WHEN YOU WAKE UP DRINK GLASS OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes anyone look and feel clean, sweet and refreshed.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must becarried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishments to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate cars but your little to the devergate of the stomach.

the stomach.

A quarter pound of limestone phosphate costs but very fittle at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion, others who have bilious attacks, acid-stomach or constipation are assured of pronounced improvement in both health and appearance shortly.

Coats and Suits That Count in Winter

Warmth, Durability and Exclusive Style in Garments That Cannot Be Duplicated Later in the Season

As the Thanksgiving season marks the boundry line between Fall and Winter this week is undoubtedly going to be a strenuously busy one in our outerapparel department.

There are hundreds of new garments, many of them luxuriously trimmed with fur; and there are just as many without fur wonderfully modeled with a view of permitting the wearer to employ her own neck fur.

All of the coats and suits on display in the Dives Pomeroy & Stewart collection are made of all-wool material and interlined, assuring unusual warmth. The quality of the material and the high grade of tailoring give special durability. These are the less obvious features that you will want to know about. The excellent style lines you can see for yourself. Scores of new coat styles \$20.00 to **\$100.00**

Extraordinary Suit Values, \$20 to \$65

The materials are the finest that have been produced during the 1917 season and the range of styles is satisfyingly complete; all of the garments are either reproductions of higher-priced models or originals.
