

### BUSINESSMEN ASK U.S. TO FIX ALL WAR PRICES

#### Industries Undismayed at the Prospect of Greatly Increased Taxes

By Associated Press  
Atlantic City, N. J., Sept. 21.—Government price fixing of all essential products, not only in sales to the government but to the public as well, was recommended in resolutions adopted today at the closing sessions of the War Convention of American Businessmen. The convention advocated legislative creation of a general government purchasing department which in addition to fixing prices would have power to distribute the output of industries in a manner most necessary to the conduct of the war.

**Propose New Board**  
The purchasing department proposed would absorb the present war industries board and the functions of the director of priority. The present power of the government to control priority of shipment would be extended to include authority to direct priority of manufacture, sale and distribution. All buying now done by various bureaus of the War and Navy Departments would be centered in the new board. The convention recommended assisting the government in making purchases, the formation of a general committee of industry, representing all branches of business, which would aid the government in apportioning orders. This committee would handle much of the work now done by committees of the Council of Defense.

**Attitude Defined**  
The attitude of business toward

labor was defined in resolutions recommending that labor standards remain unchanged and that a labor adjustment board be named to handle all major disputes. The declaration was made for industry that it endorses a policy of no lockouts or strikes while differences were before the board and labor was urged to take a similar stand.

A general declaration of the policy business will pursue toward the government and its war needs sets forth that "undismayed at the prospect of great taxes, facing the consumption of its accumulated savings, American business without hesitation, pledges to the government full and unqualified support in prosecution of the war until Prussianism is utterly destroyed. The convention will dedicate to the nation every facility it has developed and every financial resource at its command on such terms and under such conditions as our government shall determine to be just."

**Does Widespread Good**  
No conference on the national defense and the problems growing out of the world war has been so potential in its practical discussion of the questions involved as the war convention here of American business under the direction of the United States Chamber of Commerce. As usual, Harrisburg is having its part in this important work as it has had in the mobilization of the National Army. Among the delegates are David E. Tracy, president of the Harrisburg body; J. William Bowman, an ex-president; E. J. Stackpole, member of the national organization; and a delegate, E. D. Hillyer, T. P. McCubbin, George S. Reinhold, and John C. Motter.

Intense patriotism has pervaded the sessions and notes can doubt the determination of the businessmen of the country to see the war through to a successful finish.

#### AUTO LOCK HAS ALARM AS AN ADDED FEATURE

A thick triangular block, to which a strong U-shaped metal member is attached, constitutes a new type of automobile lock. To protect a car the U-shaped part is clasped about the tire and rim of a front wheel, and then the two parts are snapped together like a padlock. A key unlocks it, but if it is tampered with, a gong begins to ring. The lock is shown in the October number of Popular Mechanics Magazine.

### TOBACCO FUND DRAWING NEAR THE \$200 MARK

#### Several Patriotic Citizens Pledge Selves to Contribute \$1 Weekly During War

Americans who have been in Europe know how difficult it is to get good smoking tobacco, the kind to which their palates have been educated.

To an American no tobacco is as good as the weed that is grown in the States, and to the soldier no substitute will do—it does not satisfy the hunger.

The fund which the Telegraph has started has been steadily growing day by day, but there is no limit to reach, no place to stop, the boys need this weed, and if they need it it must be given to them. For upon these soldiers depends the country, and upon the tobacco the boys depend.

#### DISCOVERY OF NEW POWER A BIG WAR SECRET

Transmission of power by a method hitherto unknown is the interesting subject of an article in the October number of Popular Mechanics Magazine. This discovery is now being utilized by the British War Office and Admiralty. After the war it will be available for general use by all power users and it is said will completely revolutionize prevailing systems.

#### LEAPS INTO BLAZING POOL AND RESCUES CHILDREN

A courageous young man who gallantly went to the rescue of three helpless children trapped in a motorboat which was surrounded by a blaze of ignited gasoline, is the hero of an exciting account in the October issue of Popular Mechanics Magazine. How he solved the difficulty of their rescue is picturesquely described and illustrated.

### STAMPEDE FOR THE SMOKES FROM HOME

The boys can almost smell the tobacco before the motor draws in the cigarette for a charge. There's nothing that pleases our boys more particularly fond of American prepared tobacco.

### Y. M. C. A. WILL TEACH SPANISH

#### Plan Other Activities; New Boys' Secretary Arrives Late Today

ARCH H. DINSMORE

The Y. M. C. A. will begin a course of lessons in Spanish, at the club-rooms, Tuesday night, October 2. There will be a very moderate tuition fee charged for the lessons.

The first meeting of the committee on social activities met in the Y. M. C. A. last evening. The meeting was for the purpose of organizing and planning social activities of the association, for the coming winter. The committee in charge is composed of Walter E. Dietrich, Frank C. Poole, Harry C. Hoffman, D. D. Stambaugh, Earl W. Killinger and J. Harris Bell. Commencing Saturday evening, September 23, there will be a series of "Open House" Saturday night entertainments given in the building. Early in October, the Y. M. C. A. will give a housewarming in honor of the finishing of the remodeling of the clubhouse.

