the way to win is to meet the people, talk to them frankly and openly about the conduct of municipal affairs and invite support on the score of efficiency and the desire to serve in public station for the sake of service.

or efficiency and the desire to serve in public station for the sake of service.

City Assessor James C. Thompson is alllowing no grass to grow under his feet in the canvass for City Commissioner. He is intimately acquainted with municipal affairs and believes he can give the city good service in the council. As one of the "Big Five" it is his judgment that each man should be on the job in view of the growing need of personal attention to the affairs of administration. As the assessor of the city he has a wide acquaintance and will undoubtedly cut a big figure in the primaries.

Use Large Piece Of Ice

C HOULD your refrigerator accommodate a large piece of ice, it is false economy to try to get along with a minimum

The larger the piece of ice you keep in the ice box, the less ice you will use, for the simple reason that the larger piece makes lower temperature which arrests meltage.

The small investment of plenty of ice is far, far, cheaper than spoiled food.

Try keeping the ice chest well filled. Never permit it to get less than one-quarter full, better still, one-half full.

You will be surprised at the results. Fruits, vegetables and other food products will keep longer and be more nutritious—and the season's ice bill will not be increased.

Buy ALSPURE ICE, it is made from water that has been filtered, boiled, reboiled, skimmed, and again filtered.
