Simply choose his clothes at a shop whose very individuality stands out pre-eminently in the first rank.

In overcoats as well as in suits belters are popular—plain modes are correct, too.

A Word On Values

It is sometimes thought by people who have not as yet purchased garments at Schleisner's that high prices prevail throughout the establishment. Such is not the case. Whilst we have the finest and most exclusive modes — which are naturally higher in price than the ordinary garments — we show a most comprehensive and inclusive line of garments at very moderate prices.

Schleisner's is more able to give better garments at moderate prices than the store which has the low price and the high-price goods — and not much of an assortment in any particular line.

This is because we devote our entire time and thought to the specialization of garments and no matter whether the price is \$25 for a suit or \$150 — that garment has the Schleisner distinctiveness of tailoring and style.

After all it is real economy to purchase your garments here — even if you prefer the moderate price apparel.

The modes are ultra fashionable yet not freakish. The styles are conservative — with the utmost in correct designing and the finest in tailoring — and suitable for later as well as for present wear.
