The car was running slowly at the time and the driver turned too short and upset. The occupants were caught beneath the car and all managed to crawl out except Norman, who was crushed to death. Dr. Gardner Taylor of Columbia, happened along about five minutes after the accident and helped the unfortunate party jack up the car to extricate the boy. In some sections the crop is the largest in many years, many having to build additions in order to properly house the crop. The prices of the tobacco ranges from twenty cents up for the best and as high as eight cents for the ground leaves. Many sold while their crops were standing in the fields.

MILES OF TRACKS IN NEW YARDS

Each Line in P. R. R. Classification Extension Will Hold 200 Cars

Marietta, Pa., Sept. 24.—That the new railroad improvement is no small matter to the people of Marietta and vicinity was experienced when it was rumored that a number of houses are going up in Marietta and in the township, in order to provide room for the railroad men that will be given employment as soon as the work in the new classification yards is completed, and that they will not have far to go to work, if the houses are not available in Marietta they will have to live in Columbia or some other nearby place, and this will handicap many in their work.

The new yard will contain seven pairs of tracks, or fourteen single tracks of more than a mile in length, and between the tracks a space of not less than seventy feet will be left on which to store the freight and products handled by the company. The freight will consist of pig iron, structural iron, steel, ties, etc. Each track will have a capacity of not less than 200 cars, and at the Marietta and Wild Cat ends will be a ladder track so that incoming and outgoing trains can enter and be handled. This will be done at the RR tower at Marietta. A large electric crane or other apparatus will be used to handle the freight.

The object of the company in arranging for this big yard is to have a place for the freight until ships can be secured for foreign ports. A large concrete water tank with a capacity of 35,000 gallons, is being erected, and the water will be supplied by the Marietta Gravity Water

Company. The time consumed for an engine to draw water will be about two minutes to fill. The barn on the Miller Grove farm is being equipped for the stabling of horses to be used by Galla & Company, the contractors, and a carload of horses arrived on Friday.

RED MEN'S CONVENTION

Most Old People Are Constipated

The wear of years impairs the action of the bowels. As people grow older they restrict their activity, neglect to take sufficient exercise, and indulge a natural disposition to take things easy. The digestive organs become more sensitive to the demands made upon them and rebel more quickly. It is of special importance to the health of elderly people that the bowels be kept normally active. A mild, yet effective, remedy for constipation, and one that is especially suited to the needs of old folks, women and children, is the combination of simple laxative herbs with pepsin sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin. It costs only fifty cents a bottle, and should be in every family medicine chest. A trial bottle, free of charge, can be obtained by writing to Dr. W. B. Caldwell, 456 Washington street, Monticello, Illinois.

MILITARY ROADS

Resolution Adopted by Chamber of Commerce of the United States, in Convention at Atlantic City, September 21, 1917:

WHEREAS, It is essential that all the transportation facilities of the nation should be brought to the highest state of efficiency in order that foodstuffs may be moved most economically from the farm to the market, that manufactured products be moved at the lowest cost from the factory to the consumer, and

WHEREAS, The Public Highways offer a good, prompt and economical means to supplement transportation by rail and water, therefore

BE IT RESOLVED, That the prompt improvement of our Public Highways is important and should be forwarded in every proper way.

Realizing the transportation congestion crisis, this was one of the most important resolutions passed by the Chamber of Commerce of the United States.

Motor trucks are ready at hand; the roads of the nation must be immediately developed and improved.

A Federal Highway Board is urgently needed.

This resolution deserves wide publicity — and to help we are publishing it throughout the country in place of our scheduled advertisements.
