafted man's employers agree to continue his salary as a patriotic duty.

Such dependency ordinarily renders discharge advisable, because since the drafted man loses his civil income and thus loses his means of support, the wife is left without support and this lack of support is the effect which the act aims to avoid. But wherever such

effect does not, in fact, follow and the wife is not left without reasonable adequate support, but will receive such support from other sources, there is no real dependency rendering discharge advisable.

Under presidential regulations providing that any certificate of discharge may be withdrawn, modified or renewed by the local board, the board is authorized to reopen any claim of exemption already passed upon and still awaiting disposition on appeal to the district board for the purpose of receiving any affidavits or making other inquiries relative to dependency as defined in the present rulings; and the local board shall transmit to the district board such affidavits and its own minutes thereon for consideration on appeal.

The foregoing rulings are calculated to carry out the spirit and intent of the act and to enable patriotic men to remain in the military service of their country, where the burden of support hitherto carried by them alone is in a position to be distributed, for a time, among others who are patriotically ready to make in this manner their contribution to military service by setting another man free to enter the army.

CANNING RECIPES ARE EXCHANGED BY HOUSEWIVES

YOU with hundreds of other housewives have successful methods of canning, preserving and drying foods and fruits which have either been handed down to you from generations of your ancestors or which you have evolved. This feature of the HARRISBURG TELEGRAPH is designed to help exchange your ideas with other housewives. Send your favorite receipts and methods to the editor and they will be placed before thousands of other housewives. In this way they can be placed before the public and do the maximum amount of good.

Camp Rations Ration No. 1.—Products required for mixture. 4 pounds rice. 1 pound fresh green peppers. 4 Chili peppers. 4 cloves of 2 garlic. 4 quarts tomatoes. 1 pound cheese or 1-2 pound butter. 1 pound fresh pork. 4 Spanish peppers. 8 level teaspoonful salt. 4 quarts water.

Put the meat, peppers and garlic through a food chopper. Mix with tomatoes, water, and salt. Cook on slow fire, simmering for 45 minutes. Soak rice in salted water for 20 minutes. Rinse with cold water. To can this ration, the mixture should be packed in hot glass jars or tin cans while hot. Place rubbers and caps of jars in position not tight. Cap and seal tin cans completely. Sterilize for the length of time given below for the particular type of outfit used.

Water bath, homemade or commercial, 214 degrees, .50 min. 5-pound steam pressure, .50 min. 10-pound steam pressure, .40 min. Remove jars or cans, tighten glass jar covers; invert to cool and test joints. Wrap jars to prevent bleaching and store.

Ration No. 2.—Products required for mixture. 1 pound rice or hominy, cracked. 1 teaspoonful salt. One-half pound bacon or chipped beef cut into small pieces. 1 pound mixed equal parts carrots, onions, beans, Irish potatoes. 2 quarts water, 214 degrees, one quart and one quart of milk. One-half pound sweet green peppers cut fine. 1 pint strained tomatoes. Season with celery salt or celery seed. Cook rice or hominy, water or

milk, and salt in a double boiler for five or ten minutes. Bacon or chipped beef, green peppers and the strained tomatoes should be cooked or boiled separately. Then add to this mixture the one pound mixture of vegetables and season with mixed spices. Cook this vegetable combination until done. Mix rice, carrots, lighter-colored peppers, etc. Stir this well into the mixture. The product to be canned should be hot and thoroughly mixed. Pack mixture into hot glass jars or tin cans at once to one-eighth inch of top. Place rubbers and caps of jars in position, not tight. Seal tin cans completely. Sterilize for the length of time given below for the particular type of outfit used.

Water bath, homemade or commercial, 214 degrees, .50 min. 5-pound steam pressure, .50 min. 10-pound steam pressure, .30 min. Remove jars or cans, tighten glass jar covers; invert to cool, and test joints, wrap and store.

Ration No. 3.—One-pound pack. Products used. 8 ounces beef. 2 ounces potatoes. 2 onions. 1 ounce carrots. 1 ounce beans. 2 ounces beef gravy. Parboil the beef in a kettle with thin gravy for 30 minutes. Cut up potatoes, onions and carrots, into small sections; add the beans. Place entire mixture into hot glass jars, season to taste. Stir mixture and cook for 10 minutes.

To can the mixture, pack it hot into hot glass jars or tin cans to one-eighth inch of top. Place rubbers and tops of jars in position, not tight. If using tin cans, seal completely. Sterilize for length of time given below for the particular type of outfit used.

Water bath, homemade or commercial, 214 degrees, .50 min. 5-pound steam pressure, .50 min. 10-pound steam pressure, .40 min. Remove jars or cans; tighten jar covers; invert to cool, and test joints. Wrap and store.

ALFALFA MUST BE INOCULATED

Beginning to Be Considered One of the Most Important Crops Grown in East

Alfalfa is beginning to be considered one of the most important crops grown by the eastern farmers to-day. The lack of inoculation has necessitated many reseedings of alfalfa in Pennsylvania.

Many fields have been inoculated with the necessary bacteria, but of insufficient quantity to make a complete inoculation. Unless your field has grown alfalfa or sweet clover, within five or six years previous to the time when it is to be seeded, special inoculation measures should be employed.

The most successful method of inoculating alfalfa is to broadcast over the field from two hundred to five hundred pounds of soil from a successful alfalfa or sweet clover field. The soil should be taken spade deep.

