GIRL'S BIRTHDAY PASSES MERRILY

Third Anniversary of Little Elizabeth Leah Long Celebrated With Party

Philadelphia, Aug. 10.—To determine the best methods of increasing the 1918 crops of wheat and rye, as requested by the United States Department of agriculture, a conference was held yesterday between the State farm advisers and members of the food supply department of the Council on War Reliefs.

The guaranteed price for wheat for the 1918 crop, that it will be an excellent investment for the farmer to follow the recommendations for increased crop where practicable is asserted by Director Howard Heinz who said: "The wheat acreage now is 1,457,000 acres, and the Government wants to increase it to 2,000,000 acres. This would mean an increase of 350,000 acres. All increases, however, are possible without upsetting the farm practice of crop rotation, which must be maintained in this and succeeding years, as well as in the interest of spring-planted crops."

There is some shortage of fertilizer, but no general shortage of supplies of seed and farm machinery. A material increase in wheat acreage is recommended in most areas where the production of wheat is not heavy, since wheat can be sown to advantage on oats stubble, in standing corn or from which corn has been removed for the silo or cut for fodder. Rye succeeds in poorer soil and in a colder climate than wheat. It should be planted in preference to wheat when the soil is poor.

Use Coconut Oil For Washing Hair

If you want to keep your hair in good condition, be careful what you wash it with. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just put a misfused coconut oil (which is pure and entirely greaseless), is much better than the most expensive soap or anything else you can use for washing the hair.

Farmers Without Water When Spring Goes Dry

Chambersburg, Pa., Aug. 10.—During Wednesday night the famous Blue Spring near Mercersburg, Pa., disappeared. Farmers say the "bottom fell out." Six large farms along its course, from Licking Creek depended on it for their supply. The spring was thirty feet wide and its depth could never be sounded, while its deep blue color, when cooling into the depth, gave the name. The flow never varied in wet or dry weather since anybody living can recall.

If you want to keep your hair in good condition, be careful what you wash it with. Most soaps and prepared shampoos contain too much alkali.

Simply moisten your hair with water and rub it in. One or two teaspoonfuls will do an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and moves every particle of dirt, mud and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get misfused coconut oil at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.—Advertisement.
