CHAPTER XII
In Which There is a Further Clash.

One can only suffer so much. Poignant feeling brings its own anaesthetic. When Stella Fyfe fell into a troubled sleep that night the storm of her emotions had beaten her sorely. Morning brought its physical reaction. She could see things clearly and calmly enough to perceive that her love for Monohan was fraught with factors that must be taken into account. All the world loves a lover, but her world did not love lovers who kicked over the conventional traces. She had made a niche for herself. There were ties she could not break lightly, and she was not thinking of herself alone when she considered that, but of her husband and Jack Junior, of Linda Abbey and Charlie Benton, of each and every individual whose life touched more or less directly upon her own.

She came down to breakfast calmly enough.

She told herself that in first seeking the line of least resistance she had manifested weakness, that since her present problem was indirectly the outgrowth of that original weakness she would be weak no more. So she tried to meet her husband as if nothing had happened, in which she succeeded outwardly very well indeed, since Fyfe himself chose to ignore any change in their mutual attitude.

She busied herself about the house that forenoon, seeking deliberately a multitude of little tasks

to occupy her hands and her mind. But when lunch was over she was at the end of her resources. Jack Junior settled in his crib for a nap. Fyfe went away to that area back of the camp where arose the crash of falling trees and the labored puffing of donkey engines. She could hear faint and far the voices of the falling gangs that cried, "Tim-ber-er!"

She longed for some secluded place to sit and think or try to stop thinking. And without fully realizing the direction she took she walked down past the camp, crossed the skid road, stepping lightly over man lines and haul back at the donkey engineer's warning and went along the lake shore.

A path wound through the belt of brush and hardwood that fringed the lake. Not until she had followed this up on the neck of a little promontory south of the bay did she remember a shock that she was approaching the place where Monohan had begged her to meet him. She looked at her watch. Two-thirty. She sought the shore line for a sight of a boat, wondering if he would come in spite of her refusal. But to her great relief she saw no sign of him. Probably he had thought better of it. He was now as she had seen then that no good and an earnest chance of evil might come of such a clandestine meeting, had taken her stand as firm.

She was glad, because she did not want to go back to the house. She did not want to make the effort of wending away in the other direction to find that restful peace of woods and water. She moved up a little on the point until she found a mossy boulder and sat down on that, resting her chin in her palms, looking out over the placid surface of the lake with somber eyes.

And so Monohan surprised her. The knoll lay within a few steps of her when a twig cracking underfoot apprised her of some one's approach. She rose, with an impulse to flee, but she stopped. She was not desired. And as she rose the breath stopped in her throat.

"Twenty feet behind Monohan came Jack Fyfe with his hunter's stride since her position she found herself drooping in the crook of his arm. A sunbeam striking obliquely between two trees showed her his face plainly, the faint curl of his upper lip.

"What did I say to you yesterday?" Fyfe opened his mouth at last. "But then I might have known I was wasting my breath on you!"

"What?" Monohan returned, indignantly, "what are you going to do about it? This isn't the stone age."

Fyfe laughed unpleasantly.

"I'm lucky for you. You'd have been smothered long ago," he said. "It takes the present age to produce such rotten specimens as you."

A deep flush rose in Monohan's cheeks. He took a step toward Fyfe, his hands clenched.

"You wouldn't say that if you weren't armed," he taunted hoarsely.

"No?" Fyfe cast the rifle to one side. It fell with a metallic clink against a stone, and he said, "No, you see. You are a sort of a yellow dog, Monohan. You know it, and you know that I know it. That's why it stings you, to be told so."

"I'll teach you something!" he snarled.

He lunged forward as he spoke, shooting a straight arm blow for Fyfe's face. It swept through empty air, for Fyfe, poised on the balls of his feet, ducked under the driving fist and slapped Monohan across the mouth with the open palm of his hand.

"Tag," he said sardonically. "You're it."

(To be continued.)

Cuticura Healed Bad Case Dandruff Total Cost \$1.00

Dandruff Thick and Had Moisture in It. Scaled Off on Clothing. Scalp Itchy and Hair Dry and Thin.

"Scaly dry dandruff began on my scalp and later on it became thick and had more moisture in it. It scaled off, and could be seen on my clothing, and all I could do was scratch all the time. My scalp was so itchy I always had it bleeding, and I lost a great deal of sleep. My hair was dry and thin. My head was disfigured."

I saw an advertisement for Cuticura Soap and Ointment, and I bought them, and after using one box of Cuticura Ointment and two cakes of Soap I was healed. (Signed) Miss Blanche Taylor, 11 Lincoln St., Ema, Pa., Mar. 9, 1917.