#### STEEL SHIELD PROTECTS ADVANCING SOLDIERS

No single instrument of destruction is playing a more vital role in the present war than the machine gun. To deprive Germany of this weapon by offsetting its effect is the purpose of an inventor who has developed a bullet-proof fighting shield that is perhaps worthy of study. The device is a wedge-shaped steel shelter mounted on one front and two rear wheels and intended to accommodate 10 infantrymen. The shield is designed to be folded flat and carried through the communication trenches to the firing line, where it could be assembled quickly under cover of darkness, ready to protect Sammies, Tommies and Pollus during an early morning advance across "No Man's Land." Popular Mechanics Magazine contains further details of this interesting contrivance.

#### MILITARY MOTOR TRUCK IS AT HOME IN WATER

Amphibious automobiles are not altogether unfamiliar contrivances, but the latest motor trucks designed especially for military purposes are far from usual. Such a machine has been developed and the Popular Mechanics Magazine contains photographs and a description of it. There is reason to believe that it will in time see the battlefields of France. It has behaved well in recent tests and inspired considerable confidence in the minds of those who have seen it perform. While carrying a dozen passengers, the car has been driven into rivers and lakes and crossed the same as a motorboat. It is scouting parties and others operating in advance of an army. It is thought that the car should prove immensely useful, especially in view of the fact that the enemy in retreating never leaves bridges standing.

#### HEAD-ON TRAIN COLLISION AT END OF SIGNAL BLOCK

A recent head-on collision of two freight trains has furnished a parallel in railway history in that it occurred at the point where two block signals were located to mark the division between block sections on a track which was used for trains traveling in opposite directions. The two trains, as shown in the Popular Mechanics Magazine, met almost exactly at this deadline, because one entered the block only five seconds after the other had entered the adjoining block. Other factors contributing to the accident were the facts that the dispatchers' orders were defective and that a heavy fog obscured the right of way. Each train was drawn by two big locomotives. Two men were slightly injured in the crash.

#### ARTESIAN WELL BURSTS FORTH FROM ITS CASING

An artesian well that has been a source of trouble to the village of Sheldon, N. D., ever since it was drilled 15 years ago, burst out of its casing recently and threatened great damage to the community. The well was 780 feet deep and incased by a 4 inch iron pipe, the original pressure of water at the bottom being 80 lb. to the square inch. An overflow outside the casing soon after the well was connected with the waterworks system, flooded several square miles of surrounding farm territory, and the village was still fighting damage suits brought by farmers when the latest outbreak of water occurred. This time the well pipe sank out of sight and a cavity 80 feet in diameter opened up, the water being in violent motion for two days. Soundings showed the crater to be 70 feet deep at the point where the well pipe disappeared. A view of the flooded district caused by this misfortune is shown in the Popular Mechanics Magazine.

### Defensive Measures in U-Boat Warfare Prove to Be Very Successful

By Associated Press  
London, Sept. 21.—The press association hears on high naval authority that the new defensive measures against submarine warfare are meeting with success, justifying the hope of a further reduction in the losses and says it can be started on official authority that the results of the methods adopted in the past month give cause for growing confidence.

#### SALVATION ARMY SERVICES

Special services will be held by the Salvation Army in the hall at 469 Verbeke street, this evening. Major and Mrs. F. E. Campbell will be in charge.

### Russia to Turn Alcohol Into Useful Products

Petrograd, Sept. 21.—With a view of promoting temperance permanently, the Provisional Government has ordered that all supplies of alcohol at distilleries and on licensed premises shall be used for the manufacture of vinegar and mineral waters. These products, it is specified, shall not contain more than 1 per cent alcohol.

#### PROMINENT SPEAKERS SECURED

Marletta, Pa., Sept. 21.—The Lancaster County Teachers Institute, which meets in November, is already arranging their program. Ex-president William Howard Taft, Governor Frank B. Willis, Ohio, and H. D. Pess, of Ohio, are among the speakers already secured.

#### MRS. JOHN BRINER DEAD

Marletta, Pa., Sept. 21.—Mrs. John Briner, a well-known resident of West Donegal, died Tuesday night,

aged 50, from a complication of diseases. She was a member of the Briner Brethren Church, which was organized by her father. She is survived by her husband.

#### MOTHER OF TWELVE DIES

Marletta, Pa., Sept. 21.—Mrs. Susan Morrow, 65, died from the effects of a fall sustained several days ago. She was a member of the Menonite Church and taught in the Sunday school. She is survived by her husband, twelve children, three brothers, a sister and a number of grandchildren. She was Miss Breneman, one of Lancaster county's oldest families.

#### ELLIOTTSBURG

Miss Ethel Kistler and sister, Miss Bella Kistler, have returned home after spending some time at Harrisburg. Miss Kizzie Kistler, of Harrisburg, is the guest of relatives here. Mr. and Mrs. John C. Stambaugh, of Pittsburgh, and Levi Shearer, of Swissdale, are spending some time here.
