HEAD LINEMAN'S RECKLESS FEAT

Crosses Susquehanna River on a Transmission Cable More Than 1,700 Ft. Long

Halifax, Pa., Oct. 31.—William Crawshaw, head lineman for the Millersburg Electric Light Company, will not stand for a dare from his fellow-workers even though the accomplishment of the feat might endanger his life. Recently one of his friends jokingly remarked that no living person—not even "Bill"—could cross the cable, which is 1,700 feet long and strung from the river shore here to Perry county side, by the use of his hands. "Bill" accepted the challenge and proceeded to do the trick. Fastening the snap at each end to Perry county side, by the use of a belt as a swing, he worked his way by the use of his hands the entire distance over the wire. The steel cable is 1 1/2 inches in diameter and is said to be the longest spar of electric transmission wire in Pennsylvania. It will be used to carry current from the big plant east of Millersburg to the Perry county towns to be lighted by the company.

Use of Barley Saves Wheat!

Barley has always been used in making the famous food

Grape-Nuts

There's a Reason—Barley is richer in protein (meat value) than wheat. Barley has an element that changes its own starch and wheat starch into sugar. Barley has a rich individual flavor—you've heard of barley-sugar? If you haven't tried this world-famed food, now is the time.

Eat Grape-Nuts---Help Save Wheat

ALL generations today are most suitably fitted in Society Brand Clothes—sons, fathers and grandfathers. See these better clothes at our store.