When the amount of soil to be used is not limited, it may be applied with a manure spreader, or it may be thrown from the back of a wagon with shovels. When the quantity of soil is limited, broadcast it by hand in the most satisfactory method. In this case usually two hundred pounds per acre is sufficient.

Another method is to dry the soil in the shade, run through a fine sieve and drill it like fertilizer, a drill set to sow the smallest amount of fertilizer will sow enough soil for inoculation.

The soil should be applied before sowing the seed. It does not matter how long before seeding it is done, a few days in advance. Be sure that the soil is harrowed in immediately after sowing, for sunlight is very injurious to the bacteria. Artificial cultures for alfalfa are not as a rule as successful as soil inoculation. They are more easily applied, and are best where soil cannot be secured. When using artificial preparations, be sure that seed is sown right after applying the culture.

The United States Government formerly made a practice of supplying artificial culture to farmers. This has been discontinued, so it is necessary to secure artificial cultures from commercial sources. By writing or phoning the Dauphin County Farm Bureau, a list of reputable commercial houses can be secured.

WHEAT ONLY TO BE SHORT CROP

Federal Forecast Shows Nation Will Have Bumper Harvest

Washington, Aug. 9.—Simultaneously with its announcement of the greatest corn crop ever grown and record crops of barley, rye, wheat and sweet potatoes, tobacco and hay, the United States Department of Agriculture yesterday published the program under which it is hoped to achieve far greater results next year.

Production of more than 1,000,000,000 bushels of wheat, and 1,000 bushels of rye, through the planting of 47,337,000 acres to winter wheat and of 5,131,000 acres to rye this fall, is the immediate war agricultural program for the nation announced by Secretary Houston.

The record winter wheat acreage, an increase of 18 per cent over last year, will yield 672,000,000 bushels if the average yield for the past ten years were equaled, or under a repetition of the favorable conditions of 1914 would reach 1,000,000,000 bushels.

Crop Prospects. Corn production for this summer is estimated at 2,000,000,000 bushels, an increase of 67,000,000 bushels over the July forecast and 68,000,000 bushels above the record crop of 1,932,000,000 bushels shown in the July 1 report. The showing is due to vast improvement in the growing corn in Illinois, Indiana, Iowa and Missouri.

In Kansas the condition declined to 33 per cent of a normal, compared with 65 per cent on July 1, and as a result the Kansas crop is forecast at 51,740,000 bushels compared with 169,000,000 bushels forecast in July. Oklahoma's crop showed a decline from 61 per cent of a normal to 30 per cent, and production is forecast to be reduced from 65,522,000 bushels to 38,844,000 bushels.

Spring wheat production, forecast in July at 276,000,000 bushels, showed the most adverse weather conditions. The prospect is forecast at 249,000,000 bushels, a drop of about 40,000,000 bushels from the July 1 report. North Dakota's crop suffered most, with a loss in prospective production of about 100,000,000 bushels. In the South, Georgia lost about 3,000,000 bushels and Washington 7,000,000 bushels.

White potatoes are expected to yield 167,000,000 bushels, or 15,000,000 bushels more than forecast from July conditions and 47,000,000 bushels more than the record crop of 1912. Sweet potatoes also will be a record with 86,400,000 bushels.

Architect RUSHING PLANS FOR HARRIS SCHOOL ANNEX. M. N. Bair, architect for the new Harris school annex, is preparing a certificate before the State Examining Board, in Harrisburg, several days ago, were successful. They are: Miss Olive Adams, Miss Martha Davis and Miss Janet Zimms. Consideration of the School Board at its meeting Friday, August 17. As soon as they are approved a contract will be let. Actual work on the annex will probably be under way by the first of September. Complete plans for the new open-air school at North Fifth street, being prepared by Architect C. Howard Leitch, is ready for approval within the next month.

Sharp Reductions in Coal Costs Are Now Predicted

Washington, Aug. 9.—Sharp reduction in coal costs was predicted by official to-night as a result of the Senate's passage to-day of the food-control bill carrying a provision for government fixing of fuel prices. The Federal Trade Commission, which the measure authorizes the President to designate as an agency to enforce the provision, is ready to make out a price scale at short notice. In a recent report to Congress they pointed out that prices are too high.

STEALS GRUNDY'S CHICKENS

Bristol, Pa., Aug. 9.—For the second time within six weeks a fox was discovered on the Joseph R. Grundy chicken farm. The fox escaped. More than \$200 worth of fowls have disappeared recently from the farm.

SCOUT TROOP ORGANIZED

Shiremanstown, Pa., Aug. 9.—A Boy Scout troop has been organized here with the Rev. H. K. Lutz as scoutmaster and Thomas Lutz, assistant scoutmaster. At present sixteen members are enrolled. Plans are being made for long hikes in the near future.

Endeavorers to Picnic at Wildwood Tonight

Christian Endeavorers and friends of the Harris Street United Evangelical Church will leave Sixth and Market streets this evening, at 7 o'clock, for a hike to Wildwood Park. The monthly business session and social will be held upon arrival at the pavilion in the park. A jolly good time is anticipated by the persons who expect to attend. President R. H. Stetler will have charge of the program for the evening.

FRIDAY'S BARGAIN DAY AT KAUFMAN'S
