

# EDISON TELLS WHEN A MAN IS EDUCATED

### Famous Inventor Says Men Should Keep in Touch With Affairs of the Day

Discussing "what constitutes an education," Thomas A. Edison said a man is educated when he is "somewhat familiar with every branch of the environment in which we live—social, commercial and scientific."

This holds out hope to the young people struggling upward in the world to-day. They can educate themselves. No better and more concise fund of information is held out to men and women, boys and girls to-day than the New Universities Dictionary, now being distributed to readers of this paper. This dictionary condenses the most of the information concerning the world's present-day activities. It is more than a vocabulary, more than a mere list of words—it is a complete inventory of to-day's English.

This paper's offer of this remarkable book has proven to be highly popular. The demand for the dictionary continues with increasing force. Already new supplies have been ordered, and the publishers say they have equal demands from other cities, making it hard for them to keep up with orders. Since this is purely an educational offer, and the books are given out at nominal expense, the mere cost of handling, the time limit will soon be reached, and readers are urged to get their copies without delay.

## Quebec Bridge in Place After Two Disasters

Quebec, Sept. 21. — The central span of the Quebec cantilever bridge was successfully hoisted yesterday afternoon at 3:28 o'clock, linking together the arms of the largest bridge of its kind in the world.

The hoisting operation began last Monday morning, and the span, which weighs 5,000 tons, was lifted by hydraulic jacks a distance of 150 feet from pontoons on the St. Lawrence river.

Yesterday's work brought to an end the critical part of the operation, virtually completing the structural part of the bridge. An effort last night to raise a similar span in place resulted in disaster when the link slipped from its supports, causing fourteen deaths, and in 1907 a bridge in the same place collapsed when it was virtually complete, killing seventy.

The successful completion of the bridge will mean the fulfillment of a fifty-year engineering dream. It will be some months before trains can be run over the structure, as there is much detail work to be carried out. The running time between Halifax and Winnipeg will be reduced half a day. One detail is the painting of the bridge, which, it is estimated, will take three years and cost \$35,000.

## NEW AUTOMATIC LIGHT BUOY MAKES OWN ELECTRICITY

Because an automatic light buoy designed by an inventor of marine apparatus produces its own electric current and demands only casual attention, the cost of maintaining it amounts to practically nothing. Its mechanism is not complicated. A vertical shaft mounted on ball bearings is actuated by a weighted horizontal arm that swings back and forth when the buoy is rocked by the waves. The motion is transmitted through gears to a high-tension magneto. Each time the weight swings either to the left or right the generator makes a few quick turns and develops a strong spark that passes through a gas-filled glass tube and produces a bright flash of light. Obviously the strength and frequency of the flashes increase as the sea grows rougher. The prismatic outer cylinder of the lamp is red, blue or any desired color. There is no filament in the gas-filled tube. —Popular Mechanics Magazine.

## WORLD'S TALLEST CHIMNEY COMPLETED IN JAPAN

In many cities in various lands are chimneys which have been proclaimed as "the tallest in the world," but the structure which, without doubt, truly possesses this title has recently been completed in Sagami, Japan. It is of reinforced concrete and stands 570 feet high, on a hill 430 feet higher than the copper smelter with which it is connected, so that it discharges its poisonous fumes 1,000 feet above the plant. The chimney is 42 feet in diameter at the base and its inside diameter at the top is 12 feet. The foundation is 95 feet in diameter and contains 2,700 cubic yards of concrete. The first 150 feet of the chimney has a concrete lining separated from the outer wall by a 3-inch air space. Four hundred tons of steel were used in the whole construction. Popular Mechanics Magazine shows the comparative height of the Woolworth building with this huge structure.

## Caught A Cold And It Hung On

### Couldn't Seem to Shake It but Tanlac Quickly Chased It—Feels Fine Now

Harry Buxton, the well-known barber at the Royal Shop, 12 North Third Street, Harrisburg, Pa., caught a cold. A nasty, clinging cold. The kind that gets a man on a man and makes him feel as if life wasn't worth living and everything was a burden and try as he would he couldn't get rid of it.

He says: "I woke up one morning and found that I had a hummingbird of a cold. It had me for fair. I felt as if I had been beaten up, and I didn't care a whoop which team won the pennant. I dosed myself in the usual way but old Mr. Cold he hung right on and refused to budge. "I did everything I could to chase him, but nothing doing, he stayed right on the job morning, noon and night, and he got me worried. I was feeling pretty mean and just a bit worried.

"Then I happened to hear about Tanlac and I thought I'll give it a trial, maybe it will do the trick and believe me it did. And it did more than rid me of this cold for it has made me feel about 100 per cent better than I usually do. I'm in great shape, wonderful appetite, sleep fine and feel energetic all day long. Tanlac is sure great stuff."

Tanlac, the famous reconstructive tonic, is now being introduced here at Gorgas' Drug Store, these enterprising druggists having secured the exclusive sale of this masterpiece in Harrisburg.

Tanlac is also sold at the Gorgas Drug Store in the P. R. R. Station, in Carlisle at W. G. Stephens' Pharmacy; Elizabeth City, at H. W. Cain; Greencastle, Charles B. Carl; Middletown, Colin S. Few's Pharmacy; Waynesboro, Clarence Croft's Pharmacy; Mechanicsburg, H. F. Brunhouse.—Adv.

# Announcing Our Autumn Styles Display

Millinery Styles That Fashion Has Commended & Women Have Approved

Daily Arrivals of Outer Apparel Styles For Women

This is a season of individuality in millinery, and this opening display with its great showing of more than a thousand diversified styles has not overlooked one fashion note of importance

For instance there is a "Sammy" model from Halsey, an exact duplicate of a Paris hat that just came over and shows the favor our soldier boys have won in the hearts of the French people.

Towering Turbans — an alliteration that does not exaggerate the height of these smart modes with their lofty trim of cock feathers or soft velvet folds.

Hats of velvet — black predominating—for every type — hats of every size. At a very modest price our hats at \$10.00 and \$12.00 reflect the Paris modes that sell in New York and Philadelphia at triple and quadruple these prices.

## Charming New Fall Waists

- Many of the new waists show high collars.
- Linen tailored waists with high neck of white pique, patch pockets and cuffs, trimmed with pique ..... \$2.95
