

LIBERTY MOTOR IS GREAT NEW U. S. INVENTION

Will Furnish Power to Sweep Boches From the Sky Washington, Sept. 13.—The greatest American achievement of the war is declared to be the new airplane engine, completion of which was announced by the Secretary of War to-day. It is to be called the Liberty motor.

It is an engine that equals in effectiveness if it does not excel all the British and French engines. Its parts have been so standardized that manufacture is possible in a great number of factories all at the same time without the creation of new machinery or new plants.

The great problem of successful airplane manufacture and operation by American forces has been solved and the promise of the most effective airplane aid in winning the war is to be kept by this nation.

Product of American Genius Secretary Ball's remarkable story of the development of the engine follows: "The United States aviation engine has passed the test. They were successful and gratifying. The new motor, designated by the signal service as the 'liberty motor,' is now the main reason for the success of the United States in the rapid production of large numbers of high-powered battleplanes for service in the war.

NAME REGISTRARS FOR RIVERSIDE County Commissioners Take First Step For Voting in Fourteenth Ward

Although the county commissioners are not yet decided whether the voters in Riverside, the Fourteenth ward of the city, can ballot for city candidates next Tuesday, they appointed Allen G. Yabo and William F. Lutz as registrars for the new election district.

Voters must register on Saturday. Chief Clerk Ed. H. Fisher announced it is probable the commissioners will take definite action to-morrow and decide whether the voters may ballot for only ward officers or for the full list of city and county candidates. Both official and specimen ballots have already been printed for the new ward it was announced.

City officials have no action on the election question leaving it entirely to the judgment of the county commissioners.

Red Cross Forwards Supplies to France The workrooms of the Red Cross in Walnut street will be open on Tuesday for the first time since October. The exact date will be announced later.

Two cases of surgical bandages and various articles sent to France by the local chapter. Although the Red Cross is shipping a good amount of work to France, more workers are needed in order to handle the amount of work that is asked by the Washington office.

BRITISH IMPORTS GROW London, Sept. 13.—The British Board of Trade figures for August show a remarkable increase in imports of 24,475,000 pounds. Of this sum 10,000,000 pounds was in food, 7,000,000 pounds in raw materials, and 7,475,000 pounds in manufactured articles.

APPOINTED INSPECTOR The court to-day appointed George T. Burnett majority inspector of elections for the Fourth precinct, Tenth ward, to succeed the late Edward Saul.

was the aid rendered by consulting engineers and motor manufacturers who gave up their trade secrets under the emergency of war needs. Realizing that the new design would be a government design and no firm or individual would reap selfish benefit because of its making, the motor manufacturers nevertheless patriotically revealed their trade secrets and made available trade projects of great commercial value.

These designs have also contributed the services of approximately two hundred of their best draughtsmen.

"The two engineers locked together in a hotel room in this city promised the government if given an opportunity they would design a satisfactory engine before a working model could be brought from Europe.

A remarkable American engine was actually produced three weeks before any model could have been brought from Europe. It was promised that this engine would be developed before the Fourth of July. Twenty-eight days after the drawings were started the new engine was set up. This was on July 3.

"In order to have the engine in Washington and in actual operation at the nation's capital on Independence Day, the perfected engine was sent from a western city in a special express. The journey was made in twenty-one hours and four young men guarded the engine en route to Washington and personally attended to its transfer from one railroad to another.

"With the need for speed as an incentive, tools for building the first engine were made even before the drawings were finished, on the assumption that they would be correct.

Made in Many Factories "Partly co-operated in the development were turned out at twelve factories, located all the way from Connecticut to California. When the parts were assembled in the government plant, there was no time for the perfect and the performance of the engine was wonderfully gratifying.

This in itself demonstrates the capability of the American factories when put to the test and when thoroughly organized for emergency work of this sort.

COMPANY C IS ANOTHER GUARD UNIT IN WHICH HARRISBURG BOYS PREDOMINATE

Above is shown Company C, of Chambersburg, which left Tuesday for Camp Hancock. The company is composed mainly of Harrisburg men, recruited by Captain H. M. Stine, of this city.

Living Models Display Women's Fall Attire at Astrich's Store

The new fall styles were ushered in to-day at the Astrich store at 303 Market street in a most charming manner. Living models specially engaged for the occasion from one of New York's best houses promenaded on the first floor of their new store this afternoon from 2.30 to 4 o'clock displaying an entrancing array of suits, coats, dresses, millinery and shoes the women of Harrisburg and vicinity have, as yet, been privileged to see.

The suits shown were models of artistic designing and are mostly made of silvertone, broadcloth, Pol-

ret twill, serge and poplin. The coats are the most charming ever presented by Astrich's and represent the best American ideals of coat making, together with truthful reproductions of imported creations. pompon, patagonia cloth, velvet, velour de laine, silvertone and broadcloth, many embellished with beautiful furs, are the most favored coating materials. The dresses shown were a most delightful concoction of crepe de chine, crepe metzer, georgette crepe, serge and satin.

Hats are big, little and middle-sized—so that any size hat is quite in style. One of the most popular models shown is the smart turban, many of them having the Russian military tendency, with high fronts and high wings and bows at the back. Another distinctive and exclusive Astrich hat is the "Jeffre

Tam," made of Lyons black velvet with a visor front peak, medium high crown with silver ribbon strapped through forming bow in back. As to shoes, all that is new in style and leather both in plain and novelty effects was shown. Another display by the living models will be held this evening from 7.30 to 9 o'clock. Music will be furnished by the Sarah Lemer Orchestra in the millinery department, second floor, from 7.30 to 10.

COURT POSTPONED Because of the cool weather it was decided again to-day to postpone the morning session of court. Judge McCarrell deciding to hear additional facts this afternoon in the equity suit between Jacob Tausig's Sons and Samuel Fishman.

Sixty More Pupils at Continuation School

With an enrollment of sixty more boys and girls this year at the city continuation school, at Sixth and Forster streets, the School Board has started a new class for girls. Last year classes for girls were held on three days of the week, but because of the large number now attending there are classes on four days.

Believes Superintendent Should Be Appointed Deputy Attorney General Keller to-day gave an opinion to Representative H. M. Showalter, of Lewisburg, representing the board of managers of the State Village for Feeble-Minded Women to the effect that the board should appoint a superintendent before proceeding with the building of structures contemplated by the appropriation of 1917.

Mr. Keller says that the act indicates that the Legislature thought that the advice and experience of a superintendent would be of benefit in the construction and equipment of the establishment. The first superintendent is not in employ of the board now as the funds for the initial construction were exhausted some time ago and the village received no money. The last Legislature made an allowance for building.

Directors to Get Plans for School Remodel A special meeting of the School Board has been called to-morrow afternoon at 3.30 o'clock when the preliminary plans for alterations to the Camp Curtin school building to convert it into a junior high school will be presented by I. Kast, the architect.

Because of the action of the majority of directors on the board giving the junior high school plan to three different architects there is much interest in the plan which will be submitted to-morrow. Next Friday at the regular meeting bids for the new open air school will be opened. Action may be taken also on the selection of a site for the new girls' high school.

If you want health you certainly need BEECHAM'S PILLS

Directions of Special Value to Women are with Every Box. Sold by druggists throughout the world. In boxes, 10c, 25c.

Dives, Pomeroy & Stewart

Every Friday Special Means a Saving: Read the Offerings For Tomorrow
