TEN ATTEMPTS TO ROB STORE

Determined Thief Persists in Efforts to Enter Funkhouser Building at Gettysburg

Gettysburg, Pa., Sept. 11.—Another unsuccessful attempt was made last night to enter the Funkhouser store in Center Square, but, like former attempts, the thief was scared away before gaining an entrance. Twice he has been seen and fired at, but succeeded in eluding his pursuers. It is believed the man belongs to the gang that has been operating in nearby towns, and it is also likely that he is the person that entered the Eagle Hotel and Eckert's store in broad daylight. At the Eagle he was in the room of the proprietor and took a gold watch and chain belonging to Mr. Clement and about \$40 in gold which was in Mrs. Clement's purse. Another woman, which stands right at one of the windows, and had in her room until claimed by the owner was also taken. At the Eckert store the safe was opened, which stands right at one of the windows, and took several bags of money, supposed to have contained about \$80.

WHAT IS YOUR CHANCE OF BEING KILLED IN THIS WAR?

If you, a drafted man, believe that statistics tell the truth, you will feel as safe in France as you usually do in the streets of New York. So says Roger W. Babson, the eminent statistician. Furthermore he says that the man who is connected with the heavy field artillery is no more likely to be killed than one in the employ of a railroad. However, he does not hold out such high hopes for the lieutenants, sergeants and corporals, the death rate being very much greater among officers than among privates. Also, the mortality is higher among volunteers than conscripts among drafted men. Sixty men per thousand are now being killed in the war, and about one hundred and fifty men out of each thousand are wounded.—Popular Science Monthly.