Use Cuticura Soap for toilet purposes, and then, by touches of Cuticura Ointment to soothe and heal any tendency to irritation, redness or roughness of the skin or scalp. By using these delicate, fragrant super-creams emollients for all toilet purposes you may prevent many skin and scalp troubles becoming serious.

For Free Sample Each by Return Mail address post-card: "Cuticura, Dept. H, Boston." Sold everywhere. Soap 25c. Ointment 25 and 50c.

All's Well That Ends Well

By JANE McLEAN

"How much are you going to save?" asked her mother practically.

"Why, I hadn't thought very much about it."

Mrs. Fairfield was silent. She did not like to suggest to Ruth that she really ought to save a tidy little sum out of her salary of \$25 a week, and yet she knew that Ruth was needlessly extravagant.

"Your father and I don't ask you to pay board, Ruth," her mother said faintly, "but we do expect you to save."

"Oh, now, mother, don't begin that, please. You begrudge every thing I've needed and gone without for so long. 'Pretty things, mother, that the other girls have had and I've gone without.'"

Mrs. Fairfield thought of her own made-over clothes and sighed. She asked so little for herself, and she wanted everything for Ruth. She knew, too, that it was the old, old story of starved youth. Ruth had gone without for a long time, and now that real worth had brought at last the worth while position to her, surely the poor child need not be blamed for not wanting to think of saving the first thing.

And so Mrs. Fairfield said no more. She watched Ruth, pretty and radiant, spend her weekly salary in the pretty clothes the girl's heart longed for. She made no mention of the money she was spending, and she let her father to expositulate.

To be sure, Ruth was not selfish in her happiness. She bought her mother many pretty things with the money that Mrs. Fairfield would rather have seen in the bank, and which finally was the cause of the action that Mrs. Fairfield took.

Ruth had been buying her mother pretty things for some time, when she was suddenly and unexpectedly given her position as a dressmaker. Ruth had learned a lesson and would profit by it, she was satisfied.

After all, mothers are rare and wonderful things, often unappreciated and always unselfish.

DAUPHIN MAN ENLISTS IN NAVY

Dauphin, Pa., Oct. 6.—Harman Eschenhour, son of John Eschenhour, of Red Hill, has enlisted in the United States Navy. He will report at Harrisburg to-day, but does not know where he will be sent.

Parker W. Buffington, of Middle Paxton township, was among the number of selected men and left to-day for Camp Meade, Admiral, Maryland.

WANT TO RELAY TRACK

New Cumberland, Pa., Oct. 6.—The Valley Railway Company has asked permission of the borough council to relay the car track through the borough. The company wishes to place an entire new track through the borough, and the council will be taken at the next meeting of council.

WAR RECIPES

—cup; —teaspoon; —tablespoon. All measures are level, and flour is sifted once before measuring.

RYE BREAD

2c liquid (half water and half milk); 2 tb fat (lard or butter) 2 tb brown sugar; 1 tb salt; 1 to 1 yeast cake dissolved in 3/4 c lukewarm water; 2 to 4 c rye flour; enough wheat flour to knead.

Scald liquid, add fat, sugar and salt; when lukewarm add dissolved yeast and enough flour to make a batter. When bubbly and foamy add enough more flour to make dough. Let rise till slightly more than doubled in bulk and make into loaves. Let this rise still longer. It should be somewhat more than twice its original size; then bake from 50 min. to 1 hour.

A combination of rye flour and wheat flour is better. Use a lighter loaf, which is more desirable than one made with rye alone.

Life's Problems Are Discussed

By MRS. WILSON WOODROW

"This is a topsy-turvy world. When I never wants what he has got. When it's cool, he likes it hot."

Every day I get letters—letters from girls, letters from men. Each is seeking his or her ideal, and they don't find it. They write to me in the hope that I may be able to lead them to the right path.

Bless them! I too am chasing ideals. So is everybody else. Mr. Rockefeller has his eye set on a golf course of par. Mr. Carnegie, intent upon diving pool, finds his millions rolling up faster than he can get rid of them. The burglar—no signifi- cance of course, to this association of names, myself, the two million- aires and Mr. Raffles—is always looking for the haul which will enable them to retire from his profes- sion and start a chicken farm.

We are all like the baby in the advertisement, reaching from his hand toward the cake of soap which lies just beyond his grasp. We strive and strive for the unattainable and feel that we won't be happy until we get it. Eternally we try to put salt on the tail of the bluebird, but eternally it fits just ahead of us.

