

NEED TOBACCO BADLY IN ALL TRAINING CAMPS Soldier Without a Pipe or Cigaret Is to Be Pitted

In the Army they have men, just as there are out of the service, who are looked upon as "dodgers." The term "dodgers" is rather in disrepute, but "dodge" goes for any one who "kicks" Uncle Sam, or to get out of doing his duty, deserts or whines about how capitalists got us into war. A Harrisburg man just back from visiting one of the southern camps is telling how he saw one of these men sorely punished. Along with three others, this chap sat apart from the rest of the company, as though touched with plague. They were all "dodgers" and their faces reflected gloom. Finally the lad in question got on his feet and approached the party, saying: "Would anybody stake me to a fak? I just smoked my last cigaret."

Shipping Tangle Takes Baker to New York Port

Washington, Nov. 22.—Secretary Baker and Chairman Hurley, of the Shipping Board, went to New York together last night and were there to-day investigating the shipping situation. They went to determine whether any more American troops shall be sent to France until the shipping situation improves.

Sugar Gone, Creditors Ask Court to Raise Bail

Wilkes-Barre, Pa., Nov. 22.—Deprived of security for \$22,000 in loans made to Noah Raskin, of Harveys Lake, on a consignment of sugar, three city banks yesterday induced a judge to raise Raskin's bail to \$15,000.

SANTA SPEEDS TO PERSHING Bountiful Christmas Assured U. S. Men in France

Washington, Nov. 22.—Reports to the Post Office Department of the amount of parcel post matter going to the American Army in France indicate that Americans there will enjoy a bountiful Christmas.

TECH CAMERA CLUB MEETS

The monthly meeting of the Tech Camera Club was held yesterday afternoon in the physics lecture room with Charles Keller presiding.

PRODUCTION OF WINTER PORK

Costs Higher Than During the Spring and Summer Months

By H. G. Niesley, Dauphin County Farm Agent

The cost of producing a pound of pork is higher during the winter than during the spring and summer. This is true in all cases if the hog feeder makes use of pasture throughout the growing season.

Information is frequently sought regarding good grain combinations for fattening hogs during the winter months. According to Dr. H. H. Havner, in charge of animal husbandry extension at the Pennsylvania State College, the following should be result if a feed combination is satisfactory, viz:

(1) The fattening hogs should make a reasonably good gain per day.

(2) The cost per pound gain owing to a wise combination of foods should be low and the market price of feeds will allow.

Not only do fattening hogs require a heat producing feed but they also require a feed which will furnish protein as protein is needed for growth of body tissues. Corn at present price (December, 1917 quotations) will furnish fat at the lowest cost. Protein can be supplied by the use of skim milk or buttermilk. If these protein feeds are not available, tanage, although selling at \$5 to \$5.50 per hundred-weight, will furnish the growing material at the lowest cost per pound of digestible protein.

A good way to feed the middlings and tanage when pigs are being started on new corn is to make up a mixture of 300 pounds of wheat middlings and 100 pounds of tanage. For hogs weighing 75 to 100 pounds, stop feeding a day with one pound of this mixture per pig. In addition feed twice daily all the new corn the pigs will eat up clean.

It is advisable to start fattening hogs on a moderate amount of new corn. The amount of corn can be increased gradually each day and no trouble will result from scouring or overfeeding. Ear corn can be fed until the new crop has been cribbed long enough to shell and grind.

When cornmeal is fed a mixture of 600 parts of cornmeal, 200 parts of wheat middlings and 100 parts of tanage will be satisfactory for fattening purposes. If a good grade of feeding tanage cannot be secured, 150 parts of oil meal may be used instead of 100 parts of tanage. Feed from two to three and one-half pounds of this mixture per 100 pounds liveweight of hogs daily. Gray feed should be mixed with water and fed as a thick slop. If cold weather it will be necessary to use warm water or else feed the grain mixture dry.

The appetite of the pigs should regulate, in a large measure, the amount of feed per day. The above standards are suitable only as a guide to the proper amount to be fed.

