the sleuthing ability of a prominent New York surgeon and his young lawyer friend, who rescue the physi-cian's young fiancee from the clutches of a band of criminals into whose hands she has fallen while on a shop-ping tour. Instead of turning the two culprits, who committed the crime. over to the authorities the surgeon decides that he will send them to his laboratory and use them for experi-mental purposes in the interests of medical science. When one of them dies, after being inoculated with a serum, the doctor comes under the ed with murder, and only after his fiancee has told her dramatic story, the public prosecutor, agrees to let the matter drop. The company includes: Olive Wynd-ham, Harry Mestayer, Henry Morti-mer, Kathlyn Florence Tracey, Gor-Newcombe, W. A. Norton, Hazel Burby and Ada Davis.

<text>

The same conditions confront the farmers in increasing the rye acreage but from present indications the in-crease in this crop will be even less than five per cent. From present in-dications the increased acreage will total more than 10,000 acres. "The wet weather has been a big factor in cutting down the efforts of the farmers who have planned for larger acreages in both wheat and tye. With available labor it has practically been impossible for the farmers in many sections to get their ground in condition for the sowing of the wheat and rye. The cold and wet weather which has practically followed since the frosts of Septem-ber 10 and 11 has caused great de-lays for the farmers and in every section of the state they are from two to three weeks back in their work for this time of the year. Re-ports from some sections say that many acres of corn remain uncut and in some sections it has been im-possible to get the help to dig the potato crop.

Going Out of Ready Made **Clothing Business**

We are about to terminate the clothing business. This decision was reached after careful deliberation. Rather than offer goods in the future that we cannot stand behind, we prefer to close out the reliable clothing we have on hand. As we are going to discontinue, it is not necessary to base our prices on replacement value. This alone make them better values, but we have gone a step further and made substantial reductions. You know the motive that has actuated the closing of our stock. We are going to terminate with a "clean slate." Come in and see these goods, you will probably be tempted, of your own accord to put in a supply while reliable goods are still