For example, I have two letters lying before me from two men. They are a direct contrast. Each man wishes to marry. But one, although he has every other requisite, is unable to find a suitable girl, while the other, a girl, but lacks what he considers the other things needful.

Here is No. 1:

I take issue with the statement made in a letter from a young lady, which you recently published; that men prefer to marry some selfish, helpless creature, and that women, who are almost in de- spair, are glad to be rescued by a selfish, helpless kind are so much easier to meet and get acquainted with; and that the man who is not a busi- ness man, but a man of letters, is the rest. The so-called 'real women'—the capable, efficient sort—are usually a little cool and distant.

They are not. They are the best of us. They are the business-like and competent, that men are afraid to indulge in any moonshine with them, or even to be helped by them. They are the women who are almost in de- spair, and the hope of ever finding a real helpmeet.

"They do not want a 'selfish, helpless creature,' but a partner who will help them to succeed and join hands with them in building a home. The woman with a business experi- ence and a practical knowledge of life would secure the ideal type of wife for these practical men. But when we search in the ranks of business women, we are met with such curtness and indifference, that one would as soon think of man- ning an adding-machine as one of them."

Contrariwise, here is the lament of No. 2:

"I take the liberty of writing to you in regard to the very interesting subject of marriage, although to cover fully the different questions which come up under this head- ing would take more space than the whole front page of a newspaper. I replied to a number of your correspondents deal fairly well with certain phases of the topic, but there are others which you have left un- answered. Probably it is a difficult for a woman to understand a man's mind when it comes to matrimony as it is for a man to understand a woman's."

There are thirty per cent. less men being married to-day than there were fifty years ago, and the direct and unquestionable cause of this lies in the prevailing living conditions.

"Take my own case for example: I am madly in love with a girl who would marry me to-morrow if I should request it. But I cannot afford marriage as it is understood to- day. And I love the girl too much to ask her to share the life that would amount to general poverty.

"Should I marry, I would want to supply my wife with the same amusements and luxuries now are enjoyed by the other married women of her acquaintances. I would not

FIGHT FOR YOUR LIFE

Duty Demands Robust Health

Fight to get it and keep it

Fight—fight day in and day out to prevent being overtaken by ill and ails. Keep wrinkles from marring the cheek and the body from losing its youthful appearance and buoy- ancy. Fight when ill-health is com- ing with its pallor and pains, defects and declining powers. Fight to stay its course and drive it off.

But fight intelligently. Don't fight without weapons that can win the day, for without the intelligent use of effective weapons the pallor spreads and weakness grows and a seemingly strong man or woman often times becomes a prey to ill after all. You will not find this class of per- sons in the hypoferrin ranks. No unhealthy, dull, dragsy, droopy per- sons in that line. It is a class of robust aggressive men of quick-steps who view life in a joyous frame of mind and are mentally and physically equal to any emergency. Hypoferrin is a health preserver. Fight to hold the vigor of a sound body with hypo- ferrin or to stay the process of decay and restore health and strength—your health preserver. Fight to hold the vigor of a sound body with hypo- ferrin or to stay the process of decay and restore health and strength—your health preserver. Fight to hold the vigor of a sound body with hypo- ferrin or to stay the process of decay and restore health and strength—your health preserver.

Hypoferrin contains those mighty strength-producing agents, leithin- and iron peptonate, in a form best adapted to benefit the body and its organs. Vital tissues are absolute- ly necessary to the blood. In nine cases out of ten a run-down condi- tion, "all in" feeling and frail bodies are due to lack of iron and iron peptonate in the system.

Your mental and physical strength and endurance are dependent upon leithin and iron peptonate laden blood; steady, dependable nerves and a healthy, vigorous system. These you can meet life at any angle.

This wonder tonic, hypoferrin, which is as perfect as science can get to nature, meets every essential demand of the human organism. It is safe and sure and a boon to run- down, worn-out men and women. Hypoferrin means nature's own way of bringing color to the cheeks, strength to the body and keeping the vigor and buoyancy of youth. The power of perfect as science can get to nature, meets every essential demand of the human organism. It is safe and sure and a boon to run- down, worn-out men and women. Hypoferrin means nature's own way of bringing color to the cheeks, strength to the body and keeping the vigor and buoyancy of youth. The power of perfect as science can get to nature, meets every essential demand of the human organism. It is safe and sure and a boon to run- down, worn-out men and women.
