

800,000 WOMEN TO AID FOOD SAVING

Hundred Thousand Additional Added to Rolls of Conservation Forces

Reports coming to the Pennsylvania Committee of Public Safety from the food administration show that more than 100,000 Pennsylvania women have pledged themselves during the past few weeks to aid in the conservation of food.

Those who have the pledge card campaign in charge say that the great need of food in France is one of the dominant reasons given by the women of Pennsylvania for assisting Mr. Hoover.

The demand that war is making upon the resources of the sister republic is pathetically shown in statistics just received by the Committee of Public Safety.

In 1915, the year before the great conflict opened, France produced 14,000,000 bushels of wheat. In 1914 this had dropped to 12,000,000 bushels. In 1915 only 10,000,000 bushels could be raised and in 1916 the output was 8,000,000 bushels.

France has sent word that if the United States can spare her an additional 60,000,000 bushels she will somehow manage to get through the year.

It is to this end that the women of Pennsylvania are cutting down in the use of wheat flour and are avoiding all waste.

WORK OF Y.M.C.A. WARMLY PRAISED

Harrisburg Man Writes of What Association is Doing For Soldiers in Field

The work of the Y. M. C. A. ushers in the United States training camp is set forth interestingly by Frank L. Hesseberger, a former employe of the Harrisburg Telegraph, who recently enlisted as a camp secretary.

"I want to pass on to you at this time a few facts and figures which may come in handy in your solicitation next week. Camp Upton is of course typical of every cantonment as regards Y. M. C. A. Here we have eight buildings, each building designed to cater to a complete regiment of 3,800 men.

Each building costs in round figures \$8,000 to erect, and \$2,000 to equip and \$1,500 a month to operate, the last notwithstanding the fact that salaries of the secretaries are much less than in ordinary business pursuits.

When one approaches the question of what the Y. M. C. A. in the field is really able to accomplish, one attempts to answer an altogether difficult question. That good is actually accomplished is an established fact, but to measure that good is the difficult thing.

"I trust that I have not gone into too much detail. Once I got into the subject I said a great deal more than I had in mind when I started. Enclosed are two cards, a small quantity of which I have sent you under separate cover.