If a supply of food skim milk or buttermilk is available, either may be fed. The rate of feeding should be three pounds of milk for every pound of corn. Such a combination makes a good growing and fattening feed.

It is important to note that the efficiency of the feed can be increased by the addition of a small amount of feeding tanage. Not more than one-fourth pound of tanage per day need be fed. It may be fed dry or mixed with a little wheat middlings and fed as a thick slop with milk or water.

Fattening hogs should be provided with dry and comfortable sleeping quarters. The health and thrift of the hogs will be much better if the pens are kept dry and free from dust.

Attacks of rheumatism and lameness are likely to occur if the hogs are allowed access to a dry and well drained lot adjoining the sleeping quarters.

Attacks of rheumatism and lameness are likely to occur if the hogs are allowed access to a dry and well drained lot adjoining the sleeping quarters.

Attacks of rheumatism and lameness are likely to occur if the hogs are allowed access to a dry and well drained lot adjoining the sleeping quarters.

BAZAAR INCOME \$71,145 BUT TROOPS GET ONLY \$754.96 New York—Big expenses cut so deeply into the receipts of the Army and Navy bazaar here October 27, that out of a gross income of \$71,145, there was left only \$754.96 net profit to be applied to comfort kits for soldiers and sailors, according to preliminary figures submitted to the management by the federal accounting corporation which audited the accounts.

The affair was conducted for the benefit of the United States Army and Navy Field Comfort committee, and each dollar realized was to provide a comfort kit for a soldier or sailor. The auditors' report showed that commissions on advertisements for the program, rent of exposition space, newspaper advertising, salaries for clerks and workers and decorations ate up most of the income. The net profit of \$754.96 represents an equal amount which went to the managing director as a payment for his work under an agreement. Officials in charge said they regarded the bazaar as an unfortunate experiment.

NEW MAIL CARRIER Halifax, Pa., Nov. 22.—Melvin W. Sheets, of Halifax township, who was appointed regular carrier on rural route No. 3, running out of the Halifax post office, took charge of his new duties on Tuesday morning, relieving J. Clark Zimmerman, who has been substitute carrier since the route started in July.

Here Is the Sale of Shoes You Have Been Waiting For A Timely Purchase of Over 600 Pairs of Women's and Misses' High Grade Shoes

Every Pair This Season's Newest Models--Every Pair Absolutely Perfect Two Big Sale Days--Tomorrow (Friday) and Saturday

Our Shoe Buyer was extremely fortunate in procuring the surplus stocks of two big shoe factories at an unusually big price concession. In place of marking these shoes at present-day prices and pocketing an extra profit for ourselves, we have consistently followed our famous underselling policy by giving you the full benefit of our big saving. We have marked them at prices that would even vie with before-the-war prices. The economical woman should buy several pairs and save money.

WOMEN'S AND MISSES' Shoes AND MISSES' Shoes Black Patent Kids and Black Dull Calf lace and button models. Some with tips and some with plain tips. Flexible Goodyear welted soles and Louis or Military heels. All are high cut. All sizes and widths. Values \$4.00 and \$4.50. Sale Price \$2.79. Sale Price \$3.97.

Cuticura Heals Skin Troubles

Soap 25c. Ointment 25 and 50c.

Give Cour, Upset Stomach A Magnesia Bath, Says Doctor, To Neutralize Acid--Stop Indigestion

To Drive Gas and Bloat from Body, End Heartburn, Dyspepsia, Pain, Must Keep Stomach Sweet and Clean. Tells us to Wash Out Acids.

"No man or woman who suffers from sick, sour, upset and gassy stomach, with indigestion, heartburn and dyspepsia, can make a mistake by giving the stomach an occasional internal bath. This is a little Bisaurated Magnesia," says a well-known authority. Ninety per cent of all digestive disorders are caused by "too much acid" in the stomach. While nature provides sufficient hydrochloric acid to digestive fluids, a great many stomachs develop too much acid which irritates and inflames the stomach walls, causing partially digested food to sour and ferment, and develop heartburn, nausea, and develop indigestion, heartburn and painful digestion.

It is a mistake to take cathartics like soap, acid or other drugs into the intestines. Instead the acid in the stomach should be neutralized by the internal Magnesia bath.

Get a bottle of Bisaurated Magnesia (either tablets or powder) from G. A. Gorgas or any good drug store. Take one or two tablets or a teaspoonful of the powder in a cup of hot or cold water three or four times a day. Drink and washes down into your acid inflamed and burning stomach where it will do its work. It soothes and cools the heated walls and takes up or neutralizes every trace of excess acid, much as a sponge or blotting paper might do. There will be no flatulence, no gas or heartburn, no full, heavy feeling, no headache, griping stomach pains, dizziness or bad breath. Your stomach will act and feel fine.

Bisaurated Magnesia is the only form of Magnesia you should use for this purpose as it is not a laxative and will not injure the stomach. Bisaurated Magnesia baths are now being taken daily by thousands of men and women who eat as they please without a fear of indigestion.

Get a bottle of Bisaurated Magnesia.

To Give Men And Women More "Steel-Like" Nerves and Bodies-- Greater Vitality, More Energy and Increased Power of Endurance Is Why Physicians Are Urging Many to TAKE BLOOD-IRON-SALTS

New York.—For many years physicians and scientists have known that a harmless compound would discover a harmless compound that would increase strength and endurance into the dilapidated bodies of those who are delicate, nervous, or who lack the vitality, energy and power of endurance.

Gabriel Boudousquié, M. D., the well-known New Orleans physician, author who has traveled extensively in France, Italy and Austria, says that the public generally know very little about what is needed to correct the wrong conditions set up in the body by the nervous system, dissipation and through eating foods that are lacking in the chemical elements that make red-blood corpuscles, nerve structure, healthy tissue and "stay the strength and endurance. These wrong conditions must be corrected in all such weak, nervous, anemic and sickly cases, in the turn of strength and good health is to be expected. First, the poisonous toxins in the system that are chemically developed in the bowels by the putrefaction of undigested food elements, must be eliminated. These deadly toxins tear down the vital energy and cause disease, functional disorders and premature aging of the body. Second, the depleted nerve energy must be restored and third, the red-blood corpuscles must be increased to the number required by Nature. It will therefore be seen that a medical compound to be effective in restoring wasted nerve energy, lost strength and health, must contain ingredients for eliminating the poisonous toxins, for restoring wasted nerve energy and for increasing the red-blood corpuscles. Nowadays, so many different tonics and foods are sold that one might have to take several chemically developed in the bowels by the putrefaction of undigested food elements, must be eliminated. These deadly toxins tear down the vital energy and cause disease, functional disorders and premature aging of the body. Second, the depleted nerve energy must be restored and third, the red-blood corpuscles must be increased to the number required by Nature. It will therefore be seen that a medical compound to be effective in restoring wasted nerve energy, lost strength and health, must contain ingredients for eliminating the poisonous toxins, for restoring wasted nerve energy and for increasing the red-blood corpuscles. Nowadays, so many different tonics and foods are sold that one might have to take several chemically developed in the bowels by the putrefaction of undigested food elements, must be eliminated. Second, the depleted nerve energy must be restored and third, the red-blood corpuscles must be increased to the number required by Nature. It will therefore be seen that a medical compound to be effective in restoring wasted nerve energy, lost strength and health, must contain ingredients for eliminating the poisonous toxins, for restoring wasted nerve energy and for increasing the red-blood corpuscles. Nowadays, so many different tonics and foods are sold that one might have to take several chemically developed in the bowels by the putrefaction of undigested food elements, must be eliminated. These deadly toxins tear down the vital energy and cause disease, functional disorders and premature aging of the body. Second, the depleted nerve energy must be restored and third, the red-blood corpuscles must be increased to the number required by Nature. It will therefore be seen that a medical compound to be effective in restoring wasted nerve energy, lost strength and health, must contain ingredients for eliminating the poisonous toxins, for restoring wasted nerve energy and for increasing the red-blood corpuscles.
